Crittenden, 2024-08-24 Reprint of the original first published in 1877 **The Physical and the Moral** Elizabeth A. Williams, 2002-08-08 This book explores the tradition of the science of man in French medicine of the era 1750 1850 focusing on controversies about the nature of the physical moral relation and their effects on the role of medicine in French society Its chief purpose is to recover the history of a holistic tradition in French medicine that has been neglected because it lay outside the mainstream themes of modern medicine which include experimental reductionist and localistic conceptions of health and disease Professor Williams also challenges existing historiography which holds that the anthropological approach to medicine was a short term by product of the leftist politics of the French Revolution This work argues instead that the

medical science of man long outlived the revolution that it spanned traditional ideological divisions and that it reflected the shared aim of French physicians whatever their politics to claim broad cultural authority in French society **The United States Democratic Review** ,1850 Vols 1 3 5 8 contain the political and literary portions v 4 the historical register department of the numbers published from Oct 1837 to Dec 1840 **Natural History of Man** Armand de Quatrefages,2018-04-12 This book presents the natural history of man with illustrations What is man The Antiquity of Man The Migrations of Men The Development of Physical and Intellectual Characters of the Human Races Each of my fellow laborers in science select the subject which habitually occupies them Some tell you of the heavens the earth the waters from others you get the history of vegetables and animals As I am Professor of the Natural History of Man at the Museum I ask myself why I should not speak to you of man There is evidently as much interest for us in our own species as in the history of animals even of those most useful to us Indeed at this time the mind is drawn toward this study by an irresistible movement Formerly Anthropology the natural history of man was not represented in philosophical bodies nor by the periodical press Now in Paris alone there are two Philosophical Societies occupied exclusively with this science and two large publications equally devoted to it At the Museum the teaching of anthropology is older It is there aided by a collection which is still the best in the world I do not hesitate to say that it is one of the glories of France to have given by these methods an example to the entire world an example followed to day in America as well as in Europe And I wish to make you take a part in this movement by giving you some serious notion of the ensemble of the human family This gentlemen is much more difficult for me than for my associates In all these lectures we are to speak of only a single being man Consequently there will be an intimate union between them so much so that any person who should miss a lecture would find difficulty in thoroughly understanding those that follow To remove this difficulty I mean to shape my teaching so that each lecture will form as definite a whole as possible Then at the commencement of each lecture I shall endeavor to give in a few words a r sum of the preceding In this way I hope to carry you to the end without ceasing to be understood
