architects vital single source access to the unbiased information they need to evaluate select and specify the best finish materials for any job. This powerful visual resource combines hundreds of illustrations from Architectural Graphic Standards with corresponding building material performance and specification information from AIA's MASTERSPEC published by ARCOM. Use this book during the schematic and design development phases of a project and as an indispensable aid for product selection and specification. Essential for architects, interior designers and building designers, this vital reference provides information to make informed decisions about specific design goals such as affordability, environmental friendliness, durability, fire resistance and esthetic success. Features include: Unique source of independent in-depth building product performance information; the one source that gives you reliable building product information before you consult with manufacturers; Covers a full range of standard finish materials and includes selection criteria, details, typical product sizes and installation and maintenance data; Provides current standards based on research by government association and independent testing organizations as well as the input of experienced architects and specifiers. Architectural Graphic Standards has served the design community for decades as a virtual bible for architectural detailing. MASTERSPEC Evaluations have long comprised one of the best resources available for building product selection and specification. Consolidating the strong points of both into this new desktop reference is an act of sheer brilliance. Martin M. Bloomenthal, FAIA, CCS, CSI, Principal, The Hillier Group, Princeton, New Jersey.

Mallparks Michael T. Friedman, 2023-07-15 In *Mallparks* Michael T. Friedman observes that as cathedrals represented power relations in medieval towns and skyscrapers epitomized those within industrial cities, sports stadiums exemplify urban American consumption at the turn of the twenty-first century. Grounded in Henri Lefebvre and George Ritzer's spatial theories in their analyses of consumption spaces, *Mallparks* examines how the designers of this generation of baseball stadiums follow the principles of theme park and shopping mall design to create highly effective and efficient consumption sites. In his exploration of these contemporary cathedrals of sport and consumption, Friedman discusses the history of stadium design, the amenities and aesthetics of stadium spaces and the intentions and conceptions of architects, team officials and civic leaders. He grounds his analysis in case studies of Oriole Park at Camden Yards in Baltimore, Fenway Park in Boston, Dodger Stadium in Los Angeles, Nationals Park in Washington, DC, Target Field in Minneapolis and Truist Park in Atlanta.
