Scents Appeal The Silent Persuasion Of Aromatic Encounters:

Scents Appeal Gabrielle J. Dorland,1993 Scents Appeal Gabrielle J. Dorland,1993 *Sensory Worlds in Early America* Peter Charles Hoffer,2005-12-12 Over the past half century historians have greatly enriched our understanding of America s past broadening their fields of inquiry from such traditional topics as politics and war to include the agency of class race ethnicity and gender and to focus on the lives of ordinary men and women We now know that homes and workplaces form a part of our history as important as battlefields and the corridors of power Only recently however have historians begun to examine the fundamentals of lived experience and how people perceive the world through the five senses In this ambitious work Peter Charles Hoffer presents a sensory history of early North America offering a bold new understanding of the role that sight sound smell taste and touch played in shaping the lives of Europeans Indians and Africans in the New World Reconstructing the most ephemeral aspects of America s colonial past the choking stench of black powder the cacophony of unfamiliar languages the taste of fresh water and new foods the first sight of strange peoples and foreign landscapes the rough texture of homespun the clumsy weight of a hoe Hoffer explores the impact of sensuous experiences on human thought and action He traces the effect sensation and perception had on the cause and course of events conventionally attributed to deeper cultural and material circumstances Hoffer revisits select key events encounters and writings from America s colonial past to uncover the sensory elements in each and decipher the ways in which sensual data were mediated by prevailing and often conflicting cultural norms Among the episodes he reexamines are the first meetings of Europeans and Native Americans belief in and encounters with the supernatural the experience of slavery and slave revolts the physical and emotional fervor of the Great Awakening and the feelings that prompted the Revolution Imaginatively conceived deeply informed and elegantly written *Sensory Worlds of Early America* convincingly establishes sensory experience as a legitimate object of historical inquiry and vividly brings America s colonial era to life Richard Godbeer author of *Sexual Revolution in Early America* Sacred Scents in Early Christianity and Islam Mary Thurlkill,2016-07-26 Medieval scholars and cultural historians have recently turned their attention to the question of smells and what olfactory sensations reveal about society in general and holiness in particular *Sacred Scents in Early Christianity and Islam* contributes to that conversation explaining how early Christians and Muslims linked the sweet smell of sanctity with ideals of the body and sexuality created boundaries and sacred space and imagined their emerging communal identity Most importantly scent itself transgressive and difficult to control signaled transition and transformation between categories of meaning Christian and Islamic authors distinguished their own fragrant ethical and theological ideals against the stench of oppositional heresy and moral depravity Orthodox Christians ridiculed their stinking Arian neighbors and Muslims denounced the reeking corruption of Umayyad and Abbasid decadence Through the mouths of saints and prophets patriarchal authors labeled perfumed women as existential threats to vulnerable men and consigned them to enclosed private

space for their protection as well as society's. At the same time theologians praised both men and women who purified and transformed their bodies into aromatic offerings to God. Both Christian and Muslim pilgrims venerated sainted men and women with perfumed offerings at tombstones; indeed Christians and Muslims often worshipped together honoring common heroes such as Abraham, Moses, and Jonah. *Sacred Scents* begins by surveying aroma's quotidian functions in Roman and pre-Islamic cultural milieus within homes, temples, poetry, kitchens, and medicines. Existing scholarship tends to frame scent as something available only to the wealthy or elite; however, perfumes, spices, and incense wafted through the lives of most early Christians and Muslims. It ends by examining both traditions' views of Paradise identified as the archetypal Garden and source of all perfumes and sweet smells. Both Christian and Islamic texts explain Adam and Eve's profound grief at losing access to these heavenly aromas and celebrate God's mercy in allowing earthly remembrances. *Sacred Scent* thus prompts humanity's grief for what was lost and the yearning for paradisiacal transformation still to come. *The Smell of Slavery* Andrew

Kettler, 2020-05-28 In the Atlantic World, different groups were aromatically classified in opposition to other ethnic, gendered, and class assemblies due to an economic necessity that needed certain bodies to be defined as excremental, which culminated in the creation of a progressive tautology that linked Africa and waste through a conceptual hendiadys born of capitalist licentiousness. The African subject was defined as a scented object appropriated as filthy to create levels of ownership through discourse that marked African peoples as unable to access spaces of Western modernity. Embodied cultural knowledge was potent enough to alter the biological function of the five senses to create a European olfactory consciousness made to sense the African other as foul. Fascinating, informative, and deeply researched, *The Smell of Slavery* exposes that concerns with pungency within the Western self were emitted outward upon the freshly dug outhouse of the mass slave grave called the Atlantic World. **The Aromatherapy Garden** Kathi Keville, 2025-04-08 Kathi guides you to all the joys of an aromatic garden with wonderful tips, fascinating facts, and sumptuous photos. Mandy Aftel, author of *Essence and Alchemy* and *Fragrant*, fragrant plants can be as therapeutic as they are intoxicating, and it is easy to add them to gardens large and small. *The Aromatherapy Garden* reveals the scents, secrets, and science behind fragrant plants and shows you how to successfully create your own plant-filled sanctuary of health and happiness. Detailed plant profiles provide guidance on the full benefits of a range of plants and include comprehensive details on how to grow and care for them in a home garden. Also included are recipes for restorative aromas, oils, sachets, teas, and more. **Massage and Aromatherapy** Andrew Vickers, Caroline

Stevensen, Steve Van Toller, 2013-11-11 This book aims to give health professionals a balanced and independent overview of massage and aromatherapy. I have written it because, despite growing interest, there is a dearth of professional literature on this subject. This book aims to cover a number of topics which are underrepresented in existing publications. These include scientific research in massage and aromatherapy, the use of the therapies in medical settings, the knowledge base of massage and aromatherapy, professional and managerial issues, safety. Understanding of these subjects is essential for any reasoned

evaluation of massage and aromatherapy Yet this book is probably the first to provide information suitable for this task At the current time of writing almost all books on massage and aroma therapy have been written with the lay public in mind The texts recommended to students and practitioners by the foremost schools and institutions are exactly the same as those available in health food shops as general introductions for prospective patients Not surprisingly such books generally fail to include in depth discussions of professional issues **Medical and Health Care Books and Serials in Print** ,1997
