Risk Assessment in Conservation Biology M.A. Burgman,S. Ferson,H.R. Akçakaya,1993-01-31 This book is a cohesive guide to the available methods that can be used in population viability analysis It is therefore extremely valuable to both the practitioner of conservation biology and the theoretical population biologist Population-Level Ecological Risk Assessment Lawrence W. Barnthouse,Jr. Munns,Mary T. Sorensen,2007-09-25 Most ecological risk assessments consider the risk to individual organisms or organism level attributes From a management perspective however risks to population level attributes and processes are often more relevant Despite many published calls for population risk assessment and the abundance of available scientific research and technical tool Theories in Ecological Risk Assessment Masashi Kamo,2023-05-04 This book introduces various mathematical models used in ecological risk assessment primarily discussing models used in hazard assessment The book aims to link ecology and conservation biology with risk assessments bringing together the knowledge of ecotoxicology and ecology for effective risk assessment The first part describes population level assessment in ecological risk assessment The chapters cover current methodologies for ecological risk assessment individual level assessment population dynamics models for population level assessment case studies mathematical models for population extinctions the derivation of mean time to extinction MTE and their case studies The second part of the book discusses the mathematical models involved in hazard assessments It introduces the method of risk assessment using species sensitivity distributions SSDs hazard assessment of metals chemical mixtures using the Michaelis Menten equation basic elements of statistics and related topics Expected readers are risk assessors in governments and public sectors students and young researchers interested in environmental science The book is made accessible and easy to follow by beginners in mathematical biology and theoretical ecology Risk Analysis in Forest Management Klaus von Gadow,2013-06-29 Due to the long term planning horizons and the great variety of natural economic and operational hazards affecting forest ecosystems uncertainty and multiple risk are typical aspects of forest management Applications of risk analysis are surprisingly rare in spite of the rich assortment of sophisticated forest planning tools that are available today The objective of this particular volume within the book series Managing Forest Ecosystems is to present state of the art research results concepts and techniques regarding the assessment and evaluation of natural hazards and the analysis of risk and uncertainty relating to forest management Various aspects of risk analysis are covered including examples of specific modelling tools The book is divided into three sections covering ecological perspectives applications in engineering and planning and methods applicable to economics and policy Ecological Risk Assessment Glenn W.
