Fathoming Translation as Discursive Experience Chunshen Zhu, 2021-07-28 With his positive approach to translation studies featured in this highly original volume Chunshen Zhu brings into perspective from the vantage point of translation the workings of human factors in text production interpretation and dissemination in and through translation in varying social situations This book examines a variety of key issues heatedly debated or largely neglected in the field of translation studies and beyond for example meaning making nature of the unit of translation augmentation of transitivity by modification signification of repetition and cognitive effects of syntactic iconicity by critically engaging insights from functional linguistics and philosophy of language among other fields of study These issue driven phenomenon focused and theorization oriented studies presented in eight chapters with ample exemplification and case studies form a coherent whole to bring a network of correlations between theory and practice linguistics and literature form and content information structure and communicative function intention and effect and textuality and experience to bear upon the study of translation fathoming its depths not only as a linguistic operation but more significantly as a textually accountable process of intersubjective and cross lingual sign making that facilitates humans understanding of themselves and of the world The book is therefore a useful reference for scholars teachers and postgraduate and research students who are interested in a comprehensive yet focused approach to translation as an academic subject straddling linguistics and literary cultural and social studies It will also be useful for those who would like to observe bilingualism and cross cultural communication through translation in general and translation involving the Chinese language in particular

Multiple Voices in the Translation Classroom Maria González Davies, 2004-07-15 The

main aim of this book is to provide teaching ideas that can be adapted to different learning environments and that can be used with different language combinations The pedagogical approach and the activities tasks and projects are based on Communicative Humanistic and Socioconstructivist principles the students are actively involved in their learning process by making decisions and interacting with each other in a classroom setting that is a discussion forum and hands on workshop Clear aims are specified for the activities which move from the most rudimentary level of the word to the more complicated issues of syntax and finally to those of cultural difference Moreover they attempt to synthesize various translation theories not only those based on linguistics but those derived from cultural studies as well This volume will be of interest to translation teachers to foreign language teachers who wish to include translation in their classes to graduates and professional translators interested in becoming teachers and also to administrators exploring the possibility of starting a new translation programme

Narratives of Mistranslation Denise Kripper, 2023-01-17 This book offers unique insights into the role of the translator in today's globalized world exploring Latin American literature featuring translators and interpreters as protagonists in which prevailing understandings of the act of translation are challenged and upended The volume looks to the fictional turn as a fruitful source of critical inquiry in translation studies showcasing the potential for recent Latin American novels and short stories in Spanish to shed light on the complex dynamics and conditions under which translators perform their task Kripper unpacks how the study of these works reveals translation not as an activity with communication as its end goal but rather as a mediating and mediated process shaped by the unique manipulations and motivations of translators and the historical and cultural contexts in which they work In exploring the fictional representations of translators the book also outlines pedagogical approaches and offers discussion questions for the implementation of translators narratives in translation language and literature courses *Narratives of Mistranslation* will be of interest to scholars and educators in translation studies especially those working in literary translation and translation pedagogy Latin American literature world literature and Latin American studies

Translation after Wittgenstein Philip Wilson, 2015-11-19 In this eminently readable study Philip Wilson explores the later writings of Ludwig Wittgenstein and shows how a reading of this philosophy can enable the translation theorist and the practising translator to reflect upon and improve the phenomenon of translation Wittgenstein whilst a key figure in twentieth century philosophy remains peripheral to the field of translation studies and Wilson argues that his later work because it deals with the nature of language and meaning is potentially of great significance and an awareness of this can change translation both literary and non literary Wittgenstein's life and thought is treated in the introduction where it is shown how his methods can be applied to areas outside philosophy The central three chapters of the book survey the reading of the source text for translation the writing of the target text the theorisation of the target text The author demonstrates how tools from Wittgenstein's work can be of use in translation studies the notion of the language game for example helps us to understand meaning by looking at the way that words are used and this can both help

us describe translation and suggest ways of translating A wide variety of examples and case studies is given throughout the book from both literary and non literary sources Aimed at translation studies scholars graduate students and researchers this interdisciplinary book will also be of interest to scholars of philosophy and literature □□ ,2003 Perspectives Studies in Translatology 2003 4 *Untranslatability* Duncan Large,Motoko Akashi,Wanda Józwikowska,Emily Rose,2018-07-27 This volume is the first of its kind to explore the notion of untranslatability from a wide variety of interdisciplinary perspectives and its implications within the broader context of translation studies Featuring contributions from both leading authorities and emerging scholars in the field the book looks to go beyond traditional comparisons of target texts and their sources to more rigorously investigate the myriad ways in which the term untranslatability is both conceptualized and applied The first half of the volume focuses on untranslatability as a theoretical or philosophical construct both to ground and extend the term s conceptual remit while the second half is composed of case studies in which the term is applied and contextualized in a diverse set of literary text types and genres including poetry philosophical works song lyrics memoir and scripture A final chapter examines untranslatability in the real world and the challenges it brings in practical contexts Extending the conversation in this burgeoning contemporary debate this volume is key reading for graduate students and researchers in translation studies comparative literature gender studies and philosophy of language The editors are grateful to the University of East Anglia Faculty of Arts and Humanities who supported the book with a publication grant
