The Modern State Christopher Pierson, 2012-08-06 The new edition of this well established and highly regarded textbook continues to provide the clearest and most comprehensive introduction to the modern state It examines the state from its historical origins at the birth of modernity to its current jeopardized position in the globalized politics of the 21st Century The book has been entirely revised and updated throughout including substantial new material on the financial crisis and the environment Subjects covered include The evolution of the state system Placing the state in modernity States and societies State and economy States and citizens States and the international order States of the twenty first century This book is essential reading for all those studying the state international relations and comparative politics

and science The idea of reason being its own judge is not only pivotal to a proper understanding of Kant's philosophy but can also shed light on the burgeoning fields of meta philosophy and philosophical methodology The 2019 Kant Congress put special emphasis on Kant's methodology his account of conceptual critique and the relevance of his ideas to current issues in especially political philosophy and the philosophy of law Additional sections discussed a wide range of topics in Kant's philosophy The Proceedings will provide anyone who is interested in exploring the variety of present day work on Kant and Kantian themes with a wealth of fruitful inspiration

Democracy and the Global Order David Held, 1995 Democracy is the most potent political idea in the world today yet the future of democracy is increasingly uncertain Key assumptions of democratic thinking and practice are being undermined by diverse sites of social economic power on the one hand and by dense networks of regional and global interconnectedness on the other States and societies are enmeshed in webs of international conditions and processes as never before Democracy and the Global Order offers a highly original and systematic account of these issues Part I assesses the traditional conceptions of democracy Part II traces the rise and displacement of the modern nation state in the context of the interstate system and the world economy Part III explores the theoretical bases of democracy and of the democratic state and the profound changes these concepts must undergo if they are to retain their relevance in the century ahead Finally Part IV champions a cosmopolitan model of democracy a new conception of democracy for a new world order

Encyclopedia of Activism and Social Justice Gary L. Anderson, Kathryn G. Herr, 2007-04-13 This is an important historical period in which to develop communication models aimed at creating opportunities for citizens to find a voice for new experiences and social concerns Such basic social problems as inequality poverty and discrimination pose a constant challenge to policies that serve the health and income needs of children families people with disabilities and the elderly Important changes both in individual values and civic life are occurring in the United States and in many other nations Recent trends such as the globalization of commerce and consumer values the speed and personalization of communication technologies and an economic realignment of industrial and information based economies are often regarded as negative Yet there are many signs from the WTO experience in Seattle to the rise of global activism aimed at making biotechnology accountable that new forms of citizenship politics and

public engagement are emerging The Encyclopedia of Activism and Social Justice presents a comprehensive overview of the field with topics of varying dimensions breadth and length This three volume Encyclopedia is designed for readers to understand the topics concepts and ideas that motivate and shape the fields of activism civil engagement and social justice and includes biographies of the major thinkers and leaders who have influenced and continue to influence the study of activism Key Features Offers multidisciplinary perspectives with contributions from the fields of education communication studies political science leadership studies social work social welfare environmental studies health care social psychology and sociology Provides an easily recognizable approach to topics ideas persons and concepts based on alphabetical and biographical listings in civil engagement social justice and activism Addresses both small scale social justice concepts and more large scale issues Includes biography pieces indicating the concepts ideas or legacies of individuals and groups who have influenced current practice and thinking such as John Stuart Mill Rachel Carson Mother Jones Martin Luther King Jr Karl Marx Mohandas Gandhi Nelson and Winnie Mandela Dorothy Day and Thomas Merton Authority in the Modern State Harold Joseph Laski, 1919 This volume is some sort the sequel to a book on the problem of sovereignty which I published in March 1917 Preface *Frontier Thinking and Human-Nature Relations* E. C. H. Keskitalo, 2024-06-12 Combining historical social and regulative analysis this book builds a compelling critique of frontier thinking as it continues to form our assumptions about social and environmental organisation in ways that impact not least the present environmental crisis This book systematically identifies the ways in which images of nature and society are formed by the historically developed frontier oriented narratives which have underpinned much Anglo American and Anglocentric thought The book confronts these conceptions at large showing that they never held empirically and contrasts them with the situation in northern Europe where diverging assumptions are integral to this day Through this juxtaposition this book illustrates not only the pervasiveness of structures of understanding in steering policy but also the varying traditions regarding how understandings of the environment can be formed This study highlights how historical thought patterns formed for very different reasons than exist today continue to shape our assumptions about nature the relation between urban and rural areas and our understanding of ourselves in relation to the environment This book will be of wide interest to a range of academics and students in the fields of geography anthropology environmental studies sociology political science and development studies amongst others The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

The Nature of Politics Annette A. LaRocco, 2024-04-16 This case study of Botswana focuses on the state building qualities of biodiversity conservation in southern Africa Drawing on extensive fieldwork Annette A LaRocco argues that discourses and practices related to biodiversity conservation are essential to state building in the postcolonial era These discourses and practices invoke the ways the state exerts authority over people places and resources enacts and remakes territorial control crafts notions of ideal citizenship and identity and structures economic relationships at the local national and global levels The book's key innovation is its conceptualization of the conservation estate a term most often used as an apolitical descriptor denoting land set aside for the purpose of conservation LaRocco argues that this description is inadequate and proposes a novel and much needed alternative definition that is tied to its political elements The components of conservation control over land policing of human behavior and structuring of the authority that allows or disallows certain subjectivities render conservation a political phenomenon that can be analyzed separately from considerations of nature or wildlife In doing so it addresses a gap in the scholarship of rural African politics which focuses overwhelmingly on productive agrarian dynamics and often fails to recognize that land nonuse can be as politically significant and wide reaching as land use Botswana is an ideal empirical case study upon which to base these theoretical claims With 39 percent of its land set aside for conservation Botswana is home to large populations of wildlife particularly charismatic megafauna such as the largest herd of elephants on the continent Utilizing more than two hundred interviews participant observation and document analysis this book examines a series of conservation policies and their reception by people living on the conservation estate These phenomena include securitized antipoaching enforcement a national hunting ban 2014-19 restrictions on using wildlife products forced evictions

from conservation areas limitations on mobility and freedom of movement the political economy of Botswana's wildlife tourism industry and the conservation of globally important charismatic megafauna species Financial crises and the nature of capitalist money Jocelyn Pixley, 2013-09-12 This volume is a debate about a sociology and economics of money a form of positive trespassing It is unique in being written by scholars of both disciplines committed to this mutual venture and in starting from the original groundwork laid by Geoffrey Ingham The contributors look critically at money's institutions and the meanings and history of money creation and show the cross cutting purposes or incommensurable sides of money and its crises These arise from severe tensions and social conflicts about the production of money and its many purposes We demonstrate the centrality of money to capitalism and consider social disorders since the 2007 crisis which marks the timeliness and need for dialogue Both disciplines have far too much to offer to remain in the former damaging standoff While we are thankful to see a possible diminution of this split remnants are maintained by mainstream economic and sociological theorists who after all the crises of the past 30 years and many before still hold to an argument that money really does not matter We suggest to many different and interested audiences that since money is a promise understanding this social relation must be a joint though plural task between economics and sociology at the very least **Catalogue of the University of Dakota for the Year ..., with Announcements for the Year ...** University of South Dakota, 1903
