Darwin's Racism, Sexism, and Idolization Rui Diogo,2024-02-27 In this book Diogo a renowned biologist and anthropologist addresses a question that is critical for the understanding of science beliefs idolization systemic racism and sexism and our societies in general why has Darwin been idolized in such a unique way particularly by Western scholars Diogo shows that many evolutionary facts stated in Darwin's works particularly about human evolution are inaccurate

constructions based on Victorian biases and stereotypes non Europeans are inferior women have a lower intelligence than men Victorian society was the pinnacle of evolution and so on Importantly such inaccurate biased statements about our evolution are markedly in contrast with the mostly accurate and often brilliant ideas put forward by Darwin concerning non human organisms Importantly it was precisely the combination of such brilliant ideas the use of simplistic and sometimes exaggerated metaphors that were catchy and easily absorbed by the general public and Darwin s intellectual conservatism and biased ideas about women and non European peoples that led to Darwin s idolization particularly by Western scientists as well as to the darkest societal repercussions of his works By portraying such biased ideas as evolutionary facts Darwin provided easy ammunition for populist political leaders authoritarians colonialists and white supremacists to scientifically defend social hierarchies sexism racism discrimination oppression and segregation A typical argument used to defend Darwin from portraying such erroneous sexist and racist ideas as facts is that back then everybody was racist and sexist Diogo deconstructs this argument by providing enthralling case studies and travel descriptions by authors such as Wallace and Humboldt who often praised the indigenous peoples that repulsed and criticized the social hierarchies and Western imperialism that marveled Darwin The aim of this book is therefore not to cancel Darwin or argue that he was always wrong not at all in general he was an extraordinary biologist but was a much less successful anthropologist due in great part to his Victorian biases Instead the book discusses Darwin s writings ideas and their repercussions in a broader way without taboos omissions idolization or demonization in order to show Darwin and science in general in all their complexity This is because if we fail to acknowledge and emphasize the biases prejudices inaccuracies and abuses of our past and merely continue to blindly idealize it our kids will be condemned to undertake or suffer similar societal abuses in the future
