Library,1968 Foregrounded Description in Prose Fiction José M. Lopes,1995-12-15 In this wide ranging study Jos Manuel Lopes proposes a theoretical framework for analysing the role of description in prose fiction He offers readings of texts drawn from four national literatures French Spanish Portuguese and Brazilian testing his model across a cultural and temporal spectrum This critical breadth also illustrates the significance of description in disparate contexts the postmodern novel which implicitly challenges conventional notions of foreground and background as well as the naturalist and realist fiction of the nineteenth century Lopes applies his model to detailed readings of Emile Zola's *Une Page d'amour* Claude Simon's *Histoire* Benito Pérez Galdós's *La de Bringas* Cornélio Penna's *A Menina Morta* and Carlos de Oliveira's *Finisterra* In addition to exploring the interplay of description and narration these readings pay particular attention to spatial descriptions and analyse the diverse roles of description in different contexts After subjecting each fictional text to a detailed analysis which seeks to bring out the crucial aspects that contribute towards the foregrounding of descriptive passages e.g. *mise en abyme* parody modes of representation and which establishes on occasion certain relations that literary description may entertain with the other arts he attempts to isolate the primary functions of foregrounding descriptions What he seeks to demonstrate is that description constitutes a major textual component necessary for the analysis and understanding of both nineteenth and twentieth century fictional texts **The Land and the Cross** Valentina Burgassi,George Alexander Said-Zammit,Valeria Vanesio,2025-03-14 As the sun sees everything so should the eye this was the guiding principle expounded in the 1588 Statutes of the Order of St John concerning management and control over its extensive urban and rural properties In a similar way this book seeks to provide its readers with the eyes through which to navigate a variegated Hospitaller landscape from Portugal to Italy and from Germany to Malta in the early modern period Priories bailiwicks foundations and commanderies formed the power base of the institution and the Order acted with local leaders and communities in a series of overlapping jurisdictions which led to both fruitful alliances and power struggles The contributions in this book by scholars from across diverse disciplinary and geographical borders shed light on the archival sources and legal procedures politics and diplomacy social and financial aspects as well as the landscape and architectural features of the Hospitaller network of properties In so doing they help to recompose a fragmented and often forgotten history forged in multicultural environments *The Land and the Cross* establishes a foundation for future scholarship and stimulates interdisciplinary collaboration to recover and protect a heritage that is today neglected hidden or abandoned The book challenges readers in the field of Hospitaller studies and beyond to explore a wider world through the unique and original lens of the Order of St John The Suma Oriental of Tomé Pires Armando Cortesão,2018-01-12 Containing the translated

Gunn,2018-10-15 Studies on global metageography are enjoying a revival and in no way is this better referenced than against the geo world system bequeathed by Claudius Ptolemy almost two thousand years ago This is all the more important when we consider the longevity of the Ptolemaic construct through and beyond the European age of discovery allowing as well for its eventual revision or refinement Innovations in navigational science cartographic representations and textual description are all called upon to illustrate this theme With its focus upon the macro region termed India Extra Gangem literally the space between India and China the book unfolds a fourfold agenda First it explains the Ptolemaic world system back to classical points of reference as well as to its reception in late medieval Europe from Arabic sources Second it tracks the erosion of the Ptolemaic template especially in the light of new empirical data entering Europe from early travel accounts as well as the first voyages of discovery Third through selected examples as with India Southeast Asia and China it seeks to expose textual and cartographic adjustments to the classical models flowing from the scientific revolution Fourth through an examination of Jesuit astronomical observations conducted at various points in Asia it demonstrates how Eurasia was actually measured and sized with respect to its true longitudinal coordinates such had deluded Columbus and even succeeding generations In short this work problematizes the creation of geographical knowledge raises awareness as to the making of region in Asia over long historical time the Ptolemaic world in motion and as a more latent agenda sounds an alert as to the perils of overdetermination in the setting of modern boundaries whether upon
