Scandinavian Journal Of Design History Volume 6:

The Scandinavian Journal of Design History, Vol. 6. [Review]. Jennifer Hawkins Opie, 1997 **Transnational Discourses in Nordic Design** Astrid Skjerven, Rachel Gotlieb, 2024-11-14 Challenging the stereotypes of Scandinavian design these essays explore design in Denmark Norway and Sweden and assess the different roles that Finland and the wider Nordic region had in forming an image of Scandinavian design throughout the world By examining the legacy of Nordic design and its global impact editors Astrid Skjerven and Rachel Gotlieb shed light on the development of national and regional design identities and their historical associations Authors investigate the transnational circulation of ideas throughout the later 20th century and consider the influences on design practices production and consumerism They look at how different countries negotiated and promoted Nordic branding and ideology and offer new perspectives on design in relation to sustainability changing economies and indigenous traditions A range of leading international scholars evaluate the popularity of Nordic style in Soviet material culture the influence on jewellery design in post war Britain the impact of national design conferences exhibitions and education in Europe the USA Canada and Japan Drawing from a wealth of archival material and interviews with designers makers and other stakeholders this book reveals a lesser known history of cross cultural collaborations exhibition production and tensions between mainstream and indigenous design in Scandinavia **Transnational Discourses in Nordic Design** also provides an insight into some of the authors own design practices and reveals the challenges facing Nordic designers today **Design History** Kjetil Fallan, 2010-01-01 Design History has become a complex and wide ranging discipline It now examines artefacts from conception to development production mediation and consumption Over the last few decades the discipline has developed a diverse range of theories and methodologies for the analysis of objects Design History presents the most comprehensive overview and guide to these developments The book first traces the development of the discipline explaining how it draws from Art History Industrial Design Cultural History and Material Culture Studies The core of the book then analyses the seminal methodologies used in Design History today The final section highlights the key issues concerning knowledge and meaning in Design Throughout the aim is to present a concise and accessible introduction to this complex field A map to the intellectual landscape of Design History the book will be an invaluable guide for students and a very useful reference for scholars Twentieth-Century Pattern Design Lesley Jackson, 2007-02-08 Twentieth Century Pattern Design combines photographs including many newly published images with soundly researched text creating an essential resource for enthusiasts and historians of modern design The book also serves as a creative sourcebook for students and designers inspiring new flights of fancy in pattern design Jacket **Prisoners of History** Keith Lowe, 2020-12-08 A look at how our monuments to World War II shape the way we think about the war by an award winning historian Keith Lowe an award winning author of books on WWII saw monuments around the world taken down in political protest and began to wonder what monuments built to commemorate WWII say about us today Focusing on

these monuments Prisoners of History looks at World War II and the way it still tangibly exists within our midst He looks at all aspects of the war from the victors to the fallen from the heroes to the villains from the apocalypse to the rebuilding after devastation He focuses on twenty five monuments including The Motherland Calls in Russia the US Marine Corps Memorial in the USA Italy s Shrine to the Fallen China s Nanjin Massacre Memorial The A Bomb Dome in Hiroshima the balcony at Yad Vashem in Jerusalem and The Liberation Route that runs from London to Berlin Unsurprisingly he finds that different countries view the war differently In monuments erected in the US Lowe sees triumph and patriotic dedications to the heroes In Europe the monuments are melancholy ambiguous and more often than not dedicated to the victims In these differing international views of the war Lowe sees the stone and metal expressions of sentiments that imprison us today with their unchangeable opinions Published on the 75th anniversary of the end of the war Prisoners of History is a 21st century view of a 20th century war that still haunts us today

Georg Jensen Alison Fisher,2018-01-01 This beautifully illustrated catalogue explores how Georg Jensen silver has expanded the boundaries of modern style changing the look of twentieth century homes and spreading Scandinavian design around the world Design for Everyday Living is the first scholarly treatment of Georg Jensen to approach the firm s output in an analytical way situating it in the context of twentieth century design history and focusing on the firm s unique evolution and global influence This book is geared to a wide audience of interested nonspecialists and design historians rather than to a narrower readership of silver collectors It is also innovative in that it focuses on the story of the firm rather than solely on the career of its founder The essays are all original and include a contribution from Thomas Thulstrup the leading expert on Georg Jensen silver The book also benefits from a close collaboration with the Jensen firm which has allowed us access to images and archival materials published here for the first time

The Gesamtkunstwerk in Design and Architecture Anders V. Munch,2021-04-16 The history of modern design and architecture has seen many attempts to embrace and merge different art forms and to bring art into the framing of everyday life and the organisation of modern society in a process understood as total design or total architecture These attempts were historically based on the romanticist idea of merging all art forms into a uniting and transgressing work of art mostly associated with but certainly not limited to Richard Wagner s theoretical writings and musical dramas This utopian dream of the Gesamtkunstwerk or Total Work of Art was intended both to bring unity to the people and to bring art into the everyday life of their homes as well as into factories cities and even modern media As a result the experiments ranged from music poetry and drama to architecture design visual communication and city planning These ideas of merging art forms into more immersive and transgressive installations or design interventions to change everyday life are widespread today but their complex and often problematic roots are mostly ignored Design and architecture have delivered some of the broadest and most influential experiments with the Gesamtkunstwerk from garden cities for workers and corporate identity design to the German AEG corporation

A Cultural History of the Avant-Garde in the Nordic Countries 1900-1925 Hubert

van den Berg, Marianne Ølholm, Benedikt Hjartarson, Irmeli Hautamäki, Torben Jelsbak, Rikard Schönström, Per Stounbjerg, Tania Ørum, Dorthe Aagesen, 2012 *A Cultural History of the Avant Garde in the Nordic Countries 1900 1925* is the first publication to deal with the avant garde in the Nordic countries at the start of the twentieth century. The essays cover a wide range of avant garde manifestations in arts and culture literature the visual arts painting as well as photography architecture and design film radio and performing arts like music theatre and dance. It is the first major historical work to consider the Nordic avant garde in a transnational perspective which includes all the arts and to discuss the role of the avant garde not only within the aesthetic field but in a broader cultural context. It examines the social and cultural context of the avant garde its media its locations its reception and audiences the transmissions between Scandinavia and Europe and its cultural consequences. The essays trace the connections between the avant garde and the cultural discourses of contemporary currents such as revolutionary socialism radical nationalism and occultism and discuss questions of gender ideology and politics geographical location and technological innovation. The cultural history thus focuses on the role of the avant garde in shaping the ideas of cultural modernity in the Nordic countries.

Design Culture Guy Julier, Mads Nygaard Folkmann, Niels Peter Skou, Hans-Christian Jensen, Anders V. Munch, 2019-02-21 *Design culture* foregrounds the relationships between the domains of design practice design production and everyday life. Unlike design history and design studies it is primarily concerned with contemporary design objects and the networks between the multiple actors engaged in their shaping functioning and reproduction. It acknowledges the rise of design as both a key component and a key challenge of the modern world. Featuring an impressive range of international case studies *Design Culture* interrogates what this emergent discipline is its methodologies its scope and its relationships with other fields of study. The volume's interdisciplinary approach brings fresh thinking to this fast evolving field of study.

The Spirit of Vitalism Gertrud Hvidberg-Hansen, Gertrud Oelsner, 2011 This richly illustrated book outlines the strong Vitalistic movement in Denmark during the period 1890 1940. This movement emerged as a response to the rationalism and one sided intellectualism of a rigid bourgeois or decadent culture of the 19th century. It constituted a number of cultural currents that were manifested in philosophy art and everyday life with an emphasis on the energy of youth the dynamic personality and the potential of the body. Viewed in the wider perspective the aim of Vitalism's cult of the body was a revitalization that was to benefit not only the individual human being but the whole of culture. Although the Vitalistic themes emanated from modern life they also drew artistic sustenance from Nordic mythology and Greek antiquity which served as the most important ideals in the modern pursuit of both physical and spiritual beauty. Additionally the book highlights the prevalence of the interest in health and exercise and an increased attentiveness to *hyg*.

1956 Simon Hall, 2016-09-06 Vibrantly and perceptively told this is the story of one remarkable year a vivid history of exhilarating triumphs and shattering defeats around the world. 1956 was one of the most remarkable years of the twentieth century. All across the globe ordinary people spoke out filled the streets and city squares and took up arms in

an attempt to win their freedom In this dramatic page turning history Simon Hall takes the long view of the year s events putting them in their post war context and looking toward their influence on the counterculture movements of the 1960s to tell the story of the year s epic global struggles from the point of view of the freedom fighters dissidents and countless ordinary people who worked to overturn oppressive and authoritarian systems in order to build a brave new world It was an epic contest 1956 is the first narrative history of the year as a whole and the first to frame its tumultuous events as part of an interconnected global story of revolution *Design & Applied Arts Index* ,2001 **Designing Worlds** Kjetil Fallan,Grace Lees-Maffei,2016-06-01 From consumer products to architecture to advertising to digital technology design is an undeniably global phenomenon Yet despite their professed transnational perspective historical studies of design have all too often succumbed to a bias toward Western industrialized nations This diverse but rigorously curated collection recalibrates our understanding of design history reassessing regional and national cultures while situating them within an international context Here contributors from five continents offer nuanced studies that range from South Africa to the Czech Republic all the while sensitive to the complexities of local variation and the role of nation states in identity construction **Our Own Devices** Edward Tenner,2009-08-26 This delightful and instructive history of invention shows why National Public Radio dubbed Tenner the philosopher of everyday technology Looking at how our inventions have impacted our world in ways we never intended or imagined he shows that the things we create have a tendency to bounce back and change us The reclining chair originally designed for brief healthful relaxation has become the very symbol of obesity The helmet invented for military purposes has made possible new sports like mountain biking and rollerblading The typewriter created to make business run more smoothly has resulted in wide spread vision problems which in turn have made people more reliant on another invention eyeglasses As he sheds light on the many ways inventions surprise and renew us Tenner considers where technology will take us in the future and what we can expect from the devices that we no longer seem able to live without

Scandinavian Design Kjetil Fallan,2013-05-09 Scandinavian design is still seen as democratic functional and simple its products exemplifying the same characteristics now as they have done since the 1950s But both the essence and the history of Scandinavian design are much more complex than this Scandinavian Design Alternative Histories presents a radically new assessment a corrective to the persistent mythologies and reductive accounts of Scandinavian design The book brings together case studies from the early twentieth century to today Drawn from fields as diverse as transport engineering packaging photography law interiors and corporate identity these studies tell new or unfamiliar stories about the production mediation and consumption of design An alternative history is created one much more alive to national and regional differences and to types of product Scandinavian Design analyses a century of design culture from Denmark Finland Norway and Sweden and in so doing presents a sophisticated introduction to Scandinavian design *Designing Disability* Elizabeth Guffey,2017-12-28 Designing Disability traces the emergence of an idea and an ideal physical access for the disabled through

the evolution of the iconic International Symbol of Access ISA The book draws on design history material culture and recent critical disability studies to examine not only the development of a design icon but also the cultural history surrounding it Infirmary and illness may be seen as part of human experience but disability is a social construct a way of thinking about and responding to a natural human condition Elizabeth Guffey's highly original and wide ranging study considers the period both before and after the introduction of the ISA tracing the design history of the wheelchair a product which revolutionised the mobility needs of many disabled people from the 1930s onwards She also examines the rise of barrier free architecture in the reception of the ISA and explores how the symbol became widely adopted and even a mark of identity for some especially within the Disability Rights Movement Yet despite the social progress which is inextricably linked to the ISA a growing debate has unfurled around the symbol and its meanings The most vigorous critiques today have involved guerrilla art graffiti and studio practice reflecting new challenges to the relationship between design and disability in the twenty first century

Twentieth Century Design Jonathan M. Woodham, 1997-04-10 A look at the wider issues of design and industrial culture throughout Europe Scandinavia North America and the Far East The book explores the way in which 20th century designs such as the Coca Cola bottle have affected our culture more than those considered true classics *Artbibliographies Modern*, 2005 Light: The Shape of Space Lou Michel, 1995-10-27 Light The Shape of Space Designing with Space and Light Lou Michel Every design professional who touches a space shapes the light and the feeling of that space Architect lighting engineer interior designer lighting or home furnishing manufacturer each contributes an aesthetic layer sometimes yielding unexpected results All too often the best laid plans of one professional are unintentionally subverted by another Removing surprises and guess work from design Lou Michel honored architectural lighting educator has created Light The Shape of Space showing how to design with the effects of light rather than light itself The book is a revolutionary resource for all design professionals and manufacturers of surfacing materials Drawing on over fifteen years experience of research and teaching in the architectural Space and Light Laboratory at The University of Kansas Michel masterfully examines the interrelationship of lighting and the design of architectural space as perceived not in architectural photos or paint chips and fabric swatches but by human vision the gateway to emotional response The book was written for professionals who care about how people feel in the spaces they design and focuses on the humanization of architecture Taking a non stylistic approach to design Michel analyzes architecture from the perspective of how the users see their surroundings as they move through space The reader will learn what pleases and what disturbs people based on how the human visual system responds to color texture pattern and brightness The book features principles of design for the student and professional and is generously supported by illustrations and research Michel also provides a method for evaluating the visual effectiveness of building materials and lighting systems including those that will appear on the market long after this book is dog eared Michel unveils a groundbreaking luminance brightness rating system LBR and a nine zone brightness scale to aid designers

in previsualizing the appearance of surfacing materials at every stage of the design process from schematics to development to refinement Among the topics treated are the interaction of lighting and spatial design color theory for space and light the luminance relationships between free standing objects and the surrounding spatial boundaries against which they are seen the appearance of building materials in color and brightness when modified by light and spatial location lighting spatial connections including the perception of rooms adjacent to the observer lighting and perception of spaces screened by architectural grilles creating lighted space Designing with the effects of light is both an art and a science No other book on the market bridges that gap as successfully as Light The Shape of Space

Handbook of Human Factors and Ergonomics Gavriel Salvendy, 2012-03-13 The fourth edition of the Handbook of Human Factors and Ergonomics has been completely revised and updated This includes all existing third edition chapters plus new chapters written to cover new areas These include the following subjects Managing low back disorder risk in the workplace Online interactivity Neuroergonomics Office ergonomics Social networking HF E in motor vehicle transportation User requirements Human factors and ergonomics in aviation Human factors in ambient intelligent environments As with the earlier editions the main purpose of this handbook is to serve the needs of the human factors and ergonomics researchers practitioners and graduate students Each chapter has a strong theory and scientific base but is heavily focused on real world applications As such a significant number of case studies examples figures and tables are included to aid in the understanding and application of the material covered
