## **Perceptions Of The Federal Republic Of Germany:**

**Perceptions of the Federal Republic of Germany** Robert Allan Spencer, 1986 From the John Holmes Library collection  
East-west Conflict Michael D. Intriligator, 2019-04-09 This book aims to bring together American and West German scholars in order to analyze U S German and Soviet elite perceptions of East West conflict It attempts to assess the policy implications and political options for the West  
Perceptions of Europe Daniel Gaxie, Nicolas Hubé, Jay Rowell, 2013 This book presents the main findings of a comparative qualitative survey conducted in France Germany Italy and Poland Ordinary citizens from very different social backgrounds and professions were asked a range of open ended questions allowing them to express themselves freely There have been few qualitative surveys on ordinary citizens views of European integration and none on this scale The resulting picture is very different from the self evident assumptions of many current studies on European opinions The book stresses the great diversity ambiguity and complexity of European attitudes It emphasises the causal impact of formal education political interest and involvement individual everyday exposures to European realities and the role of collective national experiences of European integration and national history This book is the first qualitative survey among ordinary from all social strata across Europe that explores perceptions and judgments on Europe and the EU explains the underlying logic of why Europe and European integration are such a far reality to most citizens explores how most citizens are poorly but unequally informed about and interested in European subjects investigates how citizens are able to express perceptions of Europe by using a series of analogies and comparisons often linked to their daily experiences identifies the complex range of issues that influence our perceptions and the irresolute fragmentary mixed and sometimes contradictory nature of these opinions  
**Cold War Rivalry and the Perception of the American West** P.

Goral, 2014-03-07 This book demonstrates how the two adversaries of the Cold War West Germany and East Germany endeavored to create two distinct and unique German identities In their endeavor to claim legitimacy the German cinematic representation of the American West became an important cultural weapon of mass dissemination during the Cold War

Perceptions of the Holocaust in Europe and Muslim Communities Günther Jikeli, Joëlle Allouche-Benayoun, 2012-11-08 The way people think about the Holocaust is changing The particular nature of the transformation depends on people s historical perspectives and how they position themselves and their nation or community vis vis the tragedy Understandably European Muslims perceive the Holocaust as less central to their history than do other Europeans Yet while the acknowledgement and commemoration of the horrors of the Holocaust are increasingly important in Europe Holocaust denial and biased views on the Holocaust are widespread in European Muslims countries of origin In this book a number of distinguished scholars and educators of various backgrounds discuss views of the Holocaust Problematic views are often influenced by a persistent attitude of Holocaust denial which is derived in part from discourses in the Muslim communities in their countries of origin The essays collected here explore the backgrounds of these perceptions and highlight positive

approaches and developments Many of the contributions were written by people working in the field and reflecting on their experiences This collection also reveals that problematic views of the Holocaust are not limited to Muslim communities

**Western Perceptions Of Soviet Goals** Klaus Gottstein,2020-01-23 This study investigates Western views on the potential future developments in the U S S R It traces the facts figures fears and ideological prejudices that have contributed to the mutual mistrust between the East and the West over long range political goals and recommends ways of reducing it

**NATO and Western Perceptions of the Soviet Bloc** Evanthis Hatzivassiliou,2014-05-30 This book examines the NATO reports on the Soviet bloc s political and economic system from 1951 to the aftermath of the Soviet invasion of Czechoslovakia and the beginning of detente As part of the wider history of Cold War Alliances the detailed assessments of the NATO experts regarding the non military aspects of Soviet power are a crucial indicator of Western allied perceptions of the adversary Their study allows us to widen the discussion on the Western alliance the accuracy of its information or perceptions and the nature of the Cold War Hatzivassiliou argues that the Cold War was not only a strategic dilemma although it certainly was that as well but also the latest stage of the crisis of legitimization which had been raging since the dawn of modernity NATO Western analysis is examined in this context At the same time the book discusses the relative influence of the major NATO members US and British influence was strong while French West German and Italian influence was also significant in the drafting of the reports and thus in shaping the alliance s perceptions during the Cold War This book will be of much interest to students of NATO Cold War Studies international history foreign policy and IR in general

Perception-based Marketing of Parishes using the example of Catholic Academics and Students Thomas Peters,2019-03-28 The Roman Catholic Church in Germany is faced with an increasingly pluralistic and secularized society that further precipitates the decline in membership that has been ongoing already since the 1970s through instances of aging population and church leavings and has been causing at the level of locally and regionally operating parishes and their establishments a growing shortage of personnel and other resources Here a marketing communication that is based on target group specific perception can be useful to remedy the situation in that the religious and social offers as well as the personal and media appearance of parishes are adjusted to population groups that credit to their socioeconomic potentials are able to substantially contribute to building social capital in church contexts Particularly Catholic Academics with high affinity to the Church make their comprehensive individual professional and financial resources available more frequently and more consistently for voluntary engagements than the majority of the German population A group that positively engages to great extent is that of those students and Academics who are organized in Catholic student fraternities or associations and their local institutions A targeted involvement of this small but high resourced population group in local church activities can

be a substantial and existential aid for the Catholic Church in Germany and sustain its further development This is explored and discussed on the example of the largest academic association in Europe Cartel Confederation of the Catholic German Student Associations CV in German Cartellverband der katholischen deutschen Studentenverbindungen and attached specific practical recommendations for parish marketing The Germany based research results can be applied to other European countries such as Austria and Switzerland Furthermore the discussion of results offer a broad range of new perspectives and ideas for church marketing in those countries which have a living culture of denominational student associations

**Personality and Person Perception Across Cultures** Yueh-Ting Lee, Clark R. McCauley, Juris G. Draguns, 2013-05-13

Neither human nature nor personality can be independent of culture Human beings share certain social norms or rules within their cultural groups Over 2000 years ago Aristotle held that man is by nature a social animal Similarly Xun Kuang 298 238 B C a Chinese philosopher pointed out that humans in social groups can not function without shared guidance or rules This book is designed to provide readers with a perspective on how people are different from and similar to each other both within and across cultures One of its goals is to offer a practical guide for people preparing to interact with those whose cultural background is different from their own Changing Threat Perceptions and Military Doctrines Laszlo

Valki, 1992-06-18 Owing to the revolutionary changes in Eastern Europe and the Soviet Union the threat perceptions of the East and West have vanished The contributors to this volume report this social process and try to identify some of the new threat perceptions which will arise A Revolution of Perception? Ingrid Gilcher-Holtey, 2014-08-01 The year 1968 marked the climax of protests that simultaneously captured most industrialized Western countries The protesters challenged the institutions of Western democracies confronting powerful established parties and groups with an opposing force and public presence that negated traditional structures of institutional authority and criticized the basic assumptions of the post war order Exploring the effects the protest movement of 1968 had on the political social and symbolic order of the societies they called into question this volume focuses on the consequences and echoes of 1968 from different perspectives including history sociology and linguistics

**India and Germany in a Turbulent World** Rajendra K. Jain, 2024-11-15 India shares a multi dimensional relationship with the Federal Republic of Germany Germany is India s largest trading partner within the European Union and is also a major source and destination of foreign direct investment a significant donor and an important source of technology Drawing on English and German language source material this book covers the evolution and expansion of India s economic political defence and scientific technological ties with Germany from 1947 to the present day It analyses mutual perceptions highlights the elements of convergence and divergence and discusses the challenges and prospects of this relationship in a world marked by geopolitical uncertainty Print edition not for sale in South Asia India Sri Lanka Nepal Bangladesh Pakistan and Bhutan East German Distinctiveness in a Unified Germany Jonathan Grix, P Cooke, 2003-02-28

This book explores the nature of the dramatic growth in a distinct sense of East German identity in the years since the events

that led to formal unification in 1990 While it is problematic to see East Germanness as a singular and homogenous identity it can be perceived as a distinctive phenomenon and a level of identification that exists alongside local regional and national identities The essays in this volume hope to challenge the commonly held misconception that East German regional identity is a problem that needs to be overcome in the process of unification Through analyses of the social political and cultural behaviour of East Germans and their perception of their own place in German society this volume makes a complex and nuanced contribution to discussions on German national identity and the unification process

### **Auditory Perception**

Richard M. Warren, 2013-10-22 *Auditory Perception A New Synthesis* focuses on the effort to show the connections between key areas in hearing The book offers a review of classical problems and then presents interpretations and evidence of this topic A short introduction to the physical nature of sound and the way sound is transmitted and changed within the ear is provided The book discusses the importance of being able to identify the source of a sound and then presents processes in this regard The text provides information on the organs involved in the identification of sound and discusses pitch and infrapitch and the manner by which their loudness can be measured Scales are presented to show the loudness of sound The relationship of hearing with other senses is also discussed The text also outlines how speech is produced taking into consideration the organs involved in the process The book is a valuable source of data for research scientists and other professionals who are involved in hearing and speech

Germany and the European East in the Twentieth Century Eduard Mühle, 2003-05-01 How did German society perceive the European East during the short twentieth century What were the mental maps Germans constructed as their images of the European East How did these images alter over time due to changing political systems and to what extent did those mental perceptions influence political action and the relationship between Germany and Eastern Europe Tackling questions such as these this book looks at the complicated relationship between Germany and the European East Politically significant this relationship was often fraught with tension always delicate and never easy The book looks at the social cultural and political contexts that shaped the German image of the East during the Weimar Republic the Third Reich and the Federal Republic In addition it charts the mental maps that German society constructed with respect to single constituent parts of Eastern Europe such as Czechoslovakia Poland the Baltic States and the Soviet Union The contributors consider how the relationship was transformed from one of hostility to one more conciliatory in character by the end of the twentieth century

*A History of Germany 1918 - 2008* Mary Fulbrook, 2011-08-10 The third edition of *A History of Germany* traces the dramatic social cultural and political tensions in Germany since 1918 Offers a persuasive interpretation of the dynamics of twentieth century German history Treats German history from 1918 2008 from the perspective of division and reunification covering East and West German history in equal depth Covers the self destructive Weimar Republic the extremes of genocide and military aggression in the Nazi era the division of the nation in the Cold War and the collapse of communist East Germany and unification in 1990 New edition

includes updates throughout especially covering the Nazi period and the Holocaust a new chapter on Germany since the 1990s and a substantially revised and updated bibliography      Victory in Europe? Sabine Lee, 2014-07-15 With the debate about Europe constantly in the headlines this examination of the important and tricky post war relationship between German and Britain compares their different roles outlook and development In the wake of a devastated continent this relationship has been one of the central axes of the development of post war Europe and crucial in terms of recent British history Sabine Lee considers broad issues such as the comparative senses of national identity destiny and direction and the respective roles of Germany and Britain in Europe and in the world community at large With Germany now reunited and at the head of the new Europe and Britain in the process of devolution and struggling to retain the special relationship with the United States this is an important and topical book      **Allied Perceptions of Threat** Joseph I.
