Rifts in Time and in the Self Cheryl Dueck, 2021-11-01 The fall of the Berlin Wall in November 1989 marked the end of East Germany's socialist regime and a new beginning for a unified German Federal Republic Cultural historians agree that the event caused one of the deepest rifts in time and thinking seen by an entire generation of Germans a rift that left its mark on the psyche of every citizen challenging notions of the personal and the political and crashing traditional understandings of the individual and the collective self In this bold rethinking of the question Cheryl Dueck goes beyond the social political and psychological discourses that Marx and Freud Foucault and Lacan viewed as the initiators of modern socialist identities to explore the literature and discourse of the quest for unity of the female subject Reading such authors as Christa Wolf Brigitte Reimann Helga K nigsdorf and Helga Schubert Dueck traces the striking fissures which run through time and through the female self haunting women within the socialist project The book shows how two generations of women writers have struggled consciously and systematically in their letters aesthetic writings and literary production to create a new language to express their own sense of self within a restrictive socialist and patriarchal system Rifts in Time and in the Self offers an unprecedented look at the reconceptualizations of the female subject during several phases of GDR history and women writers persistent attempt to carve out spaces of identity and community

Neuropolitics William E. Connolly, 2002-07-24 Why would a political theorist venture into the nexus between neuroscience and film According to William Connolly whose new book is itself an eloquent answer the combination exposes the ubiquitous role that technique plays in thinking ethics and politics By taking up recent research in neuroscience to explore the way brain activity is influenced by cultural conditions and stimuli such as film technique Connolly is able to fashion a new perspective on our attempts to negotiate and thrive within a deeply pluralized society whose culture and economy continue to quicken In Neuropolitics Connolly draws upon recent brain body research to explore the creative potential of thinking the layered character of culture the cultivation of ethical sensibilities and the critical role of technique in all three He then shows how a series of films including Vertigo Five Easy Pieces and Citizen Kane enhances our appreciation of technique and contests the linear image of time now prevalent in cultural theory Connolly deftly brings these themes

together to support an ethos of deep pluralism within the democratic state and a politics of citizen activism across states His book is an original and rigorous study that attends to the creative possibilities of thinking in identity culture and ethics

Norma Jeane's Wishes in Time Stuart P. Coates, 2008-09-08 In the year 2040, the United States no longer exists. Instead, it's a province of the former Soviet Union which has been restored to its past glory. And each newborn child is assigned a Designation Number instead of a name. Now, forty years later, a man known only as 77241 escapes into the past in an effort to discover where the world went wrong. When 77241 comes upon footage of Norma Jeane Baker, known throughout the world as Marilyn Monroe, he becomes haunted by her face so much so that he seeks out her gravesite and begins speaking to her hologram. As oxygen bombs fall upon the former United States in a final act of destruction, 77241 escapes in a time bubble traveling back to June 1960. Once there, he seeks out Norma Jeane at a movie set. Through her, he attempts to save John F. Kennedy from his all-too-early demise, hoping to alter enough of the past to change the world's future destruction.

Join 77241 and Norma Jeane as they interact with a cast of historical characters including Kennedy Mark Twain and Abraham Lincoln as they seek to change the course of history in Norma Jeane s Wishes in Time
