Performance Measures and Value Creation: the State of the Art DANIELA VENANZI, 2011-12-02 The choice of financial performance measures is one of the most critical challenges facing organizations The accounting based measures of financial performance have been viewed as inadequate as firms began focusing on shareholder value as the primary long term objective of the organization Hence value based metrics were devised that explicitly incorporate the cost of capital into performance calculations Despite the increasing emphasis on these value based measures no definitive evidence exists of which metric works better than others and on the extent to which any of them is superior to traditional accounting measures In this scenario the objective of this book is contributing to the ongoing dialogue on the appropriateness of different financial performance measures by providing a systematic and updated review of the major value based measures by highlighting their respective strengths and weaknesses and by comparing the main international empirical evidence on their effectiveness This book can be a powerful tool for guiding managers and graduate students in the tangled forest of the existing metrics by providing them with the quick but adequate knowledge for consistently adopting them **Budgeting and Financial**

Rethinking Performance Measurement Marshall W. Meyer, 2003-01-09. Performance measurement remains a vexing problem for business firms and other kinds of

organisations This book explains why the performance we want to measure long term cash flows long term viability and the performance we can measure current cash flows customer satisfaction etc are not the same The balanced scorecard which has been widely adopted by US firms does not solve these underlying problems of performance measurement and may exacerbate them because it provides no guidance on how to combine dissimilar measures into an overall appraisal of performance A measurement technique called activity based profitability analysis ABPA is suggested as a partial solution especially to the problem of combining dissimilar measures ABPA estimates the revenue consequences of each activity performed for the customer allowing firms to compare revenues with costs for these activities and hence to discriminate between activities that are ultimately profitable and those that are not
