Are artefacts that is human made objects distinct from the natural things that they are made out of For example is a chair a thing distinct from the pieces of wood used in making it This question is intensely debated in contemporary metaphysics but it is little known that there was an equally heated and sophisticated debate concerning this issue in the late Middle Ages This book provides the first comprehensive reconstruction analysis and evaluation of this discussion looking at both the most famous figures such as William of Ockham as well as dozens of previously unstudied texts available in manuscript form only **Aristotle on the**

Nature of Community Adriel M. Trott, 2014 Adriel M Trott reads Aristotle s Politics through the internal cause definition of nature to develop an active and inclusive account of politics **A Vocabulary of the Ancient Commentators on Aristotle**

Richard D. McKirahan, 2021-12-16 An astounding project of analysis on more than one hundred translations of ancient philosophical texts this index of words found in the Ancient Commentators on Aristotle series comprises some 114 000 entries It forms in effect a unique dictionary of philosophical terms from the post Hellenistic period through to late antiquity and will be an essential reference tool for any scholar working on the meaning of these ancient texts As traditional dictionaries have usually neglected to include translation examples from philosophical texts of this period scholars interested in how meanings of words vary across time and author have been ill served This index fills a huge gap therefore in the lexical analysis of ancient Greek and has application well beyond the reading of ancient philosophical commentaries Bringing together the full indexes from 110 of the volumes published in Bloomsbury s Ancient Commentators on Aristotle series McKirahan has combined each word entry and analysed how many times particular translations occur He presents his findings numerically so that each meaning in turn has a note as to the number of times it is used For meanings that are found between one and four times the volume details are also given so that readers may quickly and easily look up the texts themselves *Confessions of a Heretic* Eric Leland Saak, 2025-06-15 This book is the second of a planned three volume

systematic theology under the title Confessions of a Heretic Volume One which has the subtitle Philosophical Considerations

was published by Archway in 2024 The project now turns to Theological Considerations with the forthcoming Volume Three being Ecclesiological Consideration Organized into three Parts Volume Two focuses on the theological endeavor and the doctrines distinctive to Christianity namely the Trinity Jesus Christ sin and salvation Based on the foundational distinctions and definitions explicated in Volume One the current volume seeks to ask what the philosophical considerations imply for basic traditional understandings and terminology of Christian theology including that of Jesus of Nazareth his crucifixion and resurrection The project as a whole adopts a trinitarian structure with this second volume focused on God the Son or as here termed God the Perfector The argument is that Christian Theology needs to shift from an anthropocentric to a theocentric approach recognizing human beings simply as creatures and having the courage to face what that entails Yet doing so necessitates a radical reconceptualization of the very foundations of Christian Theology itself in the attempt to combat idolatry

Rohault's System of Natural Philosophy Jacques Rohault, 1729 **Hayek and Natural Law** Erik Angner, 2007-04-05 Providing a radical new reading of Hayek's life and work this new book by an important Hayekian scholar dispels many of the mysteries surrounding one of the most prominent economists and political philosophers of the twentieth century Angner argues that Hayek's work should be seen as continuous with the Natural Law tradition going on to analyze the response to his work and explain why some have found his ideas so attractive and why others have found them so unpersuasive The book develops novel accounts of his thought on spontaneous order information and coordination cultural evolution This fresh and incisive analysis is the perfect introduction to Hayek's thought for academics involved with philosophical economics and the history of economic ideas as well as for scholars of all levels seeking a new interpretation or deeper understanding of the origins of his work

Dividing Reality Eli Hirsch, 1997 The central question in this book is why it seems reasonable for the words of our language to divide up the world in ordinary ways rather

than other imaginable ways Hirsch calls this the division problem His book aims to bring this problem into sharp focus to distinguish it from various related problems and to consider the best prospects for solving it In exploring various possible responses to the division problem Hirsch examines series of division principles which purport to express rational constraints on how our words ought to classify and individuate The ensuing discussion deals with a wide range of metaphysical and epistemological topics including projectibility and similarity alternative analyses of natural properties and things the inscrutability of reference and the relevance of such pragmatic notions as salience and economy The final chapters of the book develop what Hirsch contends is the most promising response to the division problem a theory in which constraints on classification and individuation are seen to derive from the necessary structure of fine grained propositions and the necessary dependence of some concepts on others *Drosscape: Wasting Land Urban America* Alan Berger, 2007-05-03

Annotation Do you really know what's under that new house you just bought How about what's underneath the neighbourhood playground Was the big box retailer down the street built atop a toxic site These are just a few of the worrisome scenarios as our cities begin a stealthy relocation of industrial facilities from the inner city to the urban periphery These are the places Alan Berger has coined drosscapes and this is his guide to the previously ignored field of waste landscapes Ideas for a Hermeneutic Phenomenology of the Natural Sciences Joseph J. Kockelmans, 1993-07-31

I have always had a great interest in the philosophy of science At first this interest led to reflections on the mathematical sciences I later my focus shifted to the natural sciences 2 during the past twenty years or so my interest has also included the behavioral social and historical sciences From the very start my interest was always combined with a concern for the history of the sciences In philosophy of science proper my main interest was not in logical methodological or even epistemological issues although I obviously studied and taught the most important insights proposed in the leading publications in this large field of study My concern has always been predominantly ontological and in that area I have approached the relevant issues from a 4 phenomenological perspective For what follows it is perhaps of some importance to mention here that I came to phenomenology in a rather indirect way through the philosophy of Nicolai Hartmann Yet it was mainly the influence of Herman Van Breda and Alphonse De Waelhens which led me directly to Husserl's phenomenology At first I focused almost exclusively on Husserl's phenomenology Later I moved in the direction of the philosophy of Merleau Ponty and 1 Cf Joseph J Kockelmans *Philosophy of Mathematics in the Middle Ages* in Dutch Langemark Vonksteen 1953 *On the Mode of Being of Mathematical Entities* in Dutch in *Tijdschrift voor Philosophie* 16 1954 pp 289-331 2 Joseph J Kockelmans *On Time and Space*

An Introduction to Natural Theology Maurice R. Holloway, 2018-06-21 What is the God of the philosopher Can the philosopher that is to say can human reason unenlightened by the revealed word come to a true and secure understanding of He Who Is Is it possible for mere man without the impact of a personal experience intimate and intuitive to arrive by means of an objective demonstration at an absolute affirmation that the Being we call God exists or that He is Pure Act Existence

Itself because without him the world of our experience is unintelligible a complete contradiction And even if we admit as all Christian philosophers must that unaided reason is able by its own power to reach an objectively true and secure assent that God exists is there any evidence in the recorded history of our world that man without the directive knowledge of revelation ever did secure by a metaphysical effort this absolute truth that the Ipsum Esse exists Whatever be the answer to this difficult problem and we do not pretend to know it it is obvious that Father Holloway in composing his philosophical approach to God allowed himself to be guided by the knowledge of faith Indeed he must have prayed often for the enlightenment which the supernatural motion of divine grace brings even to the limited and imperfect intellect of a philosopher From the Foreword by Henri Renard S J *John Buridan, Quaestiones super octo libros Physicorum Aristotelis (secundum ultimam lecturam)* John Buridan, 2015-05-19 John Buridan d ca 1360 was one of the most talented and influential philosophers of the later Middle Ages He spent his career as a master in the Arts Faculty at the University of Paris producing commentaries and independent treatises on logic metaphysics natural philosophy and ethics His Questions Commentary on the eight books of Aristotle s Physics is the most important witness to Buridan s teachings in the field of natural philosophy The commentary was widely read during the later Middle Ages and the Renaissance This volume presents the first critical edition of books I II of the final redaction of Buridan s Questions Commentary on the Physics The critical edition of the Latin text is accompanied by a detailed guide to the contents of Buridan s questions **The Theological and Literary Journal** ,1850 *Natural Law, Constitutionalism, Reason of State, and War* J. A. Fernández-Santamaría, 2005 Natural Law Constitutionalism Reason of State and War Counter Reformation Spanish Political Thought Volumes I and II aims at understanding how Spanish thinkers in the sixteenth and early seventeenth centuries approached the emerging institution of the state The volumes are divided evenly into four distinct but related parts that cover the Spaniards central concerns In the first a fundamental question is asked Is the state a natural institution In the second the theme is the best form of government The third part is concerned with the imperative need to define the ethical boundaries beyond which the state must not trespass Finally the fourth part examines the question of war as an instrument of policy **The Soul** John Patrick Rowan, 2008-11-18 Psychology that ignores the soul is indeed an odd sort of psychology But such it is in many colleges today On the basis of thoroughgoing materialism it has to be nothing more than the physiology of the nervous system Hence a sound philosophical study of the soul is timely Where are we to find an exposition and proof of the basic truths on which the structure of psychology must be erected They are in St Thomas DE ANIMA This opusculum discusses twenty one questions about the soul among which are the following Whether the angel and the human soul differ specifically Whether the soul is in the whole body and in each part of it Whether the soul is identical with its powers Whether the soul existing apart from the body can suffer punishment by corporeal fire Doctor Rowan s translation though a faithful rendition of the original is in clear readable English The value of this version is greatly enhanced by copious footnotes of two kinds exact citations of authors e g

Aristotle St Augustine to whom St Thomas refers explanations of terms and views that otherwise might be obscure to modern readers The translator has also provided a comprehensive index

Natural Law and Laws of Nature in Early Modern Europe Michael Stolleis, 2016-04-22 This impressive volume is the first attempt to look at the intertwined histories of natural law and the laws of nature in early modern Europe These notions became central to jurisprudence and natural philosophy in the seventeenth century the debates that informed developments in those fields drew heavily on theology and moral philosophy and vice versa Historians of science law philosophy and theology from Europe and North America here come together to address these central themes and to consider the question was the emergence of natural law both in European jurisprudence and natural philosophy merely a coincidence or did these disciplinary traditions develop within a common conceptual matrix in which theological philosophical and political arguments converged to make the analogy between legal and natural orders compelling This book will stimulate new debate in the areas of intellectual history and the history of philosophy as well as the natural and human sciences in general

History of the Concept of Time Martin Heidegger, 1992 Heidegger's lecture course at the University of Marburg in the summer of 1925 an early version of Being and Time 1927 offers a unique glimpse into the motivations that prompted the writing of this great philosopher's master work and the presuppositions that gave shape to it The book embarks upon a provisional description of what Heidegger calls Dasein the field in which both being and time become manifest Heidegger analyzes Dasein in its everydayness in a deepening sequence of terms being in the world worldhood and care as the being of Dasein The course ends by sketching the themes of death and conscience and their relevance to an ontology that makes the phenomenon of time central Theodore Kisiel's outstanding translation permits English speaking readers to appreciate the central importance of this text in the development of Heidegger's thought
