sociocultural theory     **Writing the Environment in Nineteenth-Century American Literature** Steven Petersheim,Madison Jones IV,2015-09-17 The nineteenth century roots of environmental writing in American literature are often mentioned in passing and sometimes studied piece by piece Writing the Environment in Nineteenth Century American Literature The Ecological Awareness of Early Scribes of Nature brings together numerous explorations of environmentally aware writing across the genres of nineteenth century literature Like Lawrence Buell the authors of this collection find Thoreau's writing a touchstone of nineteenth century environmental writing particularly focusing on Thoreau's claim that humans may function as scribes of nature However these studies of Thoreau's antecedents contemporaries and successors also reveal a range of other writers in the nineteenth century whose literary treatments of nature are often more environmentally attuned than most readers have noticed The writers whose works are studied in this collection include canonical and forgotten writers men and women early nineteenth century and late nineteenth century authors pioneers and conservationists They drew attention to the conflicted relationships between humans and the American continent as experienced by Native Americans and European Americans Taken together these essays offer a fresh perspective on the roots of environmental literature in nineteenth century American nonfiction fiction and poetry as well as in multi genre compositions such as the travel writings of Margaret Fuller Bringing largely forgotten voices such as John Godman alongside canonical voices such as Nathaniel Hawthorne Herman Melville Walt Whitman and Emily Dickinson the authors whose writings are studied in this collection produced a diverse tapestry of nascent American environmental writing in the nineteenth century From early nineteenth century writers such as poet Philip Freneau and novelist Charles Brockden Brown to later nineteenth century conservationists such as John James Audubon and John Muir Scribes of Nature shows the development of an environmental consciousness and a growing conservationist ethos in American literature Given their often surprisingly healthy respect for the natural environment these nineteenth century writers offer us much to consider in an age of environmental crisis The complexities of the supposed nature culture divide still work into our lives today as economic and environmental issues are often seen at loggerheads when they ought to be seen as part of the same conversation of what it means to live healthy lives and to pass on a healthy world to those who follow us in a world where human activity is becoming increasingly threatening to the health of our planet     [Discourses in Place](#) Ronald Scollon,Suzanne B. **Language and Social Change in Central Europe** Patrick Stevenson, 2010-07-31 This book explores the dynamics of language and social change in central Europe in the context of the end of the Cold War and eastern expansion of the European Union One outcome of the profound social transformations in central Europe since the Second World War has been the reshaping of the relationship between particular languages and linguistic varieties especially between national languages and regional or ethnic minority languages Previous studies have investigated these transformed relationships from the macro perspective of language policies while others have taken more fine grained approaches to individual experiences with language Combining these two perspectives for the first time and focusing on the German language which has a uniquely complex and problematic history in the region the authors offer an understanding of the complex constellation of language politics in central Europe Stevenson and Carl's analysis draws on a range of theoretical conceptual and analytical approaches language ideologies language policy positioning theory discourse analysis narrative analysis and life histories and a wide range of data sources from European and national language policies to individual language biographies The authors demonstrate how the relationship between German and other languages has played a crucial role in the politics of language and processes of identity formation in the recent history of central Europe

Discursive Pragmatics Jan Zienkowski, Jan-Ola Östman, Jef Verschueren, 2011-06-16 The ten volumes of Handbook of Pragmatics Highlights focus on the most salient topics in the field of pragmatics thus dividing its wide interdisciplinary spectrum in a transparent and manageable way While the other volumes select specific philosophical cognitive grammatical social cultural variational or interactional angles this 8th volume focuses on theories and phenomena at the level of discourse but leaving aside conversational interaction It provides the reader with pragmatics oriented information on discourse analysis critical discourse analysis and critical linguistics as well as text linguistics and appraisal theory while introducing other specific approaches to discourse through concepts such as polyphony intertextuality genre and nonciliation Furthermore topics such as public discourse narrative figures of speech cohesion and coherence pragmatic markers manipulation and humor are all dealt with in separate chapters The binding idea explained in the introduction is that discursive pragmatics may serve as a platform for a diversity of perspectives on discourse as they have emerged not only in the language sciences but also in the humanities and social sciences in general

*The Natural History of the Sign* Chris Barnham, 2022-07-18 Our

understanding of CS Peirce and his semiotics is largely influenced by a twentieth century perspective that prioritizes the sign as a cultural artifact or as one that distorts in some way our understanding of the empirical world. Such a perspective will always undermine appreciation of Peirce as a philosopher who viewed signs as the very mechanisms that enable us to understand reality through concept formation. The key to this repositioning of Peirce is to place his work in the broad frame of Hegelian philosophy. This book evaluates in detail the parallels that exist between Peircean and Hegelian thought highlighting their convergences and also the points at which Peirce departs from Hegel's position. It also considers the work of Vygotsky on concept formation showing that both are in fact working within the same Hegelian template. This book therefore contributes to our broader understanding of Peircean semiotics. But by drawing in Vygotsky under the same theoretical auspices it demonstrates that Peirce has much to offer contemporary educational learning theory.

Scripture Natural History, Or a Descriptive Account of the Zoology, Botany and Geology of the Bible William Carpenter, 1828

**Scripture Natural History; or, a Descriptive account of the zoology, botany, & geology of the Bible. Illustrated by engravings** William CARPENTER (Editor of the "Political Letter.".), 1828     **Black and White Manhattan** Thelma Wills Foote, 2004-10-28 Race first emerged as an important ingredient of New York City's melting pot when it was known as New Amsterdam and was a fledgling colonial outpost on the North American frontier. Thelma Wills Foote details the arrival of the first immigrants including African slaves and traces encounters between the town's inhabitants of African, European and Native American descent showing how racial domination became key to the building of the settler colony at the tip of Manhattan Island. During the colonial era the art of governing the city's diverse and factious population Foote reveals involved the subordination of confessional linguistic and social antagonisms to binary racial difference. Foote investigates everyday formations of race in slaveowning households on the colonial city's streets at its docks, taverns and marketplaces and in the adjacent farming districts. Even though the northern colonial port town afforded a space for black resistance that setting did not. Foote argues effectively undermine the city's institution of black slavery. This history of New York City demonstrates that the process of racial formation and the mechanisms of racial domination were central to the northern colonial experience and to the founding of the United States.

*The Book Buyer's Manual* Putnam, firm, publishers, New York, 1853     Colonizing Nature Beth Fowkes Tobin, 2011-06-07 With its control of sugar plantations in the Caribbean and tea, cotton and indigo production in India Britain in the eighteenth and nineteenth centuries dominated the global economy of tropical agriculture. In Colonizing Nature Beth Fowkes Tobin shows how dominion over the tropics as both a region and an idea became central to the way in which Britons imagined their role in the world. Tobin examines georgic poetry, landscape portraiture, natural history writing and botanical prints produced by Britons in the Caribbean, the South Pacific and India to uncover how each played a crucial role in developing the belief that the tropics were simultaneously paradisiacal and in need of British intervention and management. Her study examines how slave garden portraits denied the horticultural expertise of

the slaves how the East India Company hired such artists as William Hodges to paint and thereby Anglicize the landscape and gardens of British controlled India and how writers from Captain James Cook to Sir James E Smith depicted tropical lands and plants Just as mastery of tropical nature and especially its potential for agricultural productivity became key concepts in the formation of British imperial identity Colonizing Nature suggests that intellectual and visual mastery of the tropics through the creation of art and literature accompanied material appropriations of land labor and natural resources Tobin convincingly argues that the depictions of tropical plants gardens and landscapes that circulated in the British imagination provide a key to understanding the forces that shaped the British Empire     **The Book Buyer's Manual** G.P.
