Stakhiv, 1992 This collection contains 29 papers presented at the Fifth Engineering Foundation Conference held in Santa Barbara California November 3 8 1991 *Water Resources Engineering Risk Assessment* Jacques Ganoulis, 2013-06-29 Although many theoretical developments have been achieved in recent years the progress both in understanding and application of risk and reliability analysis in water resources and environmental engineering remains slow One of the reasons seems to be the lack of training of engineers with phenomena of statistical nature including optimum cost and benefit decisions under uncertainty This book presents in a unified and comprehensive framework the various aspects of risk and reliability in both water quantity

and quality problems The topics covered include uncertainty analysis of water quantity and quality data stochastic simulation of hydrosystems decision theory under uncertainty and case studies Methods for risk analysis of extremes in hydrology groundwater clean up river and coastal pollution as well as total risk management are presented , **Numerical Modelling of Hydrodynamics for Water Resources** Pilar Garcia Navarro, Enrique Playán, 2007-11-01 Overland flow modelling has been an active field of research for some years but developments in numerical methods and computational resources have recently accelerated progress producing models for different geometries and types of flows such as simulations of canal and river networks Flow in canals has traditionally been described using one dimensional depth averaged shallow water models but a variety of simulation techniques now facilitate the management of hydrodynamic systems providing models which incorporate complex geometry and diverse flows Much effort has gone into elaborating canal operational rules based on decision support systems with the dual aim of assuring water delivery and meeting flow control constraints In natural water courses water management problems are associated with the need to meet quality standards Numerical modelling of advection diffusion can be used to manage problems related to the movement of solutes in rivers and aquifers The analysis of solute transport is used to safeguard the quality of surface and ground water and to help prevent eutrophication Solute flow through the soil can be dynamically linked to overland flow for hydrological and agricultural applications Advances in modelling also cast new light on sediment transport in rivers exploring the complex dynamics of river bed erosion and deposition and assist in the analysis of river reservoir systems All these issues are discussed in Numerical Modelling of Hydrodynamics for Water Resources which will be useful to civil engineers applied mathematicians hydrologists and physicists Decision Support Systems VIII: Sustainable Data-Driven and Evidence-Based Decision Support Fatima Dargam, Pavlos Delias, Isabelle Linden, Bertrand Mareschal, 2018-05-15 This book constitutes the proceedings of the 4th International Conference on Decision Support Systems ICDSST 2018 held in Heraklion Greece in May 2018 The main topic of this year's conference was Sustainable Data Driven and Evidence Based Decision Support The 15 papers presented in this volume were carefully reviewed and selected from 71 submissions They were organized in topical sections named decision support systems for a sustainable society decision support systems serving the public decision support systems in management and organization and advances in decision support systems technologies and methods The EWG DSS series of International Conference on Decision Support System Technology ICDSST starting with ICDSST 2015 in Belgrade were planned to consolidate the tradition of annual events organized by the EWG DSS in offering a platform for European and international DSS communities comprising the academic and industrial sectors to present state of the art DSS research and developments to discuss current challenges that surround decision making processes to exchange ideas about realistic and innovative solutions and to co develop potential business opportunities
