Rights Of All Our Children

Rights Of All Our Children:

Who Cares for our Children? Valerie Polakow, 2007 Valerie Polakow spent a year traveling around the country listening to low income women from diverse backgrounds tell their stories of struggle resilience distress and occasional success as they encountered ongoing child care crises The resulting work is both a compelling account of the lived realities of the child care crisis and an incisive critique of public policy that points to the United States as an outlier in the international community Drawing on historical and international perspectives Polakow creates a groundbreaking analysis of child care as a human right persuasively arguing for a universal child care system Who Cares for Our Children is one of the most disturbing books I have read in a long time It should have a major impact on debates over poverty and social policy From the Foreword by Barbara Ehrenreich author of Nickel and Dimed In this beautifully written and provocative volume Polakow deftly steps aside and lets real mothers struggling against the odds to keep their families safe and sound speak for themselves about what they need This book delivers a timely message Child care should be viewed as a human right Martha F Davis Northeastern University School of Law A collection of moving and often chilling personal narratives Who Cares for Our Children is a powerful and well documented analysis of the worlds of low income families Beth Blue Swadener Arizona State University Thoroughly researched and grounded in a heartfelt sympathy for the struggles of families that face such painful choices and dilemmas in meeting the needs of their children James Garbarino Loyola University Chicago [Global Reflections on Children's Rights and the Law](#) Ellen Marrus, Pamela Laufer-Ukeles, 2021-07-22 Thirty years after the adoption of the UN Convention of the Rights of the Child this book provides diverse perspectives from countries and regions across the globe on its implementation critique and potential for reform The book revolves around key issues including progress in implementing the CRC worldwide how to include children in legal proceedings how to uphold children's various civil rights how to best assist children at risk and discussions surrounding children's identity rights in a changing familial order Discussion of the CRC is both compelling and polarizing and the book portrays the enthusiasm around these topics through contrasting and comparative opinions on a range of topics The work provides varying perspectives from many different countries and regions offering a wealth of insight on topics that will be of significant interest to scholars and practitioners working in the areas of children's rights and justice **Exploring Children's Rights** Rolf Gollob, Peter Krapf, 2007-01-01 Children should know what rights they have but they should also learn how to appreciate and to use them To achieve this schools must allow for a wide range of learning experiences in children's rights education Children understand and appreciate their rights by using them both in school and in everyday life To encourage children to do so the challenge for the teacher is to create a setting that is governed by the spirit of democracy and human rights This manual has been designed for teachers who are looking for tools to teach children's rights to students at primary schools The features of this manual include nine small projects of four lessons each for students in their first nine years of school detailed lesson instructions that

can be followed by beginners or used in teacher training a lesson plan including the key questions and key tasks in each at the beginning of each project description an approach of task based learning focusing on problem solving and learning by example which supports the pupils in conceptual learning skills training and the development of values and attitudes

Armstrong,2016-04-05 This study reviews the many different bases for wanting to preserve the environment By seeing how protagonists approach the same situation from different assumptions some of the origins of environmental conflict may be established and ways of resolving conflict can be identified There are two major issues in environmental ethics The first asks whether the problems can be solved within current approaches or require instead lifestyle changes for the whole of western civilisation The second issue concerns why the environment should be valued This review identifies a series in increasingly stronger valuations that can be identified as 1 Hedonistic we protect the environment because we like it 2 Utilitarian the environment is valuable to us 3 Consequentialist we want to preserve things for other people now or future 4 Intrinsic The environment has virtue in its own right 5 Extrinsic we value the environment because it is of

consequence to some thing else theistic a God Thirdly these insights are used to explore potential ways of resolving environmental conflicts notably by the recovery of democratic decision making at the right scale local national or even global
