Performance Analysis Of Local Computer Networks:

Performance Analysis of Local Computer Networks Joseph L. Hammond, Peter J. P. O'Reilly, 1986-01-01

Performance Analysis of Computer Networks Matthew N.O. Sadiku, Sarhan M. Musa, 2013-10-02 This book covers performance analysis of computer networks and begins by providing the necessary background in probability theory random variables and stochastic processes. Queuing theory and simulation are introduced as the major tools analysts have access to. It presents performance analysis on local metropolitan and wide area networks as well as on wireless networks. It concludes with a brief introduction to self similarity. Designed for a one semester course for senior year undergraduates and graduate engineering students, it may also serve as a fingertip reference for engineers developing communication networks, managers involved in systems planning and researchers and instructors of computer communication networks.

Performance Analysis of Telecommunications and Local Area Networks Wah Chun Chan, 2005-12-17 Performance Analysis of Telecommunications and Local Area Networks presents information on teletraffic engineering with emphasis on modeling techniques, queuing theory and performance analysis for the public switched telephone network and computer communication networks. Coverage includes twisted pair cables and coaxial cables, subscriber loops, multistage network switching, modeling techniques for traffic flow and service time, random access networks and much more. End of chapter problems with solutions are also included. Performance Analysis of Telecommunications and Local Area Networks is also a useful reference for practicing engineers but is intended as a textbook in advanced level courses.

Advances in Queueing Theory, Methods, and Open Problems Jewgeni H. Dshalalow, 2023-07-21 The progress of science and technology has placed Queueing Theory among the most popular disciplines in applied mathematics, operations research and engineering. Although queueing has been on the scientific market since the beginning of this century, it is still rapidly expanding by capturing new areas in technology. Advances in Queueing provides a comprehensive overview of problems in this enormous area of science and focuses on the most significant methods recently developed. Written by a team of 24 eminent scientists, the book examines stochastic analytic and generic methods such as approximations, estimates and bounds, and simulation. The first chapter presents an overview of classical queueing methods from the birth of queues to the seventies. It also contains the most comprehensive bibliography of books on queueing and telecommunications to date. Each of the following chapters surveys recent methods applied to classes of queueing systems and networks, followed by a discussion of open problems and future research directions. Advances in Queueing is a practical reference that allows the reader quick access to the latest methods.

Optical WDM Networks Krishna M. Sivalingam, Suresh Subramaniam, 2006-04-18 Optical WDM networking technology is spearheading a bandwidth revolution in the networking infrastructure being developed for the next generation Internet. Rapid advances in optical components have enabled the transition from point to point WDM links to all optical networking. Optical WDM Networks: Principles and Practice presents some of the most important challenges facing the

optical networking community along with some suggested solutions Earlier textbooks in optical networking have a narrower perspective and rapidly advancing research has created the need for fresh and current information on problems and issues in the field The volume editors and contributing authors have endeavoured to capture a substantial subset of the key problems and known solutions to these problems All of the chapters are original contributions from leading international researchers The chapters address a wide variety of topics including the state of the art in WDM technology physical components that make up WDM fiber optic networks medium access protocols wavelength routed networks optical access networks network management and performance evaluation of wavelength routing networks The chapters also survey critical points in past research and tackle more recent problems Practitioners and network product engineers interested in current state of the art information beyond textbook type coverage and graduate students commencing research in this area will appreciate the concise and pertinent information presented herein

Stojmenovic, 2003-04-08 The huge and growing demand for wireless communication systems has spurred a massive effort on the parts of the computer science and electrical engineering communities to formulate ever more efficient protocols and algorithms Written by a respected figure in the field Handbook of Wireless Networks and Mobile Computing is the first book to cover the subject from a computer scientist's perspective It provides detailed practical coverage of an array of key topics including cellular networks channel assignment queuing routing power optimization and much more Wired/Wireless

Internet Communications Peter Langendoerfer, Mingyan Liu, Ibrahim Matta, Vassilis Tsaoussidis, 2004-01-20

The International Conference on Wired Wireless Internet Communications WWIC was held for the second time following a successful start in 2002 in Las Vegas The goal of the conference was to present high quality results in the field and to provide a framework for research collaboration through focused discussions that designated future research efforts and directions The number and the quality of submissions indicate that we are well on the way to establishing WWIC as a major event in the field of wired wireless internet communications We received around 60 competitive submissions from Europe North America the Middle East and the Far East Each submission was reviewed by at least two experts although the majority received three or more reviews Based on this rigorous reviewing procedure the International Program Committee selected 26 submissions for presentation and publication in the proceedings Therefore we should all expect the quality of a selective conference in this volume We hope you will enjoy it The papers selected for presentation at WWIC 2004 were stimulating and of utmost interest They were organized into eight sessions 1 Protocol engineering and energy efficiency in wireless networks 2 Mobility management and mobile devices 3 Transport layer and congestion control 4 Architecture implementation and experimentation 5 Network and protocol modeling 6 Wireless network scheduling and analysis 7 Multimedia distribution and group communication 8 Service discovery We would like to thank the authors for choosing WWIC 2004 to submit their results

We would also like to thank all the members of the Technical Program Committee as well as the additional reviewers for their effort to provide detailed and constructive reviews

Grid Enabled Remote Instrumentation Franco Davoli, Norbert Meyer, Roberto Pugliese, Sandro Zappatore, 2008-10-10
Grid architectures which are viewed as tools for the integration of distributed resources play a significant role as managers of computational resources but also as aggregators of measurement instrumentation and pervasive large scale data acquisition platforms The functionality of a grid architecture allows managing maintaining and exploiting heterogeneous instrumentation and acquisition devices in a unified way by providing standardized interfaces and common work environments to their users This result is achieved through the properties of isolation from the physical network and from the peculiarities of the instrumentation granted by standard middleware together with secure and flexible mechanisms which seek access and aggregate distributed resources This book focuses on a number of aspects related to the effective exploitation of remote instrumentation on the grid These include middleware architecture high speed networking in support of grid applications wireless grid for acquisition devices and sensor networks quality of service provisioning for real time control and measurement instrumentation

Distributed Cooperative Laboratories: Networking, Instrumentation, and Measurements Franco Davoli, Sergio Palazzo, Sandro Zappatore, 2006-07-02
