Jackson, 2013-06-24 In recent decades advances in deciphering Maya hieroglyphic writing have given scholars new tools for understanding key aspects of ancient Maya society This book the first comprehensive examination of the Maya royal court exemplifies the importance of these new sources Authored by anthropologist Sarah E Jackson and richly illustrated with drawings photographs and maps Politics of the Maya Court uses hieroglyphic and iconographic evidence to explore the composition and social significance of royal courts in the Late Classic period ad 600 900 with a special emphasis on the role of courtly elites As Jackson explains the Maya region of southern Mexico and Central America was not a unified empire but a loosely aggregated culture area composed of independent kingdoms Royal courts had a presence in large central communities from Chiapas to Yucatan and the highlands of Guatemala and western Honduras Each major polity was ruled by a k'uhul ajaw or holy lord who embodied intertwined aspects of religious and political authority The hieroglyphic texts that adorned walls furniture and portable items in these centers of power provide specific information about the positions roles and meanings of the courts Jackson uses these documents as keys to understanding Classic Maya political hierarchy and specifically the institution of the royal court Within this context she investigates the lives of the nobility and

Figurines Timothy Insoll, 2017-04-13 Figurines dating from prehistory have been found across the world but have never before been considered globally The Oxford Handbook of Prehistoric Figurines is the first book to offer a comparative survey of this kind bringing together approaches from across the landscape of contemporary research into a definitive resource in the field The volume is comprehensive authoritative and accessible with dedicated and fully illustrated chapters covering figurines from the Americas Europe Africa Asia and Australasia and the Pacific laid out by geographical location and written by the foremost scholars in figurine studies wherever prehistoric figurines are found they have been expertly described and examined in relation to their subject matter form function context chronology meaning and interpretation Specific themes that are discussed by contributors include for example theories of figurine interpretation meaning in processes and contexts of figurine production use destruction and disposal and the cognitive and social implications of representation

Chronologically the coverage ranges from the Middle Palaeolithic through to areas and periods where an absence of historical sources renders figurines prehistoric even though they might have been produced in the mid 2nd millennium AD as in parts of sub Saharan Africa The result is a synthesis of invaluable insights into past thinking on the human body gender identity and how the figurines might have been used either practically ritually or even playfully **Urbanization and**

Archaeology of Performance Takeshi Inomata, Lawrence S. Coben, 2006-03-09 Performances in the premodern communities shaped identities created meanings generated and maintained political control But unlike other social scientists archaeologists have not worked much with these concepts Archaeology of Performance shows how the notions of theatricality and spectacle are as important economics and politics in understanding how ancient communities work Without sacrificing conceptual rigor the contributors draw on the wide ranging literature on performance Without sacrificing material evidence they try to see how performance creates meaning and ideology Drawing on evidence from societies large and small

Archaeology of Performance offers an important new way of understanding ancient theaters of power Kukulcan's Realm Marilyn Masson, Carlos Peraza Lope, 2014-04-15 Kukulcan's Realm chronicles the fabric of socioeconomic relationships and religious practice that bound the Postclassic Maya city of Mayapán's urban residents together for nearly three centuries Presenting results of ten years of household archaeology at the city including field research and laboratory analysis the book discusses the social political economic and ideological makeup of this complex urban center Masson and Peraza Lope's detailed overview provides evidence of a vibrant market economy that played a critical role in the city's political and economic success They offer new perspectives from the homes of governing elites secondary administrators affluent artisans and poorer members of the service industries Household occupational specialists depended on regional trade for basic provisions that were essential to crafting industries sustenance and quality of life Settlement patterns reveal intricate relationships of households with neighbors garden plots cultivable fields thoroughfares and resources Urban planning endeavored to unite the cityscape and to integrate a pluralistic populace that derived from hometowns across the Yucatán peninsula New data from Mayapán the pinnacle of Postclassic Maya society contribute to a paradigm change regarding the evolution and organization of Maya society in general and make Kukulcan's Realm a must read for students and scholars of the ancient Maya and Mesoamerica The Origins of Maya States Loa P. Making Senses of the Past Jo Day, 2013-03-19 Since the nineteenth century museums have kept their artifacts in glass cases to better preserve them and drawings and photographs have become standard ways of presenting the past These practices have led to an archaeology dominated by visual description even though human interaction with the surrounding world involves the whole body and all of its senses In the past few years sensory archaeology has become more prominent

and *Making Senses of the Past* is one of the first collected volumes on this subject. This book presents cutting edge research on new theoretical issues. The essays presented here take readers on a multisensory journey around the world and across time. In ancient Peru a site provides sensory surprises as voices resound beneath the ground and hidden carvings slowly reveal their secrets. In Canada and New Zealand the flicker of reflected light from a lake dances on the faces of painted rocks and may have influenced when and why the pigment was applied. In Mesopotamia vessels for foodstuffs build a picture of a past cuisine that encompasses taste and social activity in the building of communities. While perfume and flowers are examined in various cultures in the chamber tombs of ancient Roman Palestine we are reminded that not all smells are pleasant. *Making Senses of the Past* explores alternative ways to perceive past societies and offers a new way of wiring archaeology that incorporates the senses.

Classic Maya Polities of the Southern Lowlands Damien B. Marken, James L. Fitzsimmons, 2015-11-02 *Classic Maya Polities of the Southern Lowlands* investigates Maya political and social structure in the southern lowlands assessing comparing and interpreting the wide variation in Classic period Maya polity and city composition development and integration. Traditionally discussions of Classic Maya political organization have been dominated by the debate over whether Maya polities were centralized or decentralized. With new largely unpublished data from several recent archaeological projects this book examines the premises strengths and weaknesses of these two perspectives before moving beyond this long standing debate and into different territory. The volume examines the articulations of the various social and spatial components of Maya polity the relationships strategies and practices that bound households communities institutions and dynasties into enduring or short lived political entities. By emphasizing the internal negotiation of polity the contributions provide an important foundation for a more holistic understanding of how political organization functioned in the Classic period.

Political Strategies in Pre-Columbian Mesoamerica Sarah Kurnick, Joanne Baron, 2016-03-21 Political authority contains an inherent contradiction. Rulers must reinforce social inequality and bolster their own unique position at the top of the sociopolitical hierarchy yet simultaneously emphasize social similarities and the commonalities shared by all. *Political Strategies in Pre-Columbian Mesoamerica* explores the different and complex ways that those who exercised authority in the region confronted this contradiction. New data from a variety of well known scholars in Mesoamerican archaeology reveal the creation perpetuation and contestation of politically authoritative relationships between rulers and subjects and between nobles and commoners. The contributions span the geographic breadth and temporal extent of pre-Columbian Mesoamerica from Preclassic Oaxaca to the Classic Peten region of Guatemala to the Postclassic Michoacan and the contributors weave together archaeological epigraphic and ethnohistoric data. Grappling with the questions of how those exercising authority convince others to follow and why individuals often choose to recognize and comply with authority *Political Strategies in Pre-Columbian Mesoamerica* discusses why the study of political authority is both timely and significant reviews how scholars have historically understood the operation of political authority and

proposes a new analytical framework to understand how rulers rule Contributors include Sarah B Barber Joanne Baron
