Neoliberalism and Education Kalwant Bhopal,Farzana Shain,2017-10-02 Neoliberalism and Education Rearticulating Social Justice and Inclusion offers a critical reflection on the establishment of neoliberalism as the new global orthodoxy in the field of education and considers what this means for social justice and inclusion It brings together writers from a number of countries who explore notions of inclusion and social justice in educational settings ranging from elementary schools to higher education Contributors examine policy practice and pedagogical considerations covering different dimensions of in equality including disability race gender and class They raise questions about what social justice and inclusion mean in educational systems that are dominated by competition benchmarking and target driven accountability and about the new forms of imperialism and colonisation that both drive and are a product of market driven reforms While exposing the entrenchment under current neoliberal systems of educational provision of longstanding patterns of racialised classed and gendered privilege and disadvantage the contributions presented in this book also consider the possibilities for hope and resistance drawing attention to established and successful attempts at democratic education or community organisation across a number of countries This book was originally published as a special issue of the British Journal of Sociology of Education Women and Educational Development Mukta Gupta,2000 **Intergenerational Mobility** Rajarshi Majumder,2013-04-09 Discrimination and exclusion in the process of capability formation and the labor market transcend the

boundaries of the current generation and spill over to successive generations as well Though a plethora of work has been done at the international level the area has not been the focus of Indian economic research despite social exclusion and disparity having been quite substantial in India especially the division along caste lines The book addresses this research gap and explores the issue of intergenerational mobility across different social classes in the Indian context analyzing the spheres of both education and occupation We contend that parental education and occupation have a significantly greater impact on educational attainment and occupational choice for socially excluded groups compared to the advanced groups In the labor market intergenerational mobility is low and most of it is lateral and not vertical increasing the possibility of discrimination in the labor market This book highlights the fact that the long history of social exclusion has had a lasting effect and it is very difficult to come out of this inertia
