Scent Of Mimosa:

A Scent of Mimosa Jade Shannon,1985 The Scent Trail Celia Lyttelton,2009-02-03 Lyttelton s passion for fragrance inspired her to have a signature perfume created just for her and then to embark on the ultimate olfactory odyssey Armed with a list of ingredients she tracked down each component of her scent tracing its origins history and culture From the iris fields of Tuscany to the vetivert distilleries of India from the nutmeg plantations of Sri Lanka to the shores of the Arabian Sea Celia gives readers a glimpse into the world of scent that few people have ever experienced providing delicious details on its place in history for example how Casanova added small amounts of ambergris to chocolate mousses to aid his amorous adventures and how Charles Dickens carried a monogrammed pocket nutmeg grater in his waist coat at a time when nutmeg was used to ward off evil and to spice rum Scent and Subversion Barbara Herman,2013-11-05 An intriguing look at vintage perfume s powerful past including reviews of more than 300 scents with stunning period advertisements throughout

Groom,2012-12-06 In 1948 I was posted as a Political Officer to a remote part of south west Arabia on the edge of the great desert called the Empty Quarter In valleys made fertile by seasonal flood waters lay the remains of an ancient civilization I found inscriptions and the ruin sites of towns palaces and temples Almost buried under the sand dunes were the tumbled walls of a great city From here two thousand years before huge camel caravans had trudged their way along 1600 miles of burning sand and rocks to Petra and Gaza burdened with a most precious cargo frankincense myrrh and other perfume materials for the courts temples and perfume shops of Rome My book Frankincense and Myrrh delved into the details of this romantic trade and led to a broader interest in the perfumes of ancient times Then researching on behalf of a perfume house into the Arab contribution to perfumery I came across the collection of perfume recipes assembled by the Arab philosopher scientist Yaqub al Kindi which have never been translated into English some which I have translated myself are now included in an appendix to this book I realized that in that work I had found key evidence to demonstrate how the medieval Arab perfume makers had been the bridge in perfume history between ancient and modern times Perfumery could now be seen as an art with a continuous history of development since the dawn of civilization **Cultivation and Utilization of Aromatic Plants** H. Panda,2005-10-05 Aroma has played a vital role directly as well as indirectly in the life of human beings since its appearance on the earth as a result of evolution India Egypt and Persia were amongst the first countries to have conceived the process of distillation of essential oils Aromatic plants have essential or aromatic oils naturally occurring in them They help heal mental ailments and other diseases India is endowed with a rich wealth of medicinal plants Aromatic Aroma Producing plants are those plants which produce a certain

type of aroma Their aroma is due to the presence of some kind of essential oil with chemical constituents that contain at least one benzene ring in the their chemical configuration These plants have made a good contribution to the development of ancient Indian material medica In recent years there has been a tremendous growth of interest in plant based drugs pharmaceuticals perfumery products cosmetics and aroma compounds used in food flavors and fragrances and natural colors in the world The chemical nature of these aromatic substances may be due to a variety of complex chemical compounds There is a definite trend to adopt plant based products due to the cumulative derogatory effects resulting from the use of antibiotic and synthetics and except for a few cultivated crops the availability of plant based material is mainly from the natural sources like forests and wastelands There is a need to introduce these crops into the cropping system of the county which besides meeting the demands of the industry will also help to maintain the standards on quality potency and chemical composition During the past decade demand for aromatic plants and its products has attracted the worldwide interest India being the treasure house of biodiversity accounts for thousands of species which are used in herbal drugs 90% of herbal industry requirement of raw material is taken out from the forests This book basically deals with cultivation of matricaria chamomilla present agro production technology status of celery cultivation of ocimum gratissimum linn var clocimum the production and perfume potential of jasminum collections chemical modification of turmeric oil to more value added products biologically active compounds from turpentine oil folk medicinal uses of indigenous aromatic plants in nepal traditional uses of selected aromatic plants of bhutan and their cultivation prospects blending aspects of perfumes with turpentine constituents the chemistry of mint flavour essential oils of cinnamomum species citral containing cymbopogon species etc The aim of publishing this book is to provide multidisciplinary information on aromatic plants The book covers method of cultivation and utilization of various aromatic plants This is very useful book for farmers technocrats agriculture universities libraries new entrepreneurs etc
