Scar That Binds:

The Scar That Binds Keith Beattie, 1998-05-01 At the height of the Vietnam War American society was so severely fragmented that it seemed that Americans may never again share common concerns The media and other commentators represented the impact of the war through a variety of rhetorical devices most notably the emotionally charged metaphor of the wound that will not heal References in various contexts to veterans attempts to find a voice and to bring the war home were also common Gradually an assured and resilient American self image and powerful impressions of cultural collectivity transformed the Vietnam war into a device for maintaining national unity Today the war is portrayed as a healed wound the once silenced veteran has found a voice and the American home has accommodated the effects of Vietnam The scar has healed binding Americans into a union that denies the divisions diversities and differences exposed by the war In this way America is now over Vietnam In The Scar That Binds Keith Beattie examines the central metaphors of the Vietnam war and their manifestations in American culture and life Blending history and cultural criticism in a lucid style this provocative book discusses an ideology of unity that has emerged through widespread rhetorical and cultural references to the war A critique of this ideology reveals three dominant themes structured in a range of texts the wound the voice of the Vietnam veteran and home The analysis of each theme draws on a range of sources including film memoir poetry written and oral history journalism and political speeches In contrast to studies concerned with representations of the war as a combat experience The Scar That Binds opens and examines an unexplored critical space through a focus on the effects of the Vietnam War on American culture The result is a highly original and compelling interpretation of the development of an ideology of unity in our culture Reimagining the Promised Land Rodney Wallis, 2020-09-17 While Israel has seemingly been a minor presence in Hollywood cinema Reimagining the Promised Land argues that there is a long history of Hollywood deploying images of Israel as a means of articulating an idealized notion of American national identity This argument is developed through readings of The Ten Commandments Cecil B DeMille 1956 Ben Hur A Tale of the Christ William Wyler 1959 Exodus Otto Preminger 1960 Cast a Giant Shadow Melville Shavelson 1966 Black Sunday John Frankenheimer 1977 The Delta Force Menahem Golan 1986 and Munich Steven Spielberg 2005 The mobilization of Israel that pervades this eclectic group of films effectively demonstrates one of the more surreptitious ways in which Hollywood has historically constructed and circulated dominant notions of American national identity Moreover in examining the most notable Hollywood representations of the Jewish state the book offers an informed historical overview of the cultural forces that have contributed to popular understandings within the United States of the state of Israel Israel's Arab neighbours and also the Arab Israeli conflict

The Myth of American Diplomacy Walter L. Hixson,2008-10-01 In this major reconceptualization of the history of U S foreign policy Walter Hixson engages with the entire sweep of that history from its Puritan beginnings to the twenty first century s war on terror He contends that a mythical national identity which includes the notion of American moral superiority

and the duty to protect all of humanity has had remarkable continuity through the centuries repeatedly propelling America into war against an endless series of external enemies As this myth has supported violence violence in turn has supported the myth The Myth of American Diplomacy shows the deep connections between American foreign policy and the domestic culture from which it springs Hixson investigates the national narratives that help to explain ethnic cleansing of Indians nineteenth century imperial thrusts in Mexico and the Philippines the two World Wars the Cold War the Iraq War and today s war on terror He examines the discourses within America that have continuously inspired what he calls our pathologically violent foreign policy. The presumption that as an exceptionally virtuous nation the United States possesses a special right to exert power only encourages violence Hixson concludes and he suggests some fruitful ways to redirect foreign policy toward a more just and peaceful world Fascial Grafting in Principle and Practice Herbert Charles Orrin, 1928 Diplomacy Heather L. Dichter, 2020-08-03 Although the game of soccer is known by many names around the world football f tbol Fu ball voetbal the sport is a universal language Throughout the past century governments have used soccer to further their diplomatic aims through a range of actions including boycotts carefully orchestrated displays at matches and more In turn soccer organizations have leveraged their power over membership and tournament decisions to play a role in international relations In Soccer Diplomacy an international group of experts analyzes the relationship between soccer and diplomacy Together they investigate topics such as the use of soccer as a tool of nation state based diplomacy soccer as a non state actor and the relationship between soccer and diplomatic actors in subnational national and transnational contexts They also examine the sport as a conduit for representation communication and negotiation Drawing on a wealth of historical examples the contributors demonstrate that governments must frequently address soccer as part of their diplomatic affairs They argue that this single sport more than the Olympics other regional multisport competitions or even any other sport reveals much about international relations how states attempt to influence foreign views and regional power dynamics

Archives of Surgery ,1929 Cell Motility Anne Ridley, Michelle Peckham, Peter Clark, 2005-04-08 Recent advances in molecular and biophysical techniques particularly fluorescence and live cell imaging are revolutionizing the study of cell motility New bioprobes not only reveal simple intracellular localization but also contain details of post translational modifications conformational state and protein protein interactions Coupling these insights with complementary advances in genetic and biochemical methods is enabling scientists to understand the processes involved in cell motility from molecular motors to cell movements in vivo in a range of organisms and cell types This book features landmark essays that provide an up to date and fascinating account of current research and concepts in cell motility These cover the roles of molecular motors that drive movement and their interactions with the cytoskeleton as well as membrane dynamics that allow cells to change shape and to move Cell motility plays a key role in development there are chapters on the genetics of cell migration the regulation of contact repulsion in growth cones and the progression from cell migration to cell cell adhesion Cell motility is

directional experts describe the molecules that regulate chemotaxis allowing cells to migrate along pathways specified by chemical gradients Finally cell motility can be perturbed by mutation metastasis occurs when cells lose their normal intercellular interactions and invade other tissue types All these processes are regulated by signals from the environment including other tissues in the body and the various molecules that transmit and transduce these signals are discussed This book is a must read for cell biologists working in a variety of fields from development to wound healing at all levels post doctoral fellows post graduate students and lab technicians It is also stimulating reading for molecular and developmental biologists biophysicists and biochemists The Image and the Witness Frances Guerin, Roger Hallas, 2007 The Image and the Witness Trauma Memory and Visual Culture is a timely interdisciplinary collection of original essays concerning the ethical stakes of the image in our visually saturated age It explores the role of the material image in bearing witness to historical events and the visual representation of witnesses to collective trauma In arguing for the agency of the image this unique collection debates post traumatic memory documentary ethics embodied vision and the recycling of images It discusses works by Chris Marker Errol Morris Derek Jarman Doris Salcedo Gerhard Richter and Boris Mikhailov along with images from popular culture including websites and home movies Glycobiology of the Nervous System Cara-Lynne Schengrund, Robert K.
