Fry, 2015-02 The chapters in this book posit that humans clearly have the capacity to make war but since war is absent in some cultures it cannot be viewed as a human universal And counter to frequent presumption the actual archaeological record reveals the recent emergence of war It does not typify the ancestral type of human society the nomadic forager band and contrary to widespread assumptions there is little support for the idea that war is ancient or an evolved adaptation Views of human nature as inherently warlike stem not from the facts but from cultural views embedded in Western thinking Amazon.com Genetic Nature/Culture Prof. Alan H. Goodman, Prof. Deborah Heath, M. Susan Lindee, 2003-11-06 The so called science wars pit science against culture and nowhere is the struggle more contentious or more fraught with paradox than in the burgeoning realm of genetics A constructive response and a welcome intervention this volume brings together biological and cultural anthropologists to conduct an interdisciplinary dialogue that provokes and instructs even as it bridges the science culture divide Individual essays address issues raised by the science politics and history of race evolution and identity genetically modified organisms and genetic diseases gene work and ethics

and the boundary between humans and animals The result is an entree to the complicated nexus of questions prompted by the power and importance of genetics and genetic thinking and the dynamic connections linking culture biology nature and technoscience The volume offers critical perspectives on science and culture with contributions that span disciplinary divisions and arguments grounded in both biological perspectives and cultural analysis An invaluable resource and a provocative introduction to new research and thinking on the uses and study of genetics Genetic Nature Culture is a model of fruitful dialogue presenting the quandaries faced by scholars on both sides of the two cultures debate **NATURE SPEAKS** Amit Kumar Kushwaha, 2014-07-22 A collection of getty nature photographs from different budding photographers
