Anderson, 2022-03-27 This

book presents a story of school improvement activity in East Africa from 1985 to 2000 which focused on sustained teacher development. The core of the book consists of six evaluations of school and district wide school improvement projects SIPs supported by the Aga Khan Foundation in Tanzania, Kenya and Uganda. The case studies present an evolving body of knowledge about the successes and challenges of a comprehensive approach to school improvement grounded in a common set of strategic principles. The strategic principles embody the belief that the chances for quality improvement in teaching and learning are greater when change efforts are school based, involve whole schools as the unit of change, emphasize the ongoing professional development of teachers, attend to school management and organizational conditions affecting the capacity of teachers to implement change, prepare for the institutionalization of organizational structures and processes that enable continuous school development and evolve through partnerships among relevant education stakeholders. The book concludes with commentaries by international experts in school improvement and teacher development on the SIP project designs, implementation and outcomes and on lessons that can be drawn from the projects and their evaluations for school improvement policy practice and theory in developing and developed countries around the world. *Subject Leadership and School Improvement* Hugh Busher, Alma Harris, 2000-11-17. Curriculum and subject leadership in schools has recently gained substantial attention from both researchers and policy makers. The Teacher Training Agency (TTA) has reinforced the importance of subject leadership in school improvement proposing a new measure of such leadership competence through the creation of national subject leader standards NPQSL. *Subject Leadership and School Improvement* reflects critically on the work of subject and curriculum leaders especially in schools in England and Wales that is those within the policy framework of The National Curriculum and the Teacher Training Agency. The book debates the functions of subject leaders in primary and secondary schools using current research based conceptual frameworks and considers how they can bring about improvement and change with their colleagues in their subject areas. It emphasizes what is particular about leading and managing the middle realm of education organizations showing how structural, cultural and individual imperatives and perspectives interact with each other in the professional practice of being a subject leader. The book is of interest not only to subject leaders and curriculum coordinators to help them reflect rigorously on their practice but also to those responsible for supervising them such as headteachers and school governors as well as for those accountable to them. It will be a useful text for serving teachers undertaking higher degrees programmes or programmes for gaining national standards qualifications the National Professional Qualification for Headteachers NPQH as much as for the NPQSL National Professional Qualification for Subject Leaders when it is implemented.
