Wilson, A. Stewart Fotheringham, 2008-04-15 This Handbook is an essential reference and a guide to the rapidly expanding field of Geographic Information Science Designed for students and researchers who want an in depth treatment of the subject including background information Comprises around 40 substantial essays each written by a recognized expert in a particular area Covers the full spectrum of research in GIS Surveys the increasing number of applications of GIS Predicts how GIS is likely to evolve in the near future *Liquid Power* Erik Swyngedouw, 2015-05-08 An examination of the central

role of water politics and engineering in Spain s modernization illustrating water s part in forging maintaining and transforming social power In this book Erik Swyngedouw explores how water becomes part of the tumultuous processes of modernization and development Using the experience of Spain as a lens to view the interplay of modernity and environmental transformation Swyngedouw shows that every political project is also an environmental project In 1898 Spain lost its last overseas colony triggering a period of post imperialist turmoil still referred to as El Disastre Turning inward the nation embarked on regeneration and modernization Water played a central role in this during a turbulent period from the twentieth century into the twenty first through the Franco years and into the new era of liberal democracy Spain s waterscapes were completely transformed with large scale projects that ranged from dam construction to irrigation to desalinization Swyngedouw describes the contested political ecological process that marked this transformation showing that the Spain s diverse and contested paths to modernization were predicated on particular trajectories of environmental transformation After laying out his theoretical perspectives Swyngedouw analyzes three periods of Spain s political ecological modernization the aspirations and stalled modernization of the early twentieth century the accelerated efforts under the authoritarian Franco regime which included six hundred dams expanded hydroelectricity and massive irrigation and the changing hydro social landscape under social democracy Offering an innovative perspective on the relationship of nature and society *Liquid Power* illuminates the political nature of nature Critical Reflections on the Internationalisation of Higher Education in the Global South Emnet Tadesse Woldegiorgis, Cheryl Qiumei Yu, 2024-04-26 If you are involved in academia policy making or are simply curious about the complex features of internationalisation in the Global South this

work is your roadmap to deeper more critical reflections on the internationalisation of higher education **Alternative Food Politics** Michelle Phillipov, Katherine Kirkwood, 2018-12-07 Media interest in food has intensified in recent years leading to a contemporary food landscape where alternative food practices are increasingly visible Concerns that were once exclusively the domain of activist movements motivated by environmental animal rights health and anti corporate agendas are now central to primetime television cooking shows mobile apps and social media This book is the first to explore the impact of popular media and culture on contemporary food politics Through examination of a range of media and cultural texts including news digital media advertising and food labelling it brings together leading and emerging scholars in food studies media and communications sociology law policy studies business and geography The book explores the practices of alternative food movements the marketing techniques of conventional and alternative food producers and the relationships between food industries media and the public Covering topics ranging from agtech start ups and social justice projects to new ways of mediating food waste celebrity and ethical foods **Alternative Food Politics** reveals the importance of media as a driver of food system transformation This is a pivotal time for media and food industries and this book is essential reading for scholars and students seeking to better understand the futures possibilities and limits of food politics today **The Political Ecology of Agrofuels** Kristina Dietz, Bettina Engels, Oliver Pye, Achim Brunnengräber, 2014-11-20 This book explores the political ecology of agrofuels as an encompassing socio spatial transformation process consisting of a series of changing contexts political reconfigurations and the restructuring of social and labour relations It includes conceptual chapters as well as case studies from different world regions North America Europe Latin America sub Saharan Africa Asia and levels local national transnational **The Political Ecology of Agrofuels** advances a conceptualisation of agrofuels that helps to fill existing research gaps It covers global food regimes and agrarian politics as well as political arenas such as energy climate transport and trade It reflects on the biophysical materiality of agrofuels new forms of nature appropriation struggles discursive framings the building of hegemony shifting geopolitical constellations socio spatial configurations of power the construction of territory the agency of social movements and the different ways in which agrofuels are politicized at different scales This book asks how patterns of mobility emissions regulation food and energy production and consumption and social relations e g labour class and gender relations are shaped and re shaped by the materiality and representations of agrofuels in both the Global South and North The book provides tools for thinking about the diversity of the conflicts struggles and spatial socio ecological and politico economic reconfigurations and perpetuations engendered by current production and consumption patterns in the agrofuel sector **Scale-Sensitive Governance of the Environment** Frans Padt, Paul Opdam, Nico Polman, Catrien Termeer, 2014-03-10 Sensitivity to scales is one of the key challenges in environmental governance Climate change food production energy supply and natural resource management are examples of environmental challenges that stretch across scales and require action at multiple levels Governance systems are typically ill equipped for this task due to

organisational and jurisdictional specialisation and short term planning horizons Further to this scientific knowledge is fragmented along disciplinary lines and research traditions in academia and research institutions State of the art Scale Sensitive Governance of the Environment addresses these challenges by establishing the foundation for a new trans disciplinary research field It brings together and reframes a variety of disciplinary approaches using the idea of scales to create a conceptual and methodological basis for scale sensitive governance of the environment from both a natural and social science perspective This volume presents new visions methods and innovative applications of thinking and decision making across scales in space and time to develop a holistic view on the subject It is unique in providing F analysis on how spatial temporal and governance scales are constructed politically and scientifically defined institutionalized in governance practices and strategically used in policy discourses F details on how current environmental governance practices can be enriched by the use of theory on scale with specific research themes to show the benefits of recognizing scales in empirical research F insightful case studies drawn from countries in the Americas Eastern and Southern Africa Europe and South and Southeastern Asia covering a wide range of environmental topics including biodiversity climate change commodities tea and palm oil cultural landscapes energy forestry natural resource management pesticides urban development and water management With its comprehensive coverage of scale and scaling issues and convergence of widely different scientific approaches this book is essential for environmental scientists policy makers and planners also conservation biologists and ecologists who are involved in modeling climate change impacts and sustainability This reference will also benefit students of environmental studies and all those who seek a response to the urgent environmental governance challenges for the decades ahead

In the Nature of Cities Nik Heynen, Maria Kaika, Erik Swyngedouw, 2006-03-23 The social and material production of urban nature has recently emerged as an important area in urban studies human environmental interactions and social studies This has been prompted by the recognition that the material conditions that comprise urban environments are not independent from social political and economic processes or from the cultural construction of what constitutes the urban or the natural Through both theoretical and empirical analysis this groundbreaking collection offers an integrated and relational approach to untangling the interconnected processes involved in forming urban landscapes The essays in this book attest that the re entry of the ecological agenda into urban theory is vital both in terms of understanding contemporary urbanization processes and of engaging in a meaningful environmental politics They debate the central themes of whose nature is or becomes urbanized and the uneven power relations through which this socio metabolic transformation takes place Including urban case studies international research and contributions from prominent urban scholars this volume will enable students scholars and researchers of geographical environmental and urban studies to better understand how interrelated everyday economic political and cultural processes form and transform urban environments

Geography of Climate Change Richard Aspinall, 2013-09-13 Climate change is one of the inescapable themes of current times Climate

change confronts society in issues as diverse as domestic and international political debate and negotiation discussion in the media and public opinion land management choices and decisions and concerns about environmental social and economic priorities now and for the future Climate change also spans spatial temporal and organisational scales and has strong links with nature society relationships environmental dynamics and vulnerability Understanding the full range of possible consequences of climate change is essential for informed decision making and debate This book provides a collection of chapters that span environmental social and economic aspects of climate change Together the chapters provide a diverse and contrasting series that highlights the need to analyze review and debate climate change and its possible impacts and consequences from multiple perspectives The book also is intended to promote discussion and debate of a more integrated inclusive and open approach to climate change and demonstrates the value of geography in addressing climate change issues This book was originally published as a special issue of Annals of the Association of American Geographers

Integrating Scale in Remote Sensing and GIS Dale A. Quattrochi, Elizabeth Wentz, Nina Siu-Ngan Lam, Charles W. Emerson, 2017-01-06 Integrating Scale in Remote Sensing and GIS serves as the most comprehensive documentation of the scientific and methodological advances that have taken place in integrating scale and remote sensing data This work addresses the invariants of scale the ability to change scale measures of the impact of scale scale as a parameter in process models and the implementation of multiscale approaches as methods and techniques for integrating multiple kinds of remote sensing data collected at varying spatial temporal and radiometric scales Researchers instructors and students alike will benefit from a guide that has been pragmatically divided into four thematic groups scale issues and multiple scaling physical scale as applied to natural resources urban scale and human health social scale Teeming with insights that elucidate the significance of scale as a foundation for geographic analysis this book is a vital resource to those seriously involved in the field of GIScience

Interdisciplinary Environmental Solutions Barnali Dixon, 2025-07-02 This textbook presents a clear and accessible argument for sustainable planning and development The book discusses multiple environmental issues and examines how potential solutions can and should be addressed in the context of space and place The book also offers an invaluable discussion on the need for a framework for system based thinking where various disciplines should work together to find innovative solutions Students are provided with an appreciation of the need for an interdisciplinary approach to these issues combined with an underlying sense of space an appreciation of cultural diversity and differences as well as associated insights into human relationships These core attributes put space at the heart of environmental and natural resources management in terms of policy planning and on the ground initiatives This book will be an invaluable reference for advanced undergraduate graduate students and researchers working in the field looking for an accessible overview of this interdisciplinary approach to the topic

Rivers and Society Malcolm Cooper, Abhik Chakraborty, Shamik Chakraborty, 2017-11-22 Rivers and their watersheds constitute some of the most dynamic and complex landscapes Rivers

have sustained human communities and human societies have utilized and altered river flows in a number of ways for millennia. However, the level of human impact on rivers and on watershed environments has become acute during the last hundred years or so. This book brings together empirical research and theoretical perspectives on the changing conditions of a range of river basin environments in the contemporary world, including the history and culture of local societies living in these river basins. It provides theoretical insights on the patterns and nature of the interaction between rivers and their use by human communities. The chapters are written from a variety of positions, including environmental science, hydrology, human ecology, urban studies, water management, historical geography, cultural anthropology, and tourism studies. The case studies span different geographical regions, providing valuable insight on the multifaceted interactions between rivers and our societies and on the changing riverscapes in different parts of the world. Specific detailed examples are included from Australia, Brazil, France, India, Iran, Japan, the Netherlands, New Zealand, South Africa, UK, and USA. Chapter 11 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non-Commercial No Derivatives (CC BY-NC-ND 4.0) license.

Advances in Spatial Data Handling and Analysis Francis Harvey, Yee Leung, 2015-06-29. This book contains a selection of papers from the 16th International Symposium on Spatial Data Handling (SDH), the premier long-running forum in geographical information science. This collection offers readers exemplary contributions to geospatial scholarship and practice from the conference's 30th anniversary.

Waterways and the Cultural Landscape Francesco Vallerani, Francesco Visentin, 2017-09-11. Water control and management have been fundamental to the building of human civilisation. In Europe, the regulation of major rivers, the digging of canals, and the wetland reclamation schemes from the sixteenth to nineteenth centuries generated new typologies of waterscapes with significant implications for the people who resided within them. This book explores the role of waterways as a form of heritage, culture, and sense of place, and the potential of this to underpin the development of cultural tourism. With a multidisciplinary approach across the social sciences and humanities, chapters explore how the control and management of water flows are among some of the most significant human activities to transform the natural environment. Based upon a wealth and breadth of European case studies, the book uncovers the complex relationships we have with waterways, the ways that they have been represented over recent centuries, and the ways in which they continue to be redefined in different cultural contexts. Contributions recognise not only valuable assets of hydrology that are at the core of landscape management, but also more intangible aspects that matter to people, such as their familiarity affecting what is understood as the fluvial sense of place. This highly original collection will be of interest to those working in cultural tourism, cultural geography, heritage studies, cultural history, landscape studies, and leisure studies.

Artificial Intelligence in Urban Planning and Design Imdat As, Prithwish Basu, Pratap Talwar, 2022-05-14. Artificial Intelligence in Urban Planning and Design: Technologies, Implementation, and Impacts is the most comprehensive resource available on the state of Artificial Intelligence (AI) as it

relates to smart city planning and urban design The book explains nascent applications of AI technologies in urban design and city planning providing a thorough overview of AI based solutions It offers a framework for discussion of theoretical foundations of AI AI applications in the urban design AI based research and information systems and AI based generative design systems The concept of AI generates unprecedented city planning solutions without defined rules in advance a development raising important questions issues for urban design and city planning This book articulates current theoretical and practical methods offering critical views on tools and techniques and suggests future directions for the meaningful use of AI technology Includes a cutting edge catalogue of AI tools applied to smart city design and planning Provides case studies from around the globe at various scales Includes diagrams and graphics for course instruction *Spatial Formats under the Global Condition* Matthias Middell, Steffi Marung, 2019-08-05 Contributions to this volume summarize and discuss the theoretical foundations of the Collaborative Research Centre at Leipzig University which address the relationship between processes of re spatialization on the one hand and the establishment and characteristics of spatial formats on the other hand Under the global condition spatial formats are products of collective negotiations on the most effective and widely acceptable balance between the claim for sovereignty and the need for interconnectedness **Planning, Development and Management of Sustainable Cities** Tan Yigitcanlar, Md. (Liton) Kamruzzaman, 2019-04-30 The concept of sustainable urban development has been pushed to the forefront of policymaking and politics as the world wakes up to the impacts of climate change and the destructive effects of the Anthropocene Climate change has emerged to be one of the biggest challenges faced by our planet today threatening both built and natural systems with long term consequences which may be irreversible While there is a vast body of literature on sustainability and sustainable urban development there is currently limited focus on how to cohesively bring together the vital issues of the planning development and management of sustainable cities Moreover it has been widely stated that current practices and lifestyles cannot continue if we are to leave a healthy living planet to not only the next generation but also to the generations beyond The current global school strikes for climate action known as Fridays for Future evidences this The book advocates the view that the focus needs to rest on ways in which our cities and industries can become green enough to avoid urban ecocide This book fills a gap in the literature by bringing together issues related to the planning development and management of cities and focusing on a triple bottom line approach to sustainability **Seeking Spatial Justice** Edward W. Soja, 2013-11-30 In 1996 the Los Angeles Bus Riders Union a grassroots advocacy organization won a historic legal victory against the city s Metropolitan Transit Authority The resulting consent decree forced the MTA for a period of ten years to essentially reorient the mass transit system to better serve the city s poorest residents A stunning reversal of conventional governance and planning in urban America which almost always favors wealthier residents this decision is also for renowned urban theorist Edward W Soja a concrete example of spatial justice in action In *Seeking Spatial Justice* Soja argues that justice has a geography and that the equitable

distribution of resources services and access is a basic human right Building on current concerns in critical geography and the new spatial consciousness Soja interweaves theory and practice offering new ways of understanding and changing the unjust geographies in which we live After tracing the evolution of spatial justice and the closely related notion of the right to the city in the influential work of Henri Lefebvre David Harvey and others he demonstrates how these ideas are now being applied through a series of case studies in Los Angeles the city at the forefront of this movement Soja focuses on such innovative labor community coalitions as Justice for Janitors the Los Angeles Alliance for a New Economy and the Right to the City Alliance on struggles for rent control and environmental justice and on the role that faculty and students in the UCLA Department of Urban Planning have played in both developing the theory of spatial justice and putting it into practice Effectively locating spatial justice as a theoretical concept a mode of empirical analysis and a strategy for social and political action this book makes a significant contribution to the contemporary debates about justice space and the city
