## **Naturalists Explorers Pioneers:**

*Naturalists, Explorers, & Pioneers* Alton Anthony Lindsey, 1980      **The Great Naturalists** Robert Huxley, 2019-09-24

The story of natural history as seen through the lives observations and discoveries of the world's greatest naturalists. We owe a debt of gratitude to the naturalists who described, experimented, collected, and gave us the means to understand the natural world. They came from all over the globe from classical times to the end of the nineteenth century when natural history changed from a mainly amateur pursuit to today's specialized scientific profession. Braving dangers including storms, pirates, and disease in pursuit of cataloging the natural world, pioneers such as Alexander von Humboldt and Charles Darwin changed the course of science with their groundbreaking theories. This book includes many naturalists who are well known such as the earliest great natural historian Aristotle, Carl Linnaeus, the man who brought order to nature, the ornithologist and painter John James Audubon, and Georges Cuvier who established the concept of extinction. Others are now given their rightful place: Antony van Leeuwenhoek who made his own microscopes and discovered bacteria, and Mary Anning, the princess of paleontology who had an amazing self-taught talent for finding fossils. Many of these people were great artists as well as scientists, and *The Great Naturalists* is illustrated with a selection of beautiful and precise paintings and drawings of birds, animals, fossils, fish, shells, and rocks from the unparalleled collections of the Natural History Museum, London.      **Pioneers In Microbiology: The Human Side Of Science** King-thom Chung, Jong-kang Liu, 2017-08-23

Pasteurization, penicillin, Koch's postulates, and gene coding: These discoveries and inventions are vital yet commonplace in modern life but were radical when first introduced to the public and academia. In this book, the life and times of leading pioneers in microbiology are discussed in vivid detail, focusing on the background of each discovery and the process in which they were developed, sometimes by accident or sheer providence.      **The Explorers of South America** Edward Julius Goodman, 1992

A narrative history of exploration from Christopher Columbus to the 19th century with journal excerpts, diaries, and other writings of the explorers themselves. Goodman has marshaled his wide-ranging research and lifelong interest in exploration into a comprehensive scholarly history. A reprint of the original 1972 edition, the tales have lost none of their luster.      **Birds of Mississippi** William H. Turcotte, David L. Watts, 1999

The first book on the diversity, distribution, conservation, and history of birds in the Magnolia State.      **Montana's Pioneer Naturalist** George M. Dennison, 2016-09-21

A naturalist on Montana's academic frontier, passionate conservationist Morton J. Elrod was instrumental in establishing the Department of Biology at the University of Montana as well as Glacier National Park and the National Bison Range. In *Montana's Pioneer Naturalist*, the first in-depth assessment of Elrod's career, George M. Dennison reveals how one man helped to shape the scholarly study of nature and its institutionalization in the West at the turn of the century. Elrod moved to Missoula in 1897, just four years after the state university's founding, and participated in virtually every aspect of university life for almost forty years. To reveal the depths of this pioneer scientist's influence on the growth of his university, his state, and the academic fields he worked in

author George M Dennison delves into state and university archives including Elrod's personal papers Although Elrod was an active participant in bison conservation and the growth of the National Park Naturalist Service much of his work focused on Flathead Lake where he surveyed local life forms and initiated the university's biological station one of the first of its kind in the United States Yet at heart Elrod was an educator who desired to foster in his students a love of nature which he said should give health to any one and supply knowledge of greatest value either to the individual or to society or to both In this biography of a prominent scientist now almost forgotten Dennison longtime president of the University of Montana demonstrates how Elrod's scholarship and philosophy regarding science and nature made him one of Montana's most distinguished naturalists conservationists and educators
