Rousseau, Kant and Goethe Ernst CASSIRER, 1963 **Rousseau, Kant, Goethe, Two Essays by Ernst Cassirer** Ernst Cassirer, 1945 **Rousseau, Kant, Goethe** Ernst Cassirer, James Gutmann, 1947 *Kant and the Creation of Freedom*

Christopher J. Insole, 2013-05-31 Kant actively struggles with the problem of how to conceive of God's creative action in relation to human freedom He comes to the view that human freedom can only be protected if God withdraws in certain ways from the created world The two pillars of Kant's mature philosophy transcendental idealism and freedom are in part shaped and motivated by Kant's need to provide a solution to his theological problem The medieval and early modern theological tradition conceives of divine action as unlike the action of any created being When the creature acts God directly causes this action but without reducing the creature's freedom Kant explicitly discusses and rejects this account of divine and human concursus This rejection has significant and surprising ramifications for Kant's wider philosophy explaining otherwise incomprehensible claims in his critical philosophy Christopher J Insole presents a definitive study in the history of ideas engaging with a wide range of Kant's texts from 1749 until the early 1800s Many of these texts have received little or no attention in Kant studies to date Insole places Kant's thought in relation to numerous historical and traditional positions and illuminates these positions by a close engagement with recent debates in analytical philosophy and systematic theology Kant is unrelentingly honest when grappling with the difficulty of relating divine and human freedom This study of Kant's theological struggle and legacy goes to the heart of the problem in the modern reception of what the Christian tradition has affirmed about human freedom As such the book throws light on one of the defining fault lines in modern theology and philosophy **History of Political Thought** Jeffrey Bercuson, 2020-11-17 A History of Political Thought analyses market society by surveying the ideas of its most perceptive thought provoking observers critics and defenders from ancient Greece to the present day Hegel, Kant and the Structure of the Object Robert Stern, 2002-09-11 Hegel's holistic metaphysics challenges much recent ontology with its atomistic and reductionist assumptions Stern offers us an original reading of Hegel and contrasts him with his predecessor Kant Being as Symbol Stephen M. Fields, 2000-12-13 One of the most important theologians of the modern era Karl Rahner is best known for his efforts to make Christianity credible in light of the

intellectual questions of modern culture Stephen M Fields SJ now explains how Rahner developed his metaphysics as a creative synthesis of Thomism and the modern philosophical tradition Focusing on Rahner s core concept of the Realsymbol which posits all beings as symbolic Fields establishes the place of the Realsymbol in philosophical theories of the symbol He particularly concentrates on those key aspects of Rahner s metaphysics his theories of finite realities and language that have received insufficient attention By examining a wide range of Rahner s works in the context of twelve medieval modern and contemporary thinkers Fields locates the origins of this seminal thinker s metaphysics to an extent never before attempted He notes the correlations that exist between the Realsymbol and such work as Aquinas s theory of the sacraments Goethe s and Hegel s dialectics Moehler s view of religious language and Heidegger s aesthetics Through this analysis Fields reveals the structural core of Rahner s metaphysics and shows how art language knowledge religious truth and reality in general are all symbolic Being as Symbol opens new perspectives on this important thinker and positions him in the broader spectrum of philosophical thought

*English Literature, Volume 2* Louis A. Landa,2015-12-08 Two volumes containing the annual bibliographies of 18th century scholarship published in the *Philological Quarterly* An excellent aid to the student of 18th century literature *Saturday Review* Volume 2 1939 1950 includes consolidated index for both volumes Originally published in 1952 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

**Retrieving Liberalism from Rationalist Constructivism, Volume I** Walter B. Weimer,2022-05-07 This first volume *History and its Betrayal* traces the development of major themes of liberalism from the increase in human population beyond the limits of the face to face society of tribalism and small groups up until the present day It shows that the principles underlying liberalism are the evolutionary development of social organizations that have resulted from the complexity of human action rather than any conscious design or purpose This book draws out the differences between the classical liberalism dependent upon spontaneous and tacit ordering as a result of evolution and the explicit or conscious or directed version of progressivism It shows that the most important recent developments in the philosophy of rationality and the methodology of scientific research as well as in evolutionary epistemology and the philosophy of biology actually stem from the theories of complex social organization of the moralists such as Hume Ferguson and Smith The book shows clearly that classical liberalism was never refuted indeed no attempt to do so has been offered it has simply been ignored in favour of programs which sound beneficial and soothing but which cannot be instituted without returning to tribalism

**Modernism, Nationalism, and the Novel** Pericles Lewis,2000-04-24 In *Modernism Nationalism and the Novel* first published in 2000 Pericles Lewis shows how political debates over the sources and nature of national

character prompted radical experiments in narrative form amongst modernist writers Though critics have accused the modern novel of shunning the external world Lewis suggests that far from abandoning nineteenth century realists concern with politics the modernists used this emphasis on individual consciousness to address the distinctively political ways in which the modern nation state shapes the psyche of its subjects Tracing this theme through Joyce Proust and Conrad amongst others Lewis claims that modern novelists gave life to a whole generation of narrators who forged new social realities in their own images Their literary techniques multiple narrators transcriptions of consciousness involuntary memory and arcane symbolism focused attention on the shaping of the individual by the nation and on the potential of the individual in time of crisis to redeem the nation Colonialism, World Literature, and the Making of the Modern Culture of Letters Baidik Bhattacharya, 2024-02-08 This book is a radical reimagination of the idea of the literary through colonial histories and world literature

**A Primer on German Enlightenment** Sabine Roehr, 1995 A translation into English of the work of late German Enlightenment thinker Karl Leonhard Reinhold 1757 1823 best known for his interpretations of Kant and whose writings on theoretical philosophy were significant for the development of philosophy after Kant Roehr prefaces the translation with an approximately 150 page analysis of the relevant moral religious political and philosophical thought of the German Enlightenment Annotation copyright by Book News Inc Portland OR

**Tradition and the Deliberative Turn** Ryan R. Holston, 2023-03-01 This book changes the narrative regarding democratic deliberation It does so by bringing to bear insights into the nature of morality and discourse associated with one of the twentieth century s foremost philosophers of history Hans Georg Gadamer Tradition and the Deliberative Turn thus reframes the discussion about deliberative democracy with a robust historical sensibility which has largely been missing from this conversation Gadamer s rehabilitation of tradition shows how the concrete ethical life does not merely occlude but also facilitates moral understanding providing a particular vantage point from which we perceive the world What other scholars have overlooked is that such a perspective is therefore always limited Drawing on Gadamer s practical philosophy an underappreciated element in his corpus Ryan R Holston argues for the need to cultivate these historically rooted and local relationships and the shared meanings to which they give life

*Karl Marx* Allan Megill, 2001-12-11 Why did Karl Marx want to exclude politics and the market from his vision of a future socialism In *Karl Marx The Burden of Reason* Allan Megill begins with this question Megill s examination of Marx s formative writings casts new light on Marx s relation to philosophy and reveals a hitherto largely unknown rationalist Marx In demonstrating how Marx s rationalism permeated his attempts to understand politics economics and history generally Megill forces the reader to rethink Marx s entire intellectual project While Megill writes as an intellectual historian and historian of philosophy his highly original redescription of the Marxian enterprise has important implications for how we think about the usability of Marx s work today *Karl Marx The Burden of Reason* will be of interest to those who wish to reflect on the fate of Marxism during the era of Soviet Communism It will also be of interest to those who wish to discern what is

living and what is dead what is adequate and what requires replacement or supplementation in the work of a figure who in spite of everything remains one of the greatest philosophers and social scientists of the modern world     *The Ethics of Our Climate* William R. O'Neill,1994 The three parts of the book treat the eclipse of the classical Aristotelian conception of practical reason the Kantian heritage in the modern moral theories of John Rawls and R M Hare and the hermeneutical retrieval of a moral interpretation of the world     Toward a Premodern Posthumanism Chad Augustine Córdova,2025-04-15 Drawing on early modern French thought to free nature and aesthetics from metaphysical humanism What good is aesthetics in a time of ecological crisis Toward a Premodern Posthumanism Anarchic Ontologies of Earthly Life in Early Modern France shows that philosophical aesthetics contains unheeded potentialities for challenging the ontological subjection of nature to the human subject Drawing on deconstructive ecological and biopolitical thought Chad C rdova uncovers in aesthetics something irreducible to humanist metaphysics an account of how beings emerge and are interrelated responsive and even response able without reason or why This anarchic and atelic ontology recovered from Kant becomes the guiding thread for a new premodern trajectory of posthumanism Charting a path from Aristotle to Heidegger to today s plant thinking with new readings of Montaigne Pascal Diderot Rousseau and others along the way this capacious study reveals the untimely relevance of pre 1800 practices of writing science and art Enacting a multitemporal mode of reading C rdova offers a defense and illustration of the importance of returning to early modern texts as a way to rethink nature art ethics and politics in a time when these concepts are in flux and more contentious than ever     **The Neo-Kantian Reader** Sebastian Luft,2024-11-01 The latter half of the nineteenth and the early part of the twentieth century witnessed a remarkable resurgence of interest in Kant s philosophy in Continental Europe the effects of which are still being felt today The Neo Kantian Reader is the first anthology to collect the most important primary sources in Neo Kantian philosophy with many being published here in English for the first time It includes extracts on a rich and diverse number of subjects including logic epistemology metaphysics philosophy of science and transcendental idealism Sebastian Luft together with other scholars provides clear introductions to each of the following sections to the authors as well as to each text placing them in historical and philosophical context the beginnings of Neo Kantianism including the work of Hermann von Helmholtz Otto Liebman Friedrich Lange and Hermann Lotze the Marburg School including Hermann Cohen Paul Natorp and Ernst Cassirer the Southwest School including Wilhelm Windelband Heinrich Rickert Emil Lask and Hans Vaihinger responses and critiques including Moritz Schlick Edmund Husserl Rudolf Carnap and the Davos dispute between Martin Heidegger and Ernst Cassirer The Neo Kantian Reader is essential reading for all students of Kant nineteenth and twentieth century philosophy history and philosophy of science and phenomenology as well as to those studying important philosophical movements such as logical positivism and analytic philosophy and its history
