Algebra D.G.H.B. Lloyd, 2014-05-17 Modern Syllabus Algebra presents topics of traditional and modern algebra found in the Teachers Certificate and B Ed part I syllabuses of University Institutes of Education. It also contains additional exercises taken from examination papers of the University of London Institute of Education the Teachers Certificate. The book discusses several mathematical concepts such as sets, relations and functions, Boolean algebra, groups and number systems. It also illustrates linear equations, matrices and vector spaces and then demonstrates how to solve complex numbers and combine probabilities. Mathematics teachers will find this text a suitable and convenient way of bringing themselves up to date in what is now being taught in schools.

Philosophy of Education and the Curriculum Keith Dixon, 2014-05-17 Philosophy of Education and the Curriculum is a six chapter book that first elucidates the forms of knowledge, argument and religious education. Subsequent chapters detail the mathematics, natural science and history forms of knowledge. Moral philosophy and moral education are then explained. The last chapter provides an explanation of learning.

Awakening the Slower Mind Violet R. Bruce, 2014-05-15 Awakening the Slower Mind deals with the education of and teaching special needs children. More particularly, this book concerns children in special schools for the educationally subnormal whom the author differentiates from the ineducable child. The first part of this book discusses these children by noting conditions before and during their birth and the background environment of immigrant children and school transferees. The second part of this text is a discussion on the educational system as to how it affects these children and discusses when the child with difficulties cannot keep up with his teachers with the other students and with the system. In a highly industrialized country, literacy becomes an important tool for communication. By making these special students appreciate the value of using language properly through the teacher's efficient use of expressive arts and similar activities, their personality can develop and grow to the point that they will learn to appreciate the value of learning appropriate and correct language skills. The author points out that in this way these children will become functionally literate. This book is recommended for school administrators, for special learning institutions, school counselors, education majors, pediatricians and parents of special needs children.

Cities in Action Eugene Van Cleef, 2014-05-17 Cities in Action focuses on the planning of cities. The book first discusses the planning of cities wherein planning is considered as a protective device that influences orderly procedure and cooperation among citizens. Accessibility is seen as an influential factor in the rise and distribution of cities. The text underscores that along with the rise of cities is the establishment of sidewalks, malls, parks and shopping centers. Zoning and land use are also important in the planning of cities. These factors help in identifying the structures that should be built or established in a particular place. The text also takes a look at the establishment of industrial parks and industrial upgrading of cities. Management of water supply, noise and pollution is influential in the appreciation of cities. Computer systems are also applied to city operations including the work of planning. The text also underscores the need for residential parking as the rise of cities has resulted to the increase in automobiles. The book also underlines that decongestion of traffic is viewed as an important factor.

in the delivery of goods and services to citizens Roads avenues and expressways are seen as helpful in lessening traffic in cities The book is a vital source of data for city planners National Union Catalog ,1973 Includes entries for maps and atlases **Society, Schools & Progress in China** Chiu-Sam Tsang,2016-06-06 Society Schools and Progress in China presents the systematic use of education to achieve prosperity security and social well being This book provides a concise account of the historical events and the social religious political and other influences which have combined to create China Organized into nine chapters this book begins with an overview of China s historical background to understand the struggle and aspirations of the Chinese people This text then examines the type of economic and social structure in China s rural areas since 1958 which has been known as the People s Commune Other chapters consider the social technological and international change in China This book discusses as well the establishment of the educational system in the People s Republic of China The final chapter deals with the characteristics of the Chinese society This book is intended to be suitable for students of sociology government and politics as well as education **The National Union Catalogs, 1963-** ,1964
