On the Move to Meaningful Internet Systems 2004: OTM 2004 Workshops Zahir Tari, Angelo Corsaro, 2004-10-14 A special mention for 2004 is in order for the new Doctoral Symposium Workshop where three young postdoc researchers organized an original setup and formula to bring PhD students together and allow them to submit their research proposals for selection A limited number of the submissions and their approaches were independently evaluated by a panel of senior experts at the conference and presented by the students in front of a wider audience These students also got free access to all other parts of the OTM program and only paid a heavily discounted fee for the Doctoral Symposium itself In fact their attendance was largely sponsored by the other participants If evaluated as successful it is the intention of the General Chairs to expand this model in future editions of the OTM conferences and so draw in an audience of young researchers to the OnTheMove forum All three main conferences and the associated workshops share the distributed aspects of modern computing systems and the resulting application pull created by the Internet and the so called Semantic Web For DOA 2004 the primary emphasis stayed on the distributed object infrastructure for ODBASE 2004 it was the knowledge bases and methods required for enabling the use of formal semantics and for CoopIS 2004 the main topic was the interaction of such
