## **Natural Resources And Violent Conflict Options And Actions:**

*Natural Resources and Violent Conflict* Ian Bannon, Paul Collier, 2003-01-01 Research carried out by the World Bank on the root causes of conflict and civil war finds that a developing country's economic dependence on natural resources or other primary commodities is strongly associated with the risk level for violent conflict This book brings together a collection of reports and case studies that explore what the international community in particular can do to reduce this risk The text explains the links between natural resources and conflict and examines the impact of resource dependence on economic performance governance secessionist movements and rebel financing It then explores avenues for international action from financial and resource reporting procedures and policy recommendations to commodity tracking systems and enforcement instruments including sanctions certification requirements aid conditionality legislative and judicial instruments *Natural Resource Conflicts* M. Troy Burnett, 2016-09-19 Natural resource and environmental conflicts have long been issues confronting human societies This case based examination of a wide range of natural resource disputes exposes readers to many contemporary examples that offer reasons for both hope and concern The Rwandan genocide the Sudanese civil war and perpetual instability in the Middle East and Africa each of these crises have arguably been instigated and maintained by natural resource disputes China has undertaken a Herculean task to plant hundreds of millions of trees along its margins in an effort to save Beijing from crippling dust storms and halt the expansion of the Gobi desert Will it work and is it worth it These and many other cases of conflict stemming from natural resource or environmental concerns are explained and debated in this up to date examination of contemporary and ongoing topics The book examines conflicts over precious resources and minerals such as diamonds oil water and fisheries as well as the pursuit of lesser known minerals like Coltan and other rare earth elements important resources in our technological age in remote locations such as Greenland and the Congo Each topic contains an overview and two position essays from different authors thereby providing the reader with highly informative and balanced perspectives Reference entries accompany each topic as well helping students to better understand each issue As the world hurtles into the 21st century these natural resource issues are becoming increasingly important with all global citizens having a significant stake in how these conflicts arise and play out Conflicts over Natural Resources in the Global South Maarten Bavinck, Lorenzo Pellegrini, Erik Mostert, 2014-01-15 Inhabitants of poor rural areas in the Global South heavily depend on natural resources in their immediate vicinity Conflicts over and exploitation of these resources whether it is water fish wood fuel minerals or land severely affect their livelihoods The contributors to this volume leave behind the polarised debate previously surround **Oil Sparks in the Amazon** Patricia I. Vasquez, 2014 For decades studies of oil related conflicts focused on the causes and effects of natural resources mismanagement commonly known as the resource curse the paradoxical connection between oil wealth and economic busts as in Venezuela or in a later twist the link between the predatory behavior of armed rebel organizations and the abundant natural resources that funded

their existence Patricia Vasquez notes that oil busts and civil wars associated with the resource curse were quite different from the now predominant local hydrocarbons disputes that are multiplying rapidly in Latin America These more recent localized disputes over land population displacement water contamination oil jobs that are promised but never materialize etc primarily involve Indigenous groups with a different social and cultural identity from the rest of the population Vasquez spent fifteen years making regular field visits to the oil producing regions of Latin America and conducting hundreds of interviews with the various stakeholders in these local conflicts Her book based on this field research analyzes the dynamics that characterize each of fifty five social and environmental conflicts related to oil and gas extraction in the Andean countries Peru Ecuador and Columbia She is interested not in promulgating a new theory of conflict but in examining the triggers of local hydrocarbons disputes and providing policy recommendations to resolve or prevent them

Armed Groups and Contemporary Conflicts Keith Krause, 2013-09-13 Armed groups operating beyond the state have become the most important actors in most contemporary wars and violent conflicts from Iraq and Afghanistan to Colombia and Somalia They come in a dizzying array of forms some informally linked to the state and state power others in opposition to the state some pursuing classic political goals others primarily predatory and large scale criminal enterprises All groups however challenge the state's Weberian monopoly of the legitimate use of force yet their origins evolution violent dynamics and relations with state power are poorly understood This interdisciplinary collection includes both conceptual and empirical studies of contemporary armed groups examining cases in Latin America Asia and Africa It brings sociological political economy and ethnographic approaches to bear on larger questions including armed groups and the changing nature of warfare the economic dimensions of their activities and means of engagement with armed actors It both broadens and sharpens our understanding of how force and violence are used in today's contemporary armed conflicts This book was published as a special issue of Contemporary Security Policy

**The Politics of the Periphery in Indonesia** John H. Walker, Glenn Banks, Minako Sakai, 2009-01-01 The Politics of the Periphery in Indonesia is a thought provoking examination of local politics and the dynamics of power at Indonesia's geographic and social margins After the fall of Suharto in 1998 and the introduction of a policy of decentralization in 2001 local stakeholders secured and consolidated decision making power and set about negotiating new relations with Jakarta The volume deals with power struggles and local national tensions looking among other things at resource control the historical roots of regional identity politics and issues relating to Chinese Indonesians The authors develop information in ways that transcend the post colonial territorial boundaries of Indonesia in the Malay Indonesian archipelago and use case studies to show how the changes described have galvanized Indonesian politics at the cultural and geographical peripheries

institutions that link them together This volume includes articles that engage with major theoretical questions such as the applicability of the ideals of social and economic equality to the global sphere the degree of justified partiality to compatriots and the nature and extent of the responsibilities of the affluent to address global poverty and other hardships abroad It also features articles that bring the theoretical insights of global justice thinkers to bear on matters of practical concern to contemporary societies such as policies associated with immigration international trade and climate change     A New Era of Nonviolence Tom H. Hastings, 2014-05-23 This book is an exploration of nonviolent strategies and tactics that have been used to prevent and end civil wars invasions and occupations The problem of war is examined in light of efforts to transform destructive conflict into constructive conflict Research into alternatives has produced a corpus of knowledge that enables civil society increasingly to expect success when it engages decision makers in peaceful conflict resolution The book asks the reader to consider the questions of social conflict using a cost benefit analysis which can reveal the advisability of strategic nonviolence Research into the causes and correlates of war is robust and when that research is applied to comparisons of conflict management methods numerous conclusions about potential strategies for ending war emerge     *Investment and Human Rights in Armed Conflict* Daria Davitti, 2019-05-30 This book analyses the way in which international human rights law IHRL and international investment law IIL are deployed or fail to be deployed in conflict countries within the context of natural resources extraction It specifically analyses the way in which IIL protections impact on the parallel protection of economic social and cultural rights ESC rights in the host state especially the right to water Arguing that current responses have been unsatisfactory it considers the emergence of the Protect Respect and Remedy framework and the Guiding Principles for Business and Human Rights jointly the Framework as a possible analytical instrument In so doing it proposes a different approach to the way in which the Framework is generally interpreted and then investigates the possible applicability of this recalibrated Framework to the study of the IHRL IIL interplay in a host country in a protracted armed conflict Afghanistan Through the emblematic example of Afghanistan the book presents a practical dimension to its legal analysis It uniquely portrays the elusive intersection between these two bodies of international law within a host country where the armed conflict continues to rage and a full economic restructuring is taking place away from the public eye not least through the deployment of IIL and the inaction or merely partial consideration of IHRL The book will be of interest to academics policy makers and practitioners of international organisations involved in IHRL IIL and or deployed in contexts of armed conflict     *An Introduction to Civil Wars* Karl R. mining in Zamfara to mention a few Nigeria faces new dimensions of resource related struggles The ravaging effects of these resource conflicts between crop farmers and Fulani herders in Nigeria s Middlebelt and states across Southern Nigeria call for urgent scholarly interventions with the Fulani cattle breeders onslaught altering the histories of many Nigerian families through deaths loss of homes and investments and permanent physical incapacity Currently there is an almost total breakdown of interethnic relations with political commentators acknowledging that Nigeria has never been so divided as it presently is in its history The struggles have now degenerated into kidnaps armed robbery and incessant targeted and random killings across the country compounding the already complex problem of insecurity in Nigeria The chapters in this volume engage with these issues presenting the different arguments on resource conflicts in Nigeria They draw insights from similar conflicts in Nigeria s colonial post independence past and events from around the world to proffer possible solutions to resource related confrontations in Africa By offering a collection of different intellectual perspectives on resource conflicts in Nigeria this volume will be an important reference material for understanding the diversity of thought patterns that underpin the struggle and policy approaches towards resolving conflict situations in Africa This volume will be of considerable interest to scholars of Africa researchers in the humanities social sciences and conflict studies and policymakers interested in understanding the resource crisis in Africa
