Commodity Price Volatility and Inclusive Growth in Low-Income Countries Mr.Rabah Arezki,Ms.Catherine A Pattillo,Mr.Marc G Quintyn,Min Zhu,2012-10-24 In the years following the global financial crisis many low income countries experienced rapid recovery and strong economic growth However many are now facing enormous difficulties because of rapidly rising food and fuel prices with the threat of millions of people being pushed into poverty around the globe The risk of continued food price volatility is a systemic challenge and a failure in one country has been shown to have a profound impact on entire regions This volume addresses the challenges of commodity price volatility for low income countries and explores some macroeconomic policy options for responding to commodity price shocks The book then looks at inclusive growth policies to address inequality in commodity exporting countries particularly natural resource rich countries Perspectives from the Middle East and North Africa sub Saharan Africa emerging Asia and Mexico are presented and finally the role of the international donor community is examined This volume is a must read for policymakers everywhere from those in advanced donor countries to those in countries with the poorest and most vulnerable populations

The Art of Planning Leland S. Burns,John Friedmann,2012-12-06 The work of Harvey S Perloff stands as a landmark in the evolution of Anglo American planning doctrine It is impossible to fully capture the essence of the published work in a paragraph page or even an entire essay Yet its highpoints can be identified His work was innovative reformist comprehensive and oriented toward the future In emphasizing the greater importance of people compared to things Perloff repeatedly prodded planners to be concerned with human needs and values He was critical of the past But inasmuch as he devoted more effort to envisioning what could lie ahead than in recalling the past his work was markedly optimistic He once admitted in writing to his built in weakness for expecting rational socially oriented solutions ultimately to win out no matter what the objective situation seems to be To some the expectation may be seen as naive to others as a faith in the wisdom of humankind to take the best course However received Perloff's optimism served as a powerful stimulant to keep moving ahead for the best that would come of it Institutions and the ways they should be shaped and reshaped were of central concern for institutions though he rarely used the term were the instruments through which knowledge was translated into action

Environmental Costs of Natural Resource Commodities Margaret E. Slade,1992 What would happen to resource production consumption and revenue if the developing countries adopted the environmental standards set by the industrial countries while at the same time the industrial countries increased their spending on environmental protection by the same fraction as the developing countries

Rent, Resources, Technologies Alberto Quadrio Curzio,Fausta Pellizzari,2013-03-09 Rent resources and technologies are three crucial issues to the understanding of history and economics The scarcity of resources its interplay with technology and the role of rent in explaining both economic growth and income distribution are investigated by adopting a multi sectoral and non proportional model where scarce resources impose several scale

constraints that may slow growth but may contribute to further development of new technologies In this dynamic framework the category of rent acquires new dimensions with far reaching implications for both the system of prices and the distribution of income The analytical and formal theoretical perspective of this book could be used as a basis for future historical and quantitative studies

Global Justice and Resource Curse Frank Aragbonfah Abumere, 2021-08-12 This book explores whether any theory alone is sufficiently capable of resolving the complexity of global justice arguing that a combination of statism and cosmopolitanism is needed In current times xenophobia nationalism and populism have amplified othering in both domestic and international politics In global justice the dichotomy between the polis and the cosmopolis separates statism from cosmopolitanism Using resource curse as a complex case of global justice the author demonstrates how neither statism nor cosmopolitanism alone are sufficient but goes on to argue that a combination of the two theories is simultaneously necessary and sufficient to resolve the complexity of global justice He demonstrates how statism is primarily applied to the institutional dimensions of resource curse and only secondarily applied to the interactional dimensions while cosmopolitanism is applied to the interactional dimensions but only secondarily applied to the institutional dimensions and therefore a combination of both theories is needed to resolve the problem of resource curse using the strength of the former to compensate for the weakness of the latter and vice versa Global justice is widely taught and researched as one of the most important areas in political philosophy and political theory This book will be of great interest to students and researchers philosophers and political scientists of African politics political theory political philosophy international relations and international development

Commodity and Resource Policies in Agricultural Systems Richard E. Just, Nancy Bockstael, 2012-12-06 Agricultural natural resource and environmental problems are becoming increasingly interdependent For example soil erosion is largely determined by agricultural land use Both water use and water contamination depend on land use and technology choice in agriculture In many areas the fertilizers and pesticides used in agriculture are major pollutants of ground and surface water having adverse effects on drinking water and fisheries Agricultural pollutants such as pesticides also produce adverse health effects for agricultural workers and the consuming public On the other hand the availability of water resources and the value of competing land uses influence agricultural production Additionally regional air quality problems may affect crops and global environmental trends may have long term implications for farming Agriculture natural resources and environmental quality are all heavily regulated in the U S but they are done so by a vast array of competing or unrelated agencies within the U S Departments of Agriculture Interior and Commerce the Environmental Protection Agency and numerous state agencies Considering the large number of bureaucratically remote public agencies involved and the pervasive interdependencies

between agriculture natural resources and the environment policies develop which are at best uncoordinated and at worst conflicting and counterproductive These policies have become sources of controversy as different interest groups struggle to affect their implementation as different agencies have fought for administrative control and as legislative bodies have attempted to enact piecemeal changes
