

A black and white photograph of a construction site. In the center, a tall crane stands amidst a complex steel framework of a building under construction. The structure features multiple levels and vertical columns. In the foreground, there is a pile of construction materials, including what appears to be a car chassis or a similar vehicle component. Two workers in hard hats are visible in the lower right corner, looking towards the site. The background shows other buildings, suggesting an urban setting.

Royal Blue, the Culture of Construction Workers Herbert A. Applebaum, 1981 Royal Blue Herbert A. Applebaum, 1979

The American Work Ethic and the Changing Work Force Herbert Applebaum, 1998-06-25 A major force in American society the work ethic has played a pivotal role in U S history affecting cultural social and economic institutions But what is the American work ethic Not only has it changed from one era to another but it varies with race gender and occupation Considering such diverse groups as Colonial craftsmen slaves 19th century women and 20th century factory workers this book provides a history of the American work ethic from Colonial times to the present Tracing both continuities and differences the book is divided into sections on the Colonial era the 19th century and the 20th century and includes chapters on both major occupational groups such as farmers factory workers laborers and gender racial and ethnic minorities This approach which covers all major groups in U S history enables the reader to discern how the work ethic applied to different occupational and ethnic groups over time The book subjects the work ethic to an analysis based on historical sociological economic and anthropological perspectives and provides an analysis of current thinking about how the work ethic applied to various groups and classes in different historical periods **Paris Under Construction** Jacob Paskins, 2015-12-07 During the 1960s building sites in Paris became spaces that expressed preoccupations about urban transformation labour immigration and national identity As new buildings and infrastructure changed the city building sites revealed the substandard living and working conditions of migrant construction workers in France Moreover construction was the touchstone in debates about the dangers of urban life and triggered action in communities whose districts faced demolition Paris Under Construction explores the social political and cultural responses to construction work and urban transformation in the Paris metropolitan region during the 1960s This examination of a decade of intensive building work considers the ways in which the experience of construction was mediated produced and reproduced through a range of complex and sometimes contradictory representations The building sites that produced the new Paris are no longer visible and were perhaps never intended to be seen yet different groups closely observed and recorded construction giving it meanings that went beyond specific building activities The research draws extensively on French newspaper television and radio archives and delves into rarely examined trade union material Paris Under Construction gives voice to the witnesses of and participants in urban transformation who are usually excluded from architectural and urban history *Preservation Education* Barry L. Stiefel, Jeremy C. Wells, 2014-09-02 Over the past twenty years there has been a fundamental shift in the institutional organization of historic preservation education Historic preservation is the most recent arrival in the collection of built environment disciplines and therefore lacks the pedagogical depth and breadth found in allied endeavors such as architecture and planning As the first degree programs in preservation only date to the 1970s and the first doctoral programs to the 1990s new faculty are confronted with pedagogical challenges that are unique to this relatively nascent field Based on

a conference that included educators from around the world Barry L Stiefel and Jeremy C Wells now present a collection that seeks to address fundamental issues of preservation pedagogy outcome based education and assessment and global issues of authenticity and significance in historic preservation The editors argue that the subject of the analysis has shifted from What is the best way to fix a historic building to What are the best ways for teaching people how to preserve historic properties and why according to the various standards that have been established This important reconsideration of the state of the field in historic preservation education will appeal to a broad audience across numerous disciplines Sociology, Work and Organisation Tony Watson, Marek Korczynski, 2011-09-19 Sociology Work and Organisation builds on the five popular and successful editions of Sociology Work and Industry The new text is outstanding in how effectively it explains the value of using the sociological imagination to understand the nature of institutions of work organisations occupations management and employment and how they are changing in the 21st century The book combines intellectual depth with accessible language and a user friendly layout It is unrivalled in the breadth of its coverage and its authoritative overview of both traditional and emergent themes in the sociological study of work and organisation It explains the basic logic of the sociological analysis of work and the way work is organised whilst also providing an appreciation of the different theoretical traditions which the subject draws upon It fully considers the direction and implication of trends in technological change globalisation labour markets work organisation managerial practices and employment relations the extent to which these trends are intimately related to changing patterns of inequality in modern societies and to the changing experiences of individuals and families the ways in which workers challenge resist and make their own contributions to the patterning of work and shaping of work institutions Key features include a new sign posting system which integrates material and brings out themes which run through the various chapters key issue guides and summaries with each chapter and the identifying of key concepts throughout the book which are then brought together in an unrivalled glossary and concept guide at the end

Occupational Subcultures in the Workplace Harrison Miller Trice,1993 In the last decade interest has returned to the study of a cultural rather than bureaucratic model of the organization Trice emeritus Cornell U School of Industrial and Labor Relations argues that essential to this study is recognition of occupations as potent subcultures which adapt and interact within the context of the organization He uses as examples a variety of occupations from pipe welders to concert pianists Paper edition unseen 16 95 Annotation copyright by Book News Inc Portland OR

The Limits of Labour David Bright,2011-11-01 In a few short decades before the First World War Calgary was transformed from a frontier outpost into a complex industrial metropolis With industrialization there emerged a diverse and equally complex working class David Bright explores the various levels of class formation and class identity in the city to argue that Calgary s reputation as a prewar centre of labour conservatism is in need of revision Bright also delineates the trials of the Calgary labour movement in the 1920s Internal divisions and dissent prevented the movement from realizing the potential strength of the working class Instead even as local capitalism restructured itself political and industrial labour organizations wilfully fragmented their own base of support In particular they failed to address the concerns and needs of the growing number of unemployed in the city a neglect that foreshadowed events of the 1930s This failure left the labour movement unable to meet the challenge of the Great Depression In part at least the demise of labour as a viable political alternative in Calgary paved the way for the rise of Social Credit Using Calgary as a model *The Limits of Labour* reasserts the need to place class formation at the heart of the development of western Canada and provides an historical context to the renewed struggle of labour for social justice in the 1990s

Inside Organizations David Gellner,Eric Hirsch,2020-05-26 Most of us work in or for one but there are surprisingly few sustained analyses of the problems and peculiarities of organizations Anthropologists are increasingly turning their attention to the study of western organizations and this timely collection addresses the pleasures and pitfalls of ethnographic research undertaken across a range of organizational contexts From museums to laboratories health clinics and multinational businesses leading anthropologists discuss their fieldwork experiences the problems they encountered and the solutions they came up with This book highlights the practical political and ethical dimensions of research in organizations Among issues vividly described are the relations between gender and politics in

organizational hierarchies How are sexual politics played out and experienced in health clinics How does a business manager's personal biography affect the relationships within the organization as a whole How are language and metaphor used to refigure the way people think about and act in organizations Institutions often have well defined procedures for bringing in visitors and guests When is the anthropologist an insider to the organization and when an outsider What ethical issues arise when researchers are caught between observing organizations and participating in their work In answering these and other questions the authors consider both the current status and future prospects for organizational ethnography Comprehensive and varied the book represents an invaluable aid to anyone interested in the politics and complexities of working life
