Performance Enhancing Substances In Sport And Exercise:

Doping in Sports Christopher N. Burns, 2006 The use of performance enhancing substances by athletes has a long history predating the ancient Greek Olympiads This report compares anti doping policies for performance enhancing substances among the Olympic movement and three professional sports Major League Baseball the NBA and the NFL

Towards a Social Science of Drugs in Sport Jason Mazanov, 2013-09-13 The debate around the role of drugs in sport is vibrant There is a wealth of evidence from the hard end of science telling us how drugs work how drug testing works and how many athletes have fallen foul of the system The evidence from social science is still building momentum For example what makes an athlete use a performance enhancing substance To win simply fails to explain the drug use behaviour we see among athletes This book provides a foundation for anyone trying to understand the drugs in sport problem beyond the hard science by looking at the people factor from different perspectives After building a case for the social science of drugs in sport it is examined from the ethical sociological economic legal and psychological points of view The book concludes with a definitive statement about what researchers policy makers sports administrators athletes and fans can do to achieve a social science of drugs in sport that puts people firmly in the centre of the debate This volume was published as a special issue of *Sport in Society*

Drugs in Sport David R. Mottram, Neil Chester, 2014-11-13 Drug use and abuse is perhaps the biggest challenge facing sport today However in the eye of the storm of public and press opinion and with medals and morals at stake it can be difficult to gain a clear perspective on this complex issue Now available in a fully updated and revised sixth edition *Drugs in Sport* is the most comprehensive and accurate text available on the subject Taking into account the latest regulations methods and landmark cases the book explores the hard science behind drug use in sport as well as the ethical social political and administrative context Key topics include Mode of action and side effects of each major class of drugs used in sport Discussion of cutting edge issues such as gene doping and athlete biological passports The latest doping control regulations of the World Anti Doping Agency WADA Issues surrounding non prohibited substances and ergogenic aids in supplements Medical and pharmaceutical services at major sporting events An assessment of the prevalence of drug taking in sport Accessibly written extensively referenced and supported throughout with illustrative case studies and data *Drugs in Sport* provides a comprehensive objective resource for students and researchers athletes sports scientists and coaches journalists sports administrators and policymakers

Doping in Sport and Fitness April Henning, Jesper Andreasson, 2022-12-12 *Doping in Sport and Fitness* argues that rigid differentiations between doping contexts are less clear than it might seem Breaking down these boundaries allows for a more complete understanding of substance use patterns behaviours and policy responses related to sport fitness and society
