**Sustainability and Management** Kıymet Çalıyurt, Ülkü Yüksel, 2017-07-14 In the wake of the 1987 Brundtland Report sustainable development has become key to the management systems within businesses and a means by which companies can increase their long term value Being a sustainable company increasingly means staying alive in business and has become a necessity for all kinds of enterprises from the micro sized to global corporations In more recent years many companies and indeed governments have looked at sustainability as a means to combat the multiple challenges of environmental accidents global warming resource depletion energy poverty and pollution However being sustainable or maintaining sustainability is not an easy task for a company's management function It needs continuous support and engagement from the board the executive management staff and other stakeholders alike Additionally it brings extra costs to the company in terms of hiring trained staff organising continuous training in the company publishing sustainability reports

and subscribing to a rating system Sustainability must be nourished by a company's board as well as by all of its departments such as accounting marketing and human resources By the same token it is not enough for a company simply to declare itself a sustainable business or rely on past measures and reputation sustainability is an ongoing activity and one which has to be proved by periodically disclosing sustainability reports according to international rating systems In Sustainability and Management An International Perspective K ymet al yurt and lk Y ksel bring together international authors from a variety of specialisations to discuss the development aspects problems roadmap trends and disclosure systems for sustainability in management The result is a lively insightful exposition of the field

Scandinavian Information Systems Research Karlheinz Kautz, Peter Axel Nielsen, 2010-08-14 The First Scandinavian Conference on Information Systems SCIS 2010 took place during August 20-22 2010 in Rebild Denmark The conference was held in conjunction with the traditional IRIS seminar for information systems research in Scandinavia The IRIS seminar has a long standing recognition for furthering information systems research The objective of SCIS 2010 was to extend and formalize a part of the seminar to a full conference The purpose of the conference was to exchange and publish high quality research with a particular view on the Scandinavian research community The theme of the conference was Engaged Scandinavian Information Systems Research Scandinavian information systems research has for several decades been concerned with its relevance for practitioners of the field for users for industry and for society at large This concern for the usefulness outside the realms of research has shaped the Scandinavian researchers awareness attention research conduct and most importantly a focus on who we interact with on which issues why we do this and for whom we do it

Forestry Economics John E. Wagner, 2011-07-26 Forestry Economics introduces students and practitioners to all aspects of the management and economics of forestry The book adopts the approach of managerial economics textbooks and applies this to the unique processes and problems faced by managers of forests While most forestry economics books are written by economists for future economists what many future forest and natural resource managers need is to understand what economic information is and how to use it to make better business and management decisions John E Wagner draws on his twenty years of experience teaching and working in the field of forest resource economics to present students with an accessible understanding of the unique production processes and problems faced by forest and other natural resource managers There are three unique features of this book The first is its organization The material is organized around two common economic models used in forest and natural resources management decision making The second is the use of case studies from various disciplines Outdoor and Commercial Recreation Wood Products Engineering Forest Products and Forestry The purpose of these case studies is to provide students with applications of the concepts being discussed within the text The third is revisiting the question of how to use economic information to make better business decisions at the end of each chapter This ties each chapter to the preceding ones and reinforces the hypothesis that a solid working knowledge of these economic models and the information they

contain are necessary for making better business decisions This textbook is an invaluable source of clear and accessible information on forestry economics and management for not only economics students but for students of other disciplines and those already working in forestry and natural resources

### **The Recognition and Management of Early Psychosis**

Patrick D. McGorry, Henry J. Jackson, 1999-07-28 The treatment of early psychosis has been bedevilled by an entrenched pessimism stemming from the asylum era and the Kraepelinian model of schizophrenia More recently however there has been a surge of interest in preventively oriented treatment of patients showing the first signs of psychotic illness with the realization that these illnesses are frequently highly responsive to early treatment This is the first text to focus on the potential of early detection of psychosis and the practicalities of treatment Based on the pioneering experience and research of a now well established prevention and intervention centre and with contributions from international authorities the book outlines a framework for intervention reviews the evidence available to guide clinical practice and describes models of treatment Incorporating many personal narratives and case histories it is strong on theory sensitive on practical issues and will challenge inform and guide clinicians
