Research and Practice in Multiple Criteria Decision Making Yacov Y. Haimes, Ralph E. Steuer, 2012-12-06 During the past two decades the consideration of multiple objectives in modeling and decision making has grown by leaps and bounds The nineties in particular have seen the emphasis shift from the dominance of single objective modeling and optimization toward an emphasis on multiple objectives The proceedings of this Conference epitomize these evolutionary changes and contribute to the important role that the field of multiple criteria decision making MCDM now plays in planning design operational management and policy decisions Of special interest are the contributions of MCDM to manufacturing engineering For example it has recently been recognized that optimal single objective solutions have often been pursued at the expense of the much broader applicability of designs and solutions that satisfy multiple objectives In particular the theme MCDM and Its Worldwide Role in Risk Based Decision Making of the XIVth International Conference on Multiple Criteria Decision Making Charlottesville Virginia USA June 8 12 1998 represents the growing importance of risk cost benefit analysis in decision making and in engineering design and manufacturing In such systems minimizing the of rare and extreme events emerges as an essential objective that risk complements the minimization of the traditional expected value of risk along with the objectives attached to cost and performance These proceedings include forty five papers that were presented at the Conference A variety of techniques have been proposed for solving multiple criteria decision making problems The emphasis and style of the different techniques largely reflect the fields of expertise of their developers
