explores the lives and works of various key contributors to Nordic classicism with eleven chapters each focussing on a different architect and on one of the period's outstanding works including the Stockholm Central Library the Resurrection Chapel and the Woodland Cemetery Famous architects and their works are examined alongside many lesser known examples to provide a comprehensive and in depth account As we approach the centenary of many of the events to which the book refers now is a timely opportunity to explore the key themes of the Nordic classical movement its architects their buildings and the social and cultural changes to which they were responding
