

Naturalism and Anti-Naturalism in the Philosophy of Social Science

A review of Francesco Guala's paper.

Naturalism And Social Science

Mark Risjord

Naturalism And Social Science:

Naturalism and Social Science David Thomas, 1980-01-24 This 1979 text addresses the ways in which the dominant theories in large areas of Western social science have been subject to strong criticisms particularly of their supposed philosophical deficiencies In the philosophy of science this resulted in empiricist views being replaced by an emphasis on the potential obstinacy of theory in the face of the empirical world After introducing this contemporary philosophy of science Dr Thomas uses it to argue that social study can both retain the natural scientific commitment to the constraint of the external world and assimilate the sorts of philosophical criticisms that were made of the old social scientific theories In particular he shows that social study understood in terms of the new philosophy of science can give an account of the former's distinctive concerns with issues of the meaning and value of social life Dr Thomas supports his abstract arguments by detailed case studies

Normativity and Naturalism in the Philosophy of the Social Sciences Mark Risjord, 2016-01-22 Normativity and Naturalism in the Social Sciences engages with a central debate within the philosophy of social science whether social scientific explanation necessitates an appeal to norms and if so whether appeals to normativity can be rendered scientific This collection brings together contributions from a diverse group of philosophers who explore a broad but thematically unified set of questions many of which stem from an ongoing debate between Stephen Turner and Joseph Rouse both contributors to this volume on the role of naturalism in the philosophy of the social sciences Informed by recent developments in both philosophy and the social sciences this volume will set the benchmark for contemporary discussions about normativity and naturalism This collection will be relevant to philosophers of social science philosophers interested in the rule following and metaphysics of normativity and theoretically oriented social scientists

Reality and Self-Realization MinGyu Seo, 2014-03-21 Since the publication of Roy Bhaskar's A Realist Theory of Science in 1975 critical realism has been evolved as one of the new developments in the areas of philosophy of natural and social science which offers an alternatively fresh view to the existing theories including positivism and post modernism Bhaskar's intellectual movement which is now fully international and multi disciplinary and continues to influence the philosophies of natural and social science has transformed into Dialectical Critical Realism hereafter DCR and the philosophy of meta Reality MinGyu will conclude that his anti anthropic Non duality continues through all the steps of Bhaskar's thought maintaining the consistency of his scientific metaphysical and spiritual journey The anti anthropic motif is fully realized in the philosophy of Non duality the constellational identification of dualism duality and non duality in his meta Reality Defending Bhaskar against Collier Agar and Morgan MinGyu tries to show how its anti anthropic and non dualistic foundation is sustained through the whole of Bhaskar's journey involving a transformation of its subject matters from reality to the dialectic of reality to the real truth underlying the former stages This book provides an indispensable resource for all students of philosophy and the human sciences

Science and the Study of God Alan G. Padgett, 2003 For many today religion and science are seen

as enemies battling for human hearts and minds In this new book Alan Padgett shows that they can and should work together in developing a worldview that is at once spiritually meaningful and scientifically sound Pursuing a perspective that he calls the mutuality model Padgett highlights the contributions that both religion and science make to a full understanding of the world and our place in it He argues convincingly that the natural sciences and theology can rationally influence each other without giving up their important distinctives and methods The book explores the nature of informal reason and worldviews the character of theology as a spiritual and academic discipline and the question of what counts as natural science Along the way Padgett discusses such topics as thermodynamics time resurrection and the historical Jesus as examples of the powerful model that he is developing

Philosophy of Anthropology and Sociology, 2011-08-12 This volume concerns philosophical issues that arise from the practice of anthropology and sociology The essays cover a wide range of issues including traditional questions in the philosophy of social science as well as those specific to these disciplines Authors attend to the historical development of the current debates and set the stage for future work Comprehensive survey of philosophical issues in anthropology and sociology Historical discussion of important debates Applications to current research in anthropology and sociology

[New Directions in the Philosophy of Science](#) Maria Carla Galavotti, Dennis Dieks, Wenceslao J. Gonzalez, Stephan Hartmann, Thomas Uebel, Marcel Weber, 2014-06-02 This volume sheds light on still unexplored issues and raises new questions in the main areas addressed by the philosophy of science Bringing together selected papers from three main events the book presents the most advanced scientific results in the field and suggests innovative lines for further investigation It explores how discussions on several notions of the philosophy of science can help different scientific disciplines in learning from each other Finally it focuses on the relationship between Cambridge and Vienna in twentieth century philosophy of science The areas examined in the book are formal methods the philosophy of the natural and life sciences the cultural and social sciences the physical sciences and the history of the philosophy of science

Philosophy of Social Science Mark Risjord, 2014-05-16 The Philosophy of Social Science A Contemporary Introduction examines the perennial questions of philosophy by engaging with the empirical study of society The book offers a comprehensive overview of debates in the field with special attention to questions arising from new research programs in the social sciences The text uses detailed examples of social scientific research to motivate and illustrate the philosophical discussion Topics include the relationship of social policy to social science interpretive research action explanation game theory social scientific accounts of norms joint intentionality reductionism causal modeling case study research and experimentation

[Routledge Handbook of Macroeconomic Methodology](#) Jesper Jespersen, Victoria Chick, Bert Tieben, 2023-06-20 The present macroeconomic crisis has demonstrated that a deeper understanding of the importance of relevant macroeconomic theories and methods is wanting Additionally lack of methodological awareness is behind much of the disagreement within macroeconomics which

looked upon from outside often appears incomprehensible The Handbook gives a structured presentation of the study of principles and procedures by which macroeconomics is researched taught and communicated both within academia and to a wider audience and why specific theories research strategies and teaching are preferred The principles of selecting theory relevant to real world problems are the core of methodology This book contains a broad range of arguments behind theory construction and appraisal and the consequences of these choices within the field of macroeconomics An international range of experts provide clear analysis of key concepts ideas and principles to give academics students and others a better understanding of the macroeconomics behind policy conclusions which are put forward at different levels **On the Moral**

Nature of the Universe Nancey C. Murphy, George Francis Rayner Ellis, Ellis and Murphy show how contemporary sciences actually support a religiously based ethic of nonviolence not by appealing to the Enlightenment's mechanistic Creator God or revelation's Father God but by discerning the transcendent ground in the laws of nature the emergence of intelligent freedom and the echoes of kenotic self giving in cosmology and biology *The Oxford Handbook of Philosophy of Science*

Paul Humphreys, 2016-08-04 This handbook provides both an overview of state of the art scholarship in philosophy of science as well as a guide to new directions in the discipline Section I contains broad overviews of the main lines of research and the state of established knowledge in six principal areas of the discipline including computational physical biological psychological and social sciences as well as general philosophy of science Section II covers what are considered to be the traditional topics in the philosophy of science such as causation probability models ethics and values and explanation Section III identifies new areas of investigation that show promise of becoming important areas of research including the philosophy of astronomy and astrophysics data complexity theory neuroscience simulations post Kuhnian philosophy post empiricist epistemology and emergence Most chapters are accessible to scientifically educated non philosophers as well as to professional philosophers and the contributors all leading researchers in their field bring diverse perspectives from the North American European and Australasian research communities This volume is an essential resource for scholars and students

Sociological Dilemmas Piotr Sztompka, 2013-09-11 Sociological Dilemmas Toward a Dialectic Paradigm aims to build a new paradigm in sociological theory by using the method of dialectical critique patterned on the approach utilized by Karl Marx The book explores the sociological heritage with the theoretical works of Karl Marx as the primary basis of exposition and analysis Chapters are devoted to the discussion of the theoretical crisis of sociology the division of sociology between two opposing methodologies dissociation of sociology from the prescientific traditions of social thought and the conclusion reached by the author after an extensive analysis of sociological theories presented in the book The book will be of value to sociologists teachers and students of the social sciences **Matter and Mind** Mario Bunge, 2010-09-14 This book discusses

two of the oldest and hardest problems in both science and philosophy What is matter and What is mind A reason for tackling both problems in a single book is that two of the most influential views in modern philosophy are that the universe is mental

idealism and that the everything real is material materialism Most of the thinkers who espouse a materialist view of mind have obsolete ideas about matter whereas those who claim that science supports idealism have not explained how the universe could have existed before humans emerged Besides both groups tend to ignore the other levels of existence chemical biological social and technological If such levels and the concomitant emergence processes are ignored the physicalism spiritualism dilemma remains unsolved whereas if they are included the alleged mysteries are shown to be problems that science is treating successfully *Antipositivist Theories of the Sciences* N. Stockman,2013-03-09 The sciences are too important to be left exclusively to scientists and indeed they have not been The structure of scientific knowledge the role of the sciences in society the appropriate social contexts for the pursuit of scientific inquiry have long been matters for reflection and debate about the sciences carried on both within academe and outside it Even within the universities this reflection has not been the property of any single discipline Philosophy might have been first in the field but history and the social sciences have also entered the fray For the latter new problems came to the fore since reflection on the sciences is in the case of the social sciences necessarily also reflection on themselves as sciences Reflection on the natural sciences and self reflection by the social sciences came to be dominated in the 1960s by the term positivism At the time when this word had been invented the sciences were flourishing their social and material environment had become increasingly favourable to scientific progress and the sciences were pointing the way to an optimistic future In the later twentieth century however positivism came to be a word used more frequently by those less sure of nineteenth century certainties In both sociology and philosophy positivism was now something to be rejected and symbolizing the collapse of an earlier consensus it became itself the shibboleth of a new dissensus as different groups of reflective thinkers in rejecting positivism rejected something different and often rejected each other **The Power of International Theory** Fred Chernoff,2012-12-06 This new study challenges how we think about international relations presenting an analysis of current trends and insights into new directions It shows how the discipline of international relations was created with a purpose of helping policy makers to build a more peaceful and just world However many of the current trends post positivism constructivism reflectivism and post modernism share a conception of international theory that is inherently incapable of offering significant guidance to policy makers The Power of International Theory critically examines these approaches and offers a novel conventional causal alternative that allows the reforging of a link between IR theory and policy making While recognizing the criticisms of earlier forms of positivism and behaviouralism the book defends holistic testing of empirical principles methodological pluralism criteria for choosing the best theory a notion of causality and a limited form of prediction all of which are needed to guide policy makers This is an essential book for all students and scholars of international relations The Question of Methodological Naturalism Jason N. Blum,2018-09-11 The traditions and institutions that we call religions abound with references to the supernatural ancestral spirits karma the afterlife miracles revelation deities etc How are students of

religion to approach the behaviors doctrines and beliefs that refer to such phenomena which by their very nature are supposed to defy the methods of empirical research and the theories of historical scholarship That is the question of methodological naturalism The Question of Methodological Naturalism offers ten thoughtful engagements with that perennial question for the academic study of religion Contributors include established senior scholars and newer voices propounding a range of perspectives resulting in both surprising points of convergence and irreconcilable differences in how our shared discipline should be conceptualized and practiced *The SAGE Dictionary of Qualitative Inquiry* Thomas A.

Schwandt,2014-12-19 This Fourth Edition of Thomas A Schwandt s one of a kind guide to the terms and phrases that help shape the origins purpose logic meaning and methods of the practices known as qualitative inquiry features 20 additional terms as well as a restructured Reader s Guide Key references have been updated and select terms and phrases from previous editions have been reorganized and greatly expanded Together the dictionary entries provide a guide to the methodological and epistemological concepts and theoretical orientations of qualitative inquiry This unique resource is ideal for readers who are navigating various perspectives on qualitative inquiry working on a qualitative dissertation or are launching their own investigations into the issues covered *The Present Situation in the Philosophy of Science* Friedrich Stadler,2010-05-19 This volume is a serious attempt to open up the subject of European philosophy of science to real thought and provide the structural basis for the interdisciplinary development of its specialist fields but also to provoke reflection on the idea of European philosophy of science This efforts should foster a contemporaneous reflection on what might be meant by philosophy of science in Europe and European philosophy of science and how in fact awareness of it could assist philosophers interpret and motivate their research through a stronger collective identity The overarching aim is to set the background for a collaborative project organising systematising and ultimately forging an identity for European philosophy of science by creating research structures and developing research networks across Europe to promote its development *A Companion to Metaphysics* Jaegwon Kim,Ernest Sosa,Gary S. Rosenkrantz,2009-03-12 Fully extended and revised A Companion to Metaphysics 2ndEdition includes a section of detailed review essays fromrenowned metaphysicians and the addition of more than 30 newencyclopedic entries taking the number of entries to over 300 Includes revisions to existing encyclopedic entries Features more than 30 all new A to Z entries Offers a section of in depth essays from renownedmetaphysicians Provides the most complete and up to date reference guide forstudents and professionals alike

Contemporary Perspectives in Philosophy and Methodology of Science Wenceslao J. González,2006 Nowadays philosophy and methodology of science appear as a combination of novelty and continuity This blend is clear both in the general approaches to science those thought of as any science and in the specific perspectives on every science either formal or empirical There are new topics for philosophical reflection such as key issues in philosophy of medicine and central problems raised by neuroscience Thus new contents have brought attention to aspects that previously went almost unnoticed

In addition there are new angles for philosophical study such as the repercussion of society on scientific activity in aims processes and results But the background of the main philosophical and methodological trends of the twentieth century is in many ways still in place
