Risk Taking In International Politics Prospect Theory In American Foreign Policy:

Risk-Taking in International Politics Rose McDermott, 2001 Discusses the way leaders deal with risk in making foreign policy decisions *Presidential Risk Behavior in Foreign Policy* William A. Boettcher III, 2005-04-15 Bringing together research on the situational determinants of risk propensity and on individual personality predispositions Boettcher draws on findings from political science psychology economics business and sociology to develop a Risk Explanation Framework REF to study the person in the situation Using structured focused comparison he examines six foreign policy cases from the Truman and Eisenhower administrations to explore how aspirations fears time pressures and other factors influence risk taking This is thus an important contribution to the study of international relations foreign policy decision making prospect theory and risk behavior personality theory and information processing *Prospect Theory and Foreign Policy Analysis in the Asia Pacific* Kai He, Huiyun Feng, 2013 Why does North Korea behave erratically in pursuing its nuclear weapons program Why did the United States prefer bilateral alliances to multilateral ones in Asia after World War II Why did China become nice no more military coercion in dealing with the pro independence Taiwan President Chen Shuibian after 2000 Why did China compromise in the negotiation of the Chunxiao gas exploration in 2008 while Japan became provocative later in the Sino Japanese disputes in the East China Sea North Korea's nuclear behavior U S alliance strategy China's Taiwan policy and Sino Japanese territorial disputes are all important examples of seemingly irrational foreign policy decisions that have determined regional stability and Asian security By examining major events in Asian security this book investigates why and how leaders make risky and seemingly irrational decisions in international politics The authors take the innovative step of integrating the neoclassical realist framework in political science and prospect theory in psychology Their analysis suggests that political leaders are more likely to take risky actions when their vital interests and political legitimacy are seriously threatened For each case the authors first discuss the weaknesses of some of the prevailing arguments mainly from rationalist and constructivist theorizing and then offer an alternative explanation based on their political legitimacy prospect theory model This pioneering book tests and expands prospect theory to the study of Asian security and challenges traditional expected utility based rationalist theories of foreign policy behavior *International Relations under Risk* Jeffrey D. Berejikian, 2012-02-01 The field of international relations is only now beginning to take notice of cognitive models of decision making Arguing against the trend of adopting formalistic depictions of human choice Berejikian suggests that international relations and realistic models of human decision making go hand in hand The result is a set of interconnected propositions that provide compelling new insights into state behavior Utilizing this framework he discusses the behavior of the United States and Europe in negotiating the Montreal Protocol a landmark international agreement designed to save the earth's protective ozone shield *Politics of Risk-taking* Barbara Vis, 2010 Barbara Vis is assistant professor in comparative politics at the VU University Amsterdam A Veni grant from the Netherlands Organisation of Scientific Research NWO

North Korea, Nuclear Risk-Taking, and the United States Jihwan Hwang, 2023-11-13
 Jihwan Hwang analyzes Pyongyang's nuclear policy changes over the last three decades under Kim Il Sung, Kim Jong Il, and Kim Jong Un. Why did a weaker North Korea take the risk of standing up against the much stronger U.S. with its nuclear weapons program, even escalating the crisis to the point of a war? Later, why did North Korea change its course of action amid the crisis, even though the security environment remained essentially the same? Hwang draws on the main tenets of prospect theory in international relations and argues that Pyongyang becomes either risk acceptant or risk averse toward the U.S. depending on the situation it faces. When Pyongyang perceived the status quo to be deteriorating, it framed its situation as a loss and chose a risk acceptant of confrontation to restore the status quo. Equally, when Pyongyang perceived the situation to be improving, it chose a risk averse engagement in the domain of gain. In contrast, when Pyongyang perceived an extreme loss, such as military confrontation against the United States, it would rather choose a risk averse policy to avoid the catastrophic outcome of war. The issues of risk are central to an understanding of Pyongyang's nuclear policy decision making.

Risk and Presidential Decision-making Luca Trenta, 2016-05-20
 This book aims at gauging whether the nature of US foreign policy decision making has changed after the Cold War as radically as a large body of literature seems to suggest and develops a new framework to interpret presidential decision making in foreign policy. It locates the study of risk in US foreign policy in a wider intellectual landscape that draws on contemporary debates in historiography, international relations, and Presidential studies. Based on developments in the health and environment literature, the book identifies the President as the ultimate risk manager, demonstrating how a President is called to perform a delicate balancing act between risks on the domestic political side and risks on the strategic international side. Every decision represents a risk vs. risk trade-off in which the management of one target risk leads to the development of countervailing risks. The book applies this framework to the study of three major crises in US foreign policy: the Cuban Missile Crisis, the seizure of the US Embassy in Tehran in 1979, and the massacre at Srebrenica in 1995. Each case study results from substantial archival research and over twenty interviews with policymakers and academics, including former President Jimmy Carter and former Senator Bob Dole. This book is ideal for postgraduate researchers and academics in US foreign policy, foreign policy decision making, and the US Presidency, as well as Departments and Institutes dealing with the study of risk in the social sciences. The case studies will also be of great use to undergraduate students.

Handbook of Public Policy B. Guy Peters, Jon Pierre, 2006-07-20
 The new handbook by Peters and Pierre provides an invaluable addition to the literature. It offers new scholars and practitioners a means to navigate many of the complex theoretical and practical issues in contemporary policy analysis. Mark Considine, University of Melbourne. The public policies of governments affect the lives and livelihoods of citizens every day in every country around the world. This handbook provides a comprehensive review and guide to the study, theory, and practice of public policy today. Section One: Making Policy introduces the policy making process, the means by which public policies are formulated, adopted,

and implemented and serves to review the many competing conceptualizations within the field Section Two Substantive Policy Areas focuses on a number of substantive policy areas to consider both diversity and commonalities across different sectoral policy areas Section Three Evaluating Public Policy addresses issues of policy analysis more directly and assesses successes and failures in public policy in an attempt to answer the question what is good policy The concluding chapter considers the different disciplinary contributions to the research and study of public policy both retrospectively and prospectively Drawing contributions from leading academics and policy analysts from around the world the handbook illustrates the changing role of governments vis vis the public and private sector and the different policy actors national and international governmental and non governmental involved in the policy making process It will be an essential companion for all advanced undergraduates graduates academics and practitioners across public policy and public administration public management government and political science

Women as Wartime Rapists Laura Sjoberg, 2016-11-22 Women as Wartime Rapists reveals the stories of female perpetrators of sexual violence and their place in wartime conflict legal policy and the punishment of sexual violence Very few women are wartime rapists Very few women issue commands to commit sexual violence Very few women play a role in making war plans that feature the intentional sexual violation of other women This book is about those very few women More broadly Laura Sjoberg asks what do the actions and perceptions of female perpetrators of sexual violence reveal about our broader conceptions of war violence sexual assault and gender This book explores specific historical case studies such as Nazi Germany Serbia the contemporary case of ISIS and others to understand how and why women participate in rape during war and conflict Sjoberg examines the contrast between the visibility of female victims and the invisibility of female perpetrators as well as the distinction between rape and genocidal rape which is used as a weapon against a particular ethnic or national group Further she explores women's engagement with genocidal rape and how some orchestrated the ethnic cleansing of entire regions A provocative approach to a sensationalized topic Women as Wartime Rapists offers important insights into not only the topic of female perpetrators of wartime sexual violence but to larger notions of gender and violence with crucial cultural legal and political implications

Behavioral Economics and Nuclear Weapons Anne I. Harrington, Jeffrey W. Knopf, 2019-08-15 Recent discoveries in psychology and neuroscience have improved our understanding of why our decision making processes fail to match standard social science assumptions about rationality As researchers such as Daniel Kahneman Amos Tversky and Richard Thaler have shown people often depart in systematic ways from the predictions of the rational actor model of classic economic thought because of the influence of emotions cognitive biases an aversion to loss and other strong motivations and values These findings about the limits of rationality have formed the basis of behavioral economics an approach that has attracted enormous attention in recent years This collection of essays applies the insights of behavioral economics to the study of nuclear weapons policy Behavioral economics gives us a more accurate picture of how people think and as a consequence of how they make

decisions about whether to acquire or use nuclear arms Such decisions are made in real world circumstances in which rational calculations about cost and benefit are intertwined with complicated emotions and subject to human limitations Strategies for pursuing nuclear deterrence and nonproliferation should therefore argue the contributors account for these dynamics in a systematic way The contributors to this collection examine how a behavioral approach might inform our understanding of topics such as deterrence economic sanctions the nuclear nonproliferation regime and U S domestic debates about ballistic missile defense The essays also take note of the limitations of a behavioral approach for dealing with situations in which even a single deviation from the predictions of any model can have dire consequences
