And by focusing on approaches rather than simply reviewing available hardware and software, the book provides you with background knowledge that makes it easier for you to successfully incorporate online learning into the classroom. Technology in Social Work Education and Curriculum examines using instructional technology to emotionally engage students in the learning process, using digital video and qualitative data analysis software to teach group practice, the role technology plays in advocacy, distance education, technologies in policy education, incorporating Web assisted learning into a traditional classroom, setting the advantages of distance education over more conventional approaches, a model for planning the use and integration of computer technology in schools of social work, how the behaviors of computer consultants can affect the students who seek their help, using innovation diffusion theory in technology planning and much more.
