**Safety and Security in Multiagent Systems** Mike Barley,Haris Mouratidis,Amy Unruh,Diana F. Gordon-Spears,Paul Scerri,Fabio MASSACCI,2009-10-15 As intelligent autonomous agents and multiagent system applications become more pervasive it becomes increasingly important to understand the risks associated with using these systems Incorrect or inappropriate agent behavior can have harmful effects including financial cost loss of data and injury to humans or systems For ample NASA has proposed missions where multiagent systems working in space or on other planets will need to do their own reasoning about safety issues that concern not only themselves but also that of their mission Likewise industry is interested in agent systems that can search for new supply opportunities and engage in semi automated negotiations over new supply contracts These systems should be able to securely negotiate such arrangements and decide which credentials can be requested and which credentials may be disclosed Such systems may encounter environments that are only partially understood and where they must learn for themselves which aspects of their environment are safe and which are dangerous Thus security and safety are two central issues when developing and deploying such systems We refer to a multiagent system's security as the ability of the system to deal with threats that are intentionally caused by other intelligent agents and or systems and the system's safety as its ability to deal with any other threats to its goals

Jackson,Denise Paraventi,Michael Wright,2018-12-20 This two volume set represents a collection of papers presented at the 18th International Conference on Environmental Degradation of Materials in Nuclear Power Systems Water Reactors The purpose of this conference series is to foster an exchange of ideas about problems and their remedies in water cooled nuclear power plants of today and the future Contributions cover problems facing nickel based alloys stainless steels pressure vessel and piping steels zirconium alloys and other alloys in water environments of relevance Components covered include pressure boundary components reactor vessels and internals steam generators fuel cladding irradiated components fuel storage containers and balance of plant components and systems **SOFSEM 2007: Theory and Practice of Computer Science** Jan van Leeuwen,Giuseppe F. Italiano,Wiebe van der Hoek,Christoph Meinel,Harald Sack,František Plášil,2007-07-13 This book constitutes the refereed proceedings of the 33rd Conference on Current Trends in Theory and Practice of Computer Science SOFSEM 2007 held in Harrachov Czech Republic in January 2007 The 69 revised full papers presented together with 11 invited contributions were

carefully reviewed and selected from 283 submissions The papers were organized in four topical tracks

**Current Trends in Database Technology - EDBT 2004 Workshops** Wolfgang Lindner, 2004-12 This book constitutes the thoroughly refereed joint post proceedings of five workshops held as part of the 9th International Conference on Extending Database Technology EDBT 2004 held in Heraklion Crete Greece in March 2004 The 55 revised full papers presented together with 2 invited papers and the summaries of 2 panels were selected from numerous submissions during two rounds of reviewing and revision In accordance with the topical focus of the respective workshops the papers are organized in sections on database technology in general PhD Workshop database technologies for handling XML information on the Web pervasive information management peer to peer computing and databases and clustering information over the Web

**Generative Programming and Component Engineering** Don Batory, Charles Consel, Walid Taha, 2003-06-30 This volume constitutes the proceedings of the 1st ACM SIGPLAN SIGSOFT International Conference on Generative Programming and Component Engineering GPCE 2002 held October 6-8 2002 in Pittsburgh PA USA as part of the PLI 2002 event which also included ICFP PPDP and a related workshops The future of Software Engineering lies in the automation of tasks that are performed manually today Generative Programming developing programs that synthesize other programs Component Engineering raising the level of modularization and analysis in application design and Domain Specific Languages elevating program specifications to compact domain specific notations that are easier to write and maintain are key technologies for automating program development In a time of conference and workshop proliferation GPCE represents a counter trend in the merging of two distinct communities with strongly overlapping interests the Generative and Component Based Software Engineering Conference GCSE and the International Workshop on the Semantics Applications and Implementation of Program Generation SAIG Researchers in the GCSE community address the topic of program automation from a contemporary software engineering viewpoint SAIG correspondingly represents a community attacking automation from a more formal programming languages viewpoint Together their combination provides the depth of theory and practice that one would expect in a premier research conference Three prominent PLI invited speakers lectured at GPCE 2002 Neil Jones University of Copenhagen Catuscia Palamidessi Penn State University and Janos Sztipanovits Vanderbilt University GPCE 2002 received 39 submissions of which 18 were accepted

Trust, Reputation, and Security: Theories and Practice Rino Falcone, Suzanne Barber, Larry Korba, Munindar Singh, 2003-04-10 This book constitutes the thoroughly refereed post proceedings of the International Workshop on Deception Fraud and Trust in Agent Societies held in Bologna Italy in July 2002 during AAMAS 2002 Most papers presented were carefully selected from the workshop contributions during two rounds of reviewing and revision a few papers were particularly solicited in order to provide complete coverage of all relevant topics All relevant aspects of the field are addressed

*The Past and Future of Information Systems: 1976 -2006 and Beyond* David Avison, Steve Elliot, John Krogstie, Jan Pries-Heje, 2006-11-30 The International Federation for Information Processing IFIP is a non profit umbrella

organization for national societies working in the field of information processing It was founded in 1960 under the auspices of UNESCO It is organized into several technical committees This book represents the proceedings of the 2006 conference of technical committee 8 TC8 which covers the field of information systems This conference formed part of IFIP's World Computer Congress in Chile The occasion celebrated the 30th anniversary of IFIP TC8 by looking at the past present and future of information systems The proceedings reflect not only the breadth and depth of the work of TC8 but also the international nature of the group with authors from 18 countries being represented in the 21 papers including two invited papers and 2 panels All submissions were rigorously refereed by at least two reviewers and an associate editor and following the review and resubmission process nearly 50% of submissions were accepted This paper introduces the papers and panels presented at the conference and published in this volume It is never straightforward to classify a set of papers but we have made an attempt and this classification is also reflected in the sessions of the conference itself The classification for the papers is as follows the world of information systems early pioneers developing improved information systems information systems in their domains of application the discipline of information systems issues of production IT impacts on the organization tools and modeling and new directions

Software Engineering and Computer Systems, Part II Jasni Mohamad Zain, Wan Maseri Wan Mohd, Eyas El-Qawasmeh, 2011-06-22 This Three Volume Set constitutes the refereed proceedings of the Second International Conference on Software Engineering and Computer Systems ICSECS 2011 held in Kuantan Malaysia in June 2011 The 190 revised full papers presented together with invited papers in the three volumes were carefully reviewed and selected from numerous submissions The papers are organized in topical sections on software engineering network bioinformatics and e health biometrics technologies Web engineering neural network parallel and distributed e learning ontology image processing information and data management engineering software security graphics and multimedia databases algorithms signal processing software design testing e technology ad hoc networks social networks software process modeling miscellaneous topics in software engineering and computer systems

Information and Database Quality Mario G. Piattini, Coral Calero, Marcela F. Genero, 2012-12-06 In a global and increasingly competitive market where organizations are driven by information the search for ways to transform data into true knowledge is critical to a business's success Few companies however have effective methods of managing the quality of this information Because quality is a multidimensional concept its management must consider a wide variety of issues related to information and data quality Information and Database Quality is a compilation of works from research and industry that examines these issues covering both the organizational and technical aspects of information and data quality Information and Database Quality is an excellent reference for both researchers and professionals involved in any aspect of information and database research

Computer Vision for X-Ray Testing Domingo Mery, Christian Pieringer, 2020-12-21 FIRST EDITION This accessible textbook presents an introduction to computer vision algorithms for industrially relevant applications of X ray testing

Features introduces the mathematical background for monocular and multiple view geometry describes the main techniques for image processing used in X ray testing presents a range of different representations for X ray images explaining how these enable new features to be extracted from the original image examines a range of known X ray image classifiers and classification strategies discusses some basic concepts for the simulation of X ray images and presents simple geometric and imaging models that can be used in the simulation reviews a variety of applications for X ray testing from industrial inspection and baggage screening to the quality control of natural products provides supporting material at an associated website including a database of X ray images and a Matlab toolbox for use with the book s many examples

**Metrics For Software Conceptual Models** Marcela Genero,Mario Piattini,Coral Calero,2005-01-04 The idea that measuring quality is the key to developing high quality software systems is gaining relevance Moreover it is widely recognised that the key to obtaining better software systems is to measure the quality characteristics of early artefacts produced at the conceptual modelling phase Therefore improving the quality of conceptual models is a major step towards the improvement of software system development Since the 1970s software engineers had been proposing high quantities of metrics for software products processes and resources but had not been paying any special attention to conceptual modelling By the mid 1990s however the need for metrics for conceptual modelling had emerged This book provides an overview of the most relevant existing proposals of metrics for conceptual models covering conceptual models for both products and processes

**Similarity Search** Pavel Zezula,Giuseppe Amato,Vlastislav Dohnal,Michal Batko,2006-06-07 The area of similarity searching is a very hot topic for both research and c mercial applications Current data processing applications use data with c siderably less structure and much less precise queries than traditional database systems Examples are multimedia data like images or videos that offer query by example search product catalogs that provide users with preference based search scientific data records from observations or experimental analyses such as biochemical and medical data or XML documents that come from hetero neous data sources on the Web or in intranets and thus does not exhibit a global schema Such data can neither be ordered in a canonical manner nor meani fully searched by precise database queries that would return exact matches This novel situation is what has given rise to similarity searching also ferred to as content based or similarity retrieval The most general approach to similarity search still allowing construction of index structures is modeled in metric space In this book Prof Zezula and his co authors provide the first monograph on this topic describing its theoretical background as well as the practical search tools of this innovative technology

**Books in Print Supplement ,2002** **Analytical Characterization of Aluminum, Steel, and Superalloys** D. Scott MacKenzie,George E. Totten,2005-10-10 Authored by top researchers this book discusses methodologies to quantify the properties and microstructures of aluminum steel and superalloys It is a unique reference to advanced laboratory techniques in the context of characterization and property evaluation methodologies enabling the evolution of stronger and more function specific compositions Topics include

metallography an atlas of microstructures thermal analysis x ray diffraction and residual stress measurement transmission electron microscopy electron backscattering diffraction spectroscopy texture measurement electron momentum spectroscopy positron annihilation spectroscopy and atomic probe tomography

**Strategic Information Systems: Concepts, Methodologies, Tools, and Applications** Hunter, M. Gordon, 2009-08-31 This 4 volume set provides a compendium of comprehensive advanced research articles written by an international collaboration of experts involved with the strategic use of information systems Provided by publisher
