Kitchenspace Maria Elisa Christie, 2009-08-17 Throughout the world the kitchen is the heart of family and community life Yet while everyone has a story to tell about their grandmother s kitchen the myriad activities that go on in this usually female world are often devalued and little scholarly attention has been paid to this crucial space in which family gender and community relations are forged and maintained To give the kitchen the prominence and respect it merits Maria Elisa Christie here offers a pioneering ethnography of kitchenspace in three central Mexican communities Xochimilco Ocotepc and Tetecala Christie coined the term kitchenspace to encompass both the inside kitchen area in which everyday meals for the family are made and the larger outside cooking area in which elaborate meals for community fiestas are prepared by many women working together She explores how both kinds of meal preparation create bonds among family and community members In particular she shows how women s work in preparing food for fiestas gives women status in their communities and creates social networks of reciprocal obligation In a culture rigidly stratified by gender Christie concludes kitchenspace gives women a source of power and a place in which to transmit the traditions and beliefs of older generations through quasi sacramental food rites

The Oxford Companion to Food Alan Davidson, 2014 Twenty years in the making the first edition of this bestselling reference work appeared in 1999 to worldwide acclaim Combining serious and meticulously researched facts with

entertaining and witty commentary it has been deemed unique by chefs and reviewers around the globe. It contains both a comprehensive catalog of foodstuffs, crackers and cookies named for battles and divas, body parts from toe to cerebellum, breads from Asia to the Mediterranean and a richly allusive account of the culture of food whether expressed in literature and cook books or as dishes special to a country or community. Retaining Alan Davidson's wisdom and wit, this new edition also covers the latest developments across the whole spectrum of this subject. Tom Jaine has taken the opportunity to update the text and alert readers to new perspectives in food studies. There is new coverage on attitudes towards food consumption, production and perception such as food and genetics, food and sociology and obesity. New entries include terms such as convenience foods, gastronomy, fusion food, leftovers, obesity, local food and many more. There are also new entries on important personalities who are of special significance within the world of food among them Clarence Birdseye, Henri Nestle and Louis Pasteur. Now in its third edition, the Companion maintains its place as the foremost food reference resource for study and home use.

Race and Repast Urszula Niewiadomska-Flis, 2022-12-15 *Race and Repast: Foodscapes in Twentieth Century Southern Literature* examines how race relations are expressed through struggles over the meaning of food and access to food in Southern literature. This innovative investigation offers new perspectives on the history of racial conflict in the South while illuminating how the very act of eating together allowed Southerners to cross race and class lines at a time of great strife.

Manuscript Recipe Books as Archaeological Objects Madeline Shanahan, 2014-11-18 During the mid to late seventeenth century, women in Irish houses from elite backgrounds started to collect recipes which they recorded in domestic manuscripts. While these manuscripts were made elsewhere at an earlier date, they were an almost entirely new arrival to Ireland in this period and their sudden proliferation said much about changes taking place in society at large. This book is a detailed study of such manuscripts from the perspective of historical archaeology which will argue that they are artifacts which clearly demonstrate that a profound series of changes was taking place. The written word penetrated people's daily lives and homes to a degree that it had not in previous periods and it had a profound influence on how they related to their world, objects and each other. While this book will address how we can use them as sources for the study of food history and material culture, it is ultimately concerned with the meanings of manuscript recipe books and specifically what they say about the individuals and society that made them. The proliferation of these manuscripts signaled a profound change not just in cuisine but also in the way people thought about and related to food as a form of material culture. Ultimately, this book will argue that these manuscripts are not simply excellent records which can tell us about material culture within the early modern house but that they are a profoundly important type of artifact in their own right. Undertaking research that situates textual objects such as recipe
