Perilous Passage Mankind And The Global Ascendancy Of Capital:

Perilous Passage Amiya Kumar Bagchi, 2005 In this innovative and ambitious global history distinguished economic historian Amiya Kumar Bagchi traces the global history of human change and survival under the sway of capitalism since the voyages of Columbus Writing with extraordinary range and depth he offers a critical analysis of the history and human costs and consequences of development in Europe and North America and in major regions such as India China Japan and Africa Bagchi critically characterizes the emergence and operation of capitalism as a system driven by wars over resources and markets rather than one that genuinely operates on the principle of free markets His unflinching examination of the human toll in the periphery as well in the core nations includes not only economic processes and issues of inequality within and among nations but also the intertwining of economics and war making on a world scale Bagchi s compelling vision will change the ways in which we think about many of the largest issues in the world history and development over the past 500 years

argue their own position concerning the dynamics of the peasantry in relation to capitalism state class and imperialism Further the text aims to answer the agrarian question more widely focusing on agrarian society and the political role of the peasantry in contested transitions to capitalism and to modes beyond capitalism This requires the authors argue an analysis of class struggle and of the resources material and discursive that different classes can bring to bear on this struggle Based on well founded theoretical premises the book focuses on the contested rise of capitalism in the global North the development of core periphery relations in the global political economy and the place of the peasantry in these dynamics The book presents case studies of transitions to agrarian capitalism in the British Isles France Germany Japan and the USA The book will be of great interest to students and researchers in the areas of peasant studies rural politics agrarian studies development and political ecology

A Theory of Imperialism Utsa Patnaik,Prabhat Patnaik,2016-11-01 In A Theory of Imperialism economists Utsa Patnaik and Prabhat Patnaik present a new theory of the origins and mechanics of capitalism that sounds an alarm about its ongoing viability Their theory centers on trade between the core economies of the global North and the tropical and subtropical countries of the global South and considers how the Northern demand for commodities such as agricultural products and oil from the South has perpetuated and solidified an imperialist relationship The Patnaiks explore the dynamics of this process and discuss innovations that could allow the economies of the South to achieve greater prosperity without damaging the economies of the North The result is an original theory of imperialism that brings to light the crippling limitations of neoliberal capitalism A Theory of Imperialism also includes a response by David Harvey who interprets the agrarian system differently and sees other factors affecting trade between the North and the South Their debate is one of the most provocative exchanges yet over the future of the global economy as resources grow thin populations explode and universal prosperity becomes ever more elusive

[Ending the Crisis of Capitalism Or Ending Capitalism?](#) Samir Amin, 2010-11-25 The factors that brought about the 2008 financial collapse are examined in this analysis that explores the systemic crisis of capitalism after two decades of neoliberal globalization Samir Amin lays bare the relationship between dominating oligopolies and the globalization of the world economy and argues that the current crisis is a profound crisis of the capitalist system itself bringing forward an era in which wars and perhaps revolutions will once again shake the world The author examines the threat to the plutocracies of the United States Europe and Japan from decisions of recent G20 meetings and analyzes these powers attempts to get back to the pre 2008 system and to impose their domination on the peoples of the South through intensifying military intervention by using institutions such as NATO An alternative strategy which by building on the advances made by progressive forces in Latin America would allow for a more humane society through both the North and the South working together is proposed

Theory is History Samir Amin, 2013-12-12 This book focuses on a central concept that Theory is History as the theory of capitalism can only be formulated on the basis of an analysis of its history In contrast bourgeois thinking replaces the analysis of historical capitalism with an abstract theory without any links to reality Economics which is the theory of an imaginary system then becomes an apologia intended to give legitimacy to the behaviour of the owners of capital The author pays special attention to the globalization of the law of

value The individual chapters illustrate the author's thesis by focusing on the links between capital and land ownership between modernity and religious interpretation and on questions of the global expansion of capitalism particularly the ways it has evolved in certain countries in this case Russia and China This anthology supplements the author's previous work centred on the rise of the South his reading of capitalism focusing on its imperialist nature Challenging Health Economics Gavin Mooney, 2009-01-22 This book mounts a critique of current health economics and provides a better way of looking at the economics of health and health care It argues that health economics has been too dominated by the economics of health care and has largely ignored the impact of poverty inequality poor housing and lack of education on health It is suggested that some of the structural issues of economies particularly the individualism of neo liberalism which is becoming more and more pervasive across the globe need to be addressed in health economics The author instead proposes a form of collective decision making through communitarianism placing value on participation in public life and on institutions such as health care It is envisaged this form of decision making can be used at the local national or global levels For the last this would mean a major revamp of global institutions like the World Bank and the IMF Examples of the impact of the new paradigm on health policy in general but also more specifically on priority setting and equity are included International Law and World Order B. S. Chimni, 2017-05-25 This book offers a critique of the principal contemporary approaches to international law alongside its own novel perspectives **Reclaiming Archaeology** Alfredo González-Ruibal, 2013-08-21 Archaeology has been an important source of metaphors for some of the key intellectuals of the 20th century Sigmund Freud Walter Benjamin Alois Riegl and Michel Foucault amongst many others However this power has also turned against archaeology because the discipline has been dealt with perfunctorily as a mere provider of metaphors that other intellectuals have exploited Scholars from different fields continue to explore areas in which archaeologists have been working for over two centuries with little or no reference to the discipline It seems that excavation stratigraphy or ruins only become important at a trans disciplinary level when people from outside archaeology pay attention to them and somehow dematerialize them Meanwhile archaeologists have been usually more interested in borrowing theories from other fields rather than in developing the theoretical potential of the same concepts that other thinkers find so useful The time is ripe for archaeologists to address a wider audience and engage in theoretical debates from a position of equality not of subalternity Reclaiming Archaeology explores how archaeology can be useful to rethink modernity's big issues and more specifically late modernity broadly understood as the 20th and 21st centuries The book contains a series of original essays not necessarily following the conventional academic rules of archaeological writing or thinking allowing rhetoric to have its place in disclosing the archaeological In each of the four sections that constitute this book method time heritage and materiality the contributors deal with different archaeological tropes such as excavation surface depth genealogy ruins fragments repressed memories and traces They criticize their modernist implications and rework them in creative ways in order to show the

power of archaeology not just to understand the past but also the present Reclaiming Archaeology includes essays from a diverse array of archaeologists who have dealt in one way or another with modernity including scholars from non Anglophone countries who have approached the issue in original ways during recent years as well as contributors from other fields who engage in a creative dialogue with archaeology and the work of archaeologists

Nation Branding in Non-Western Societies Shantanu Chakrabarti, 2025-02-03 A country's stature in global politics is often determined by its popular image and public perceptions as reflected in global media While nation branding as a term and a tool of analysis in Social Sciences has emerged prominently since the 1990s the practice of positive projection of states regions and locality along with non state institutions has deeper historical roots Apart from nation branding the cultural turn in International Relations has led to popularisation of analytical concepts like soft power and civilisation or civilisational states The present work focuses on two of these concepts nation branding and civilisation state and traces the historical process of evolution in Indian nation building project It analyses the evolving concept of civilisation state and its association with the strong urge for autonomy along with the self perception of national and cultural greatness shared by the Indian elite leading to a search for identity and recognition of the intra regional and extra regional linkages in terms of shared cultural and historical identity It also looks into the process of continuity from independence to present times and to what extent this has influenced Indian elite thinking and conceptualisation of India's status in global affairs Print edition not for sale in South Asia India Sri Lanka Nepal Bangladesh Pakistan and Bhutan

Indian Economy: Reforms and Development Pradip Kumar Biswas, Panchanan Das, 2019-08-09 The book presents a comprehensive study of the impact of policy reforms on output employment and productivity growth across sectors of India since 1991 It showcases varied responses from different sectors as they faced different degrees of policy interventions and challenges or opportunities as regards markets technology and availability of skills and other complementary resources The book also discusses the contributions of the service sector on India's GDP and employment The book throws light on the phenomena of rising inequality and persistent poverty which continues to shadow and be a hallmark of post reform India despite high economic growth It underlines the failure of these reforms to bring about major change in social and economic organizations and institutions The book's contents stress on the criticality of addressing these issues as they have a serious potential of jeopardizing the country's ability to maintain high growth momentum With these pertinent topics the book would be of interest not only to the research community but also to policy makers and practitioners of various sectors addressed here

Foreign Policy of Colonial India Sneha Mahajan, 2018-03-20 The foreign policy of a colonial country is very different from that of a sovereign country Two features of the foreign policy of colonial India were one that it was framed in the interest of Britain and two that till the very end the British showed an unflinching determination to maintain their hold on India This book highlights the weight and significance of India in global affairs because of its huge size richness of resources and geostrategic and relational positioning After independence India inherited

a whole set of notions and practices from the colonial past especially treaty arrangements with smaller neighbours the nature of interactions with its extended neighbourhood unresolved border disputes in the north and the imperatives of ensuring India's security both on its land and maritime frontiers In the twenty first century also as a rising India reconstructs its foreign policy some of the themes of the foreign policy of colonial India demand far greater attention This book provides a model for studying the foreign policies of colonies in the global south Covering the last fifty years of British rule in India it focuses on the relations of the Government of India with states along the territorial rim of Britain's Indian Empire and the regions along the routes that connect Britain with India Scholars have written hundreds of books on the foreign policy of India since 1947 But during the last fifty years virtually no general book has appeared on the period before 1947 This pioneering work aims at filling this hole It will be of interest to journalists and academics in the fields of modern history political science international relations and colonial history of India and South Asia

Decolonizing Feminist Economics Gisela Carrasco-Miró, 2025-03-28 Despite the urgency to understand how other cultures encounter the West in academic and political spheres feminist economics has yet to tackle critiques from postcolonial and decolonial feminists about Western centric modernism in the field This book introduces a decolonizing approach to feminist economics offering insights that move beyond the boundaries of modern Eurocentrism The author explores the relationship between colonialism capitalism heteropatriarchy and ecological degradation while offering critical feminist and decolonizing tools By investigating global struggles the author illuminates our hijacked present and imagines a decolonizing feminist economic landscape that is under transformation Transdisciplinary and innovative this book fills a vital gap by exploring the interplay between decolonization and feminist economics challenging the growth logic capitalism and Western centrism and imagining new possibilities for more just futures
