Perfumery Steve Van Toller, George H. Dodd, 2013-04-17 THE SENSE OF SMELL The nose is normally mistakenly assumed to be the organ of smell reception It is not The primary function of the nose is to regulate the temperature and humidity of inspired air thereby protecting the delicate linings of the lungs This is achieved by the breathed air passing through narrow passageways formed by three nasal turbinates in each nostril The turbinates are covered by spongy vascular cells which can expand or contract to open or close the nasal pathways The olfactory receptors innervated by the 1st cranial nerve are located at the top of the nose There are about 50 million smell receptors in the human olfactory epithelia the total size of which in humans is about that of a small postage stamp with half being at the top of the left and half at the top of the right nostril The receptive surfaces of olfactory cells are ciliated and

extend into a covering layer of mucus There is a constant turnover of olfactory cells Their average active life has been estimated to be about 28 days

Perfume in the Bible Charles Sell,2019-07-26 Perfume is part of the biblical text from Genesis through to Revelation just as perfume pervades our modern life Identifying the ingredients used in biblical times is difficult when information and meaning is lost in ancient languages As expected biblical perfumes were made from natural products but the range employed is surprisingly different from those of modern perfumes The biblical ingredients are either defensive substances or products of decay opening up an avenue of speculation as to why this is so Charles Sell started his research into this area whilst working at Givaudan the world's leading manufacturer of perfumes and flavours The introductory chapter of this book gives a brief outline of the history of the Bible lands paving the way to understanding the difficulties in identifying exactly which plant sources the original authors meant Other chapters discuss how plants make chemicals and how the sense of smell functions The book explores the preparation storage and uses of perfume both sacred and secular and compares and contrasts biblical perfumes with their modern equivalents It recounts some interesting biblical events involving perfume ranging from courtship through seduction to prostitution and murder The use of beautiful images from the windows of Canterbury Cathedral where the author is a guide illustrate some of the people and events in the biblical accounts and enable
