Information Users and Usability in the Digital Age G. G. Chowdhury, Sudatta Chowdhury, 2011-09-15 Information users and usability constitute the main building blocks of today's electronic information world. This important new text is the first to give a holistic overview of all of the necessary issues relating to information users and the usability of information services in the digital world including user-centred design and the characteristics and behaviour of information users. This book helps readers understand why information users and the usability of information services are important and equips them to play a proper role in designing user-centred information systems and services and to properly exploit information services for the maximum benefit of users. It covers all of the major issues, the current situation and what the various research studies from around the world show. **Research and Advanced Technology for Digital Libraries** Julio Gonzalo, 2006-09-13 This book constitutes the refereed proceedings of the 10th European Conference on Research and Advanced Technology for Digital Libraries ECDL 2006 held in Alicante, Spain, in September 2006. The 36 revised full papers presented together with the extended abstracts of 18 demo papers and 15 revised poster papers were carefully reviewed and selected from a total of 159 submissions. The papers are organized in topical sections on architectures, preservation, retrieval, applications, methodology, metadata, evaluation, user studies, modeling, audiovisual content, and language technologies.

Digital Libraries and Information Access G. G. Chowdhury, Schubert Foo, 2012-09-21 An authoritative and truly global exploration of current research in digital libraries. Internationally renowned academics discuss what has been achieved with digital libraries and what we can expect in the future through the prism of research. The increasing number of digital libraries in all sectors and the pressure of ever-demanding and diverse user needs has encouraged development of user-centred interfaces, intelligent search and retrieval capabilities, effective metadata description and contents organization. In addition to the two editors who are renowned for their works in digital library research, this collection brings together established international names in the field to analyse these developments in relation to users and information access and the future trends and challenges that practitioners will face. Readership: LIS students, academics, and researchers interested in digital libraries and access, and those developing, managing, or just starting out with digital libraries. **Library &**
