

The background of the entire cover is a photograph of an industrial facility, likely an oil refinery or chemical plant. In the center, a tall smokestack is emitting a large, billowing plume of dark smoke that rises into the sky. Within the lower part of this smoke plume, there is a bright, multi-colored fire or flare, showing hues of orange, yellow, and red. The sky is a clear, pale blue. In the foreground, the silhouettes of various industrial structures, including other smokestacks and distillation columns, are visible against the horizon. The overall tone is somber and industrial, emphasizing the environmental impact of fossil fuel processing.

Riding The Dragon Royal Dutch Shell The Fossil Fire:

Riding the Dragon Jack Doyle, 2002 Diamond Steve Lerner, 2006-02-17 The story of how a mixed income minority community in Louisiana's Chemical Corridor fought Shell Oil and won For years the residents of Diamond Louisiana lived with an inescapable acrid metallic smell the toxic bouquet of pollution and a mysterious chemical fog that seeped into their houses They looked out on the massive Norco Industrial Complex a maze of pipelines stacks topped by flares burning off excess gas and huge oil tankers moving up the Mississippi They experienced headaches stinging eyes allergies asthma and other respiratory problems skin disorders and cancers that they were convinced were caused by their proximity to heavy industry Periodic industrial explosions damaged their houses and killed some of their neighbors Their small African American mixed income neighborhood was sandwiched between two giant Shell Oil plants in Louisiana's notorious Chemical Corridor When the residents of Diamond demanded that Shell relocate them their chances of success seemed slim a community with little political clout was taking on the second largest oil company in the world And yet after effective grassroots organizing unrelenting fence-line protests seemingly endless negotiations with Shell officials and intense media coverage the people of Diamond finally got what they wanted money from Shell to help them relocate out of harm's way In this book Steve Lerner tells their story Around the United States struggles for environmental justice such as the one in Diamond are the new front lines of both the civil rights and the environmental movements and Diamond is in many ways a classic environmental justice story a minority neighborhood faced with a polluting industry in its midst fights back But Diamond is also the history of a black community that goes back to the days of slavery In 1811 Diamond then the Trepagnier Plantation was the center of the largest slave rebellion in United States history Descendants of these slaves were among the participants in the modern day Diamond relocation campaign Steve Lerner talks to the people of Diamond and lets them tell their story in their own words He talks also to the residents of a nearby white neighborhood many of whom work for Shell and have fewer complaints about the plants and to environmental activists and Shell officials His account of Diamond's 30 year ordeal puts a human face on the struggle for environmental justice in the United States *The World Through Our Eyes* Brigitta Natasha

Hanshaw, 2003-09-29 Since the end of the Cold War the world has become a different and increasingly volatile place where our lives are ever more intertwined with the lives of others around the globe a world of rising terrorism of clashing cultures and religions of expanding multi-national corporations of economic volatility environmental damage and much much more These changes have brought rise to problems that we can no longer push aside A new generation of international students brought together by arguably the top two international student conferences in the world the ISC Symposium and the World Business Dialogue seek to spark discourse and action to confront and address these problems In *The World through Our Eyes* students voice their concerns and pose potential solutions A world's eye view from an insider's perspective these unique viewpoints range from an essay on Swiss banking by a Swiss banker to a history of women in India by an Indian woman to

poverty in Kenya by a Kenyan national **Lifeblood** Matthew T. Huber,2013-08-01 If our oil addiction is so bad for us why don't we kick the habit Looking beyond the usual culprits Big Oil petro states and the strategists of empire Lifeblood finds a deeper and more complex explanation in everyday practices of oil consumption in American culture Those practices Matthew T Huber suggests have in fact been instrumental in shaping the broader cultural politics of American capitalism How did gasoline and countless other petroleum products become so central to our notions of the American way of life Huber traces the answer from the 1930s through the oil shocks of the 1970s to our present predicament revealing that oil's role in defining popular culture extends far beyond material connections between oil suburbia and automobility He shows how oil powered a cultural politics of entrepreneurial life the very American idea that life itself is a product of individual entrepreneurial capacities In so doing he uses oil to retell American political history from the triumph of New Deal liberalism to the rise of the New Right from oil's celebration as the lifeblood of postwar capitalism to increasing anxieties over oil addiction Lifeblood rethinks debates surrounding energy and capitalism neoliberalism and nature and the importance of suburbanization in the rightward shift in American politics Today Huber tells us as crises attributable to oil intensify a populist clamoring for cheap energy has less to do with American excess than with the eroding conditions of life under neoliberalism **The Offshore Imperative** Tyler Priest,2009-10-12 After World War II the discovery and production of onshore oil in the United States faced decline As a result offshore prospects in the Gulf of Mexico took on new strategic value Shell Oil Company pioneered many of the early moves offshore and continues to lead the way into deepwater Tyler Priest's study is the first time the modern history of Shell Oil has been told in any detail Drawing on interviews with Shell retirees and many other sources Priest relates how the imagination talent and hard work of personnel at all levels shaped the evolution of the company The narrative also covers important aspects of Shell Oil's corporate evolution but the company's pioneering steps into the deepwater fields of the Gulf of Mexico are its signature achievement Priest's study demonstrates that engineers did not suddenly create methods for finding and producing oil and gas from astounding water depths Rather they built on a half century of accumulated knowledge and improvements to technical systems Shell Oil's story is unique but it also illuminates the modern history of the petroleum industry As Priest demonstrates this company's experiences offer a starting point for examining the understudied topics of strategic decision making scientific research management of technology and corporate organization and culture within modern oil companies as well as how these activities applied to offshore development tells a dramatic story of imaginative businessmen and engineers who propelled Shell forward in the search for ways to locate and recover oil from the depths of the sea Southwestern Historical Quarterly This book's narrative is sustained throughout by easily understood explanations of the technical details of drilling and production Journal of Southern History Fragile World William T. Global Exchanges and Gender Perspectives in Africa Jean-Bernard Ouédraogo, Roseline M. Achieng', 2011 The global perspectives adopted in this volume by the authors from different academic disciplines and social experiences ought not to be locked in sterile linearity which within process of globalisation would fail to perceive the irreversible opening up of the worlds of the south There is the need within the framework of the analyses presented here to quite cogently define the sense of the notion of the market The market here does not refer to saving or the localised exchange of goods a perspective which is imposed by normative perceptions In fact a strictly materialistic reading of exchange would be included since every social practice and interaction implies a communitarian transaction meanwhile the exchange system under study here broadens to root out the obligation of the maximisation of mercantile profit from the cycle of exchange Trade here would have a meaning closer to those of old one of human interaction in a way that one could also refer to *bon commerce* between humans In one way trade places itself at the heart of social exchanges included the power of money and is carried along by a multitude of social interactions The reader is called upon to take into account the major mercantile formations of the social trade system the market society without forgetting the diversity of exchange routes as well as the varying modalities of social construction at the margins and within market logics those of implicit value in trade between humans which the texts herein also seek to review The age old project of restructuring the domestic economy the market society as it has developed in the West whence it has set out to conquer the whole wide world places at the very centre of the current capitalist expansion the challenge of imperatively reshaping gender identity inter alia in market relations

The Cultures of Economic Migration Tope Omoniyi, 2016-03-16 This volume explores the processes of economic migration the social conditions that follow it and the discourses that underlie research into it Reflecting critically on economic migration and on the process of studying and creating knowledge about it the contributors address the question of whether recent enquiries into modernity bring a newer and better comprehension of the nature of dislocation and movement or whether these serve simply to replicate familiar

modes of placing people and individuals The book is organized into perspectives in and on specific continents Europe Asia and Africa in order to explore notions regarding economic migration within and across regions as well as towards displacing the Eurocentrism of many studies of migration

Toxic Communities Dorceta Taylor, 2014-06-20 Uncovers the systemic problems that expose poor communities to environmental hazards From St Louis to New Orleans from Baltimore to Oklahoma City there are poor and minority neighborhoods so beset by pollution that just living in them can be hazardous to your health Due to entrenched segregation zoning ordinances that privilege wealthier communities or because businesses have found the paths of least resistance there are many hazardous waste and toxic facilities in these communities leading residents to experience health and wellness problems on top of the race and class discrimination most already experience Taking stock of the recent environmental justice scholarship Toxic Communities examines the connections among residential segregation zoning and exposure to environmental hazards Renowned environmental sociologist Dorceta Taylor focuses on the locations of hazardous facilities in low income and minority communities and shows how they have been dumped on contaminated and exposed Drawing on an array of historical and contemporary case studies from across the country Taylor explores controversies over racially motivated decisions in zoning laws eminent domain government regulation or lack thereof and urban renewal She provides a comprehensive overview of the debate over whether or not there is a link between environmental transgressions and discrimination drawing a clear picture of the state of the environmental justice field today and where it is going In doing so she introduces new concepts and theories for understanding environmental racism that will be essential for environmental justice scholars A fascinating landmark study Toxic Communities greatly contributes to the study of race the environment and space in the contemporary United States
