Nature in the Global South Paul Greenough, Anna Lowenhaupt Tsing, 2003-08-29 DVA Alternative cultural forms of environmentalism in South and Southeast Asia div **Nature in the Global South** Paul Greenough, Anna Lowenhaupt Tsing, 2009 DVA Alternative cultural forms of environmentalism in South and Southeast Asia div **The Global South and Literature** Russell West-Pavlov, 2018-03-08 The Global South has largely supplanted the Third World in discussions of development studies postcolonial studies world literature and comparative literature respectively The concept registers a new set of relationships between nations of the once colonized world as their connections to nations of the North diminish in significance Such relationships register particularly clearly in contemporary cultural theory and literary production The Global South and Literature explores the historical cultural and literary applications of the term for twenty first century flows of transnational cultural influence tracing their manifestations across the Global Southern traditions of Africa Asia and Latin America This collection of interdisciplinary contributions examines the origins development and applications of this emergent term employed at the nexus of the critical social sciences and developments in literary humanities and cultural studies This book will be a key resource for students graduates and researchers working in the field of postcolonial studies and world literature *Community, Environment and Local Governance in Indonesia* Carol Warren, John F. McCarthy, 2012-09-10 This book explores the forces reconfiguring local resource governance in Indonesia since 1998 drawing together original field research undertaken in a decade of dramatic political change Case studies from across Indonesia s diverse cultural and ecological landscapes focus on the most significant resource sectors agriculture fisheries forestry mining and tourism providing a rare in depth view of the dynamics shaping social and environmental outcomes in these varied contexts Debates surrounding the tragedy of the commons and environmental governance have focused on institutional considerations of how to craft resource management arrangements in order to further the policy objectives of economic efficiency social equity and environmental sustainability The studies in this volume reveal the complexity of resource security issues affecting local communities and user groups in Indonesia as they engage with wider institutional frameworks in a context driven simultaneously by decentralizing and globalizing forces Through ground up investigations of how local groups with different cultural backgrounds and resource bases are responding to the greater autonomy afforded by Indonesia s new political constellation the authors appraise the prospects for rearticulating governance regimes toward a more equitable and sustainable commonweal This volume offers valuable insights into questions of import to scholars as well as policy makers concerned with decentralized governance and sustainable resource management Governing Climate Change in Southeast Asia Jens Marquardt, Laurence L. Delina, Mattijs Smits, 2021-12-07 This volume showcases the diversity of the politics and practices of climate change governance across Southeast Asia Through a series of country level case studies and regional perspectives the authors in this volume explore the complexities and contested nature of climate governance in what can be

considered as one of the most dynamic and multi faceted regions of the world They reflect upon the tensions between authoritarian and democratic climate change governance the multiple roles of civil society and non state interventions and the conflicts between state planning and market driven climate change governance Shedding light on climate change mitigation and adaptation efforts in Southeast Asia this book presents the various formal and informal institutions of climate change governance their relevant actors procedures and policies Empirical findings from a diverse set of environments are merged into a cross country comparison that allows for elaborating on similar patterns whilst at the same time highlighting the distinct features of climate change governance in Southeast Asia Drawing on case studies from all Southeast Asian countries namely Brunei Darussalam Cambodia Indonesia Laos Malaysia Myanmar the Philippines Singapore Thailand Timor Leste and Viet Nam this book will be of great interest to students scholars and practitioners dealing with climate change and environmental governance

American Wilderness Michael L. Lewis,2007 Addresses the state of scholarship on the political cultural and intellectual history of American responses to wilderness from first contact to the present

The Nature of Heritage Lynn Meskell,2011-08-26 The Nature of Heritage The New South Africa is unique in revealing the conflicts inherent in preserving both natural and cultural heritage by examining the archaeological ethnographic and economic evidence of a nation s attempts to master its past and its future Provides a classic example of how nations attempt to overcome a negative heritage through past mastering of their histories Evaluates the continuing dominance of nature and conservation over concerns for cultural heritage Employs ethnographic and archaeological methodologies to reveal how the past is processed into a new national heritage Identifies heritage as therapy exemplified in the strategy for repairing legacies of racial and ethnic difference in post apartheid South Africa Highlights the role of archaeological heritage sites national parks and protected areas in economic development and social empowerment Explores how nature trumps culture and the global implications of the new configurations of heritage

Planning for the Planet Simone Schleper,2019-07-12 During the 1960s and 1970s rapidly growing environmental awareness and concern created unprecedented demand for ecological expertise and novel challenges for ecological advocacy groups such as the International Union for Conservation of Nature and Natural Resources IUCN This book reveals how despite their vast scientific knowledge and their attempts to incorporate socially relevant themes IUCN experts inevitably struggled to make global schemes for nature conservation a central concern for UNESCO UNEP and other intergovernmental organizations

Droughts, Floods, and Global Climatic Anomalies in the Indian Ocean World Philip Gooding,2022-05-23 This book explores histories of droughts and floods in the Indian Ocean World and their connections to broader global climatic anomalies It deploys an interdisciplinary approach rooted in the emerging field of climate history to investigate the multifaceted effects of global climatic anomalies on regions affected by the Indian Ocean Monsoon System regularly conceived of as the macro region s deep structure Case studies explore how droughts and floods related to anomalous climatic conditions have historically affected states societies and ecologies across

the Indian Ocean World including in relation to food security epidemic diseases political in stability economic change infrastructural development colonialism capitalism and scientific knowledge Tracing longue durée patterns from the twelfth to the early twentieth centuries this book makes a significant contribution to our understanding of global climatic events and their effects on the Indian Ocean World It highlights essential historical case studies for contextualizing the potential effects of global warming on the macro region in the present and future Anthropology and Nature Kirsten Hastrup, 2013-08-15 On the basis of empirical studies this book explores nature as an integral part of the social worlds conventionally studied by anthropologists The book may be read as a form of scholarly edgework resisting institutional divisions and conceptual routines in the interest of exploring new modalities of anthropological knowledge making The present interest in the natural world is partly a response to large scale natural disasters and global climate change and to a keen sense that nature matters matters to society at many levels ranging from the microbiological and genetic framing of reproduction over co species development to macro ecological changes of weather and climate Given that the human footprint is now conspicuous across the entire globe in the oceans as well as in the atmosphere it is difficult to claim that nature is what is given and permanent while people and societies are ephemeral and simply derivative features This implies that society matters to nature and some natural scientists look towards the social sciences for an understanding of how people think and how societies work The book thus opens up a space for new forms of reflection on how natures and societies are generated **Governing**

Environmental Flows Gert Spaargaren, A. P. J. Mol, Frederick H. Buttel, 2006 Lays the foundations for a new conceptualization of global environmental governance that draws on the flow perspective found in recent work in sociology

Forests and Ecological History of Assam, 1826-2000 Arupjyoti Saikia, 2011-02-07 This book presents a comprehensive account of the transformation of Assam's forests and ecology from early nineteenth century to the end of the twentieth century It locates present day ecological conflicts in the colonial era when contest over forest land and resource began to take new shape Arupjyoti Saikia delineates how forest resources in Assam were mapped and integrated with merchant capitalism since the early nineteenth century He shows how imperial forestry practices led to changes in traditional resource utilization patterns The book also examines the political economy of conservation practices It explores the question of law and conservation role of institutions and organizations and the changing role of the forests in imperial economy The book argues how the making of forest policy in the postcolonial period was defined by the complexities of the political matrix It discusses plantation silvicultural practices protection and regeneration of forests and livelihood practices The author also analyses public debates surrounding ecology and environmental changes in conservation practices after the 1980 Act

Shifting Ground Mahesh Rangarajan, K. Sivaramakrishnan, 2014-11-06 Environmental history of India has developed as an important field of inquiry in the last twenty five years While providing major insights the existing scholarship has primarily focused on drawing sharp lines of distinction those between geographical spaces forest rivers farms people herders

farmers townspeople eras colonial post colonial and so on The limitations of these sharp divides are brought to the forefront when there is a critical engagement with the region s contested environmental past *Shifting Ground* brings together an array of essays that pose critical questions regarding India s environmental past and the way it has been approached by scholars From debunking the idea of a primeval pristine forest cover to analysing the dynamics that shape human animal relations to examining the conflicts created by post Independence projects of rural development and conservation this volume touches upon the various aspects of environmental studies and juxtaposes them with social history history of science and technology and history of trade and culture Drawing on original case studies the book not only explores the past but also portrays how its traditions are often invoked to be deployed in contemporary conflicts those that are often aggravated by the pressures on natural assets created by the recent prosperity and the vaulting aspirations of a rapidly expanding Indian middle class

Dharma and Ecology of Hindu Communities Pankaj Jain,2016-04-22 In Indic religious traditions a number of rituals and myths exist in which the environment is revered Despite this nature worship in India its natural resources are under heavy pressure with its growing economy and exploding population This has led several scholars to raise questions about the role religious communities can play in environmentalism Does nature worship inspire Hindus to act in an environmentally conscious way This book explores the above questions with three communities the Swadhyaya movement the Bishnoi and the Bhil communities Presenting the texts of Bishnois their environmental history and their contemporary activism investigating the Swadhyaya movement from an ecological perspective and exploring the Bhil communities and their Sacred Groves this book applies a non Western hermeneutical model to interpret the religious traditions of Indic communities With a foreword by Roger S Gottlieb

[The Oxford Handbook of Contemporary Buddhism](#) Michael K. Jerryson,2017 *The Oxford Handbook of Contemporary Buddhism* offers a comprehensive collection of work by leading scholars in the field They examine the historical development of Buddhist traditions throughout the world from traditional settings like India Japan and Tibet to the less well known regions of Latin America Africa and Oceania

The Routledge Handbook of Philosophy of Biodiversity Justin Garson,Any Plutynski,Sahotra Sarkar,2016-10-04

Biological diversity or biodiversity is the degree of variation of life within an ecosystem. It is a relatively new topic of study but has grown enormously in recent years. Because of its interdisciplinary nature, the very concept of biodiversity is the subject of debate amongst philosophers, biologists, geographers, and environmentalists. The Routledge Handbook of Philosophy of Biodiversity is an outstanding reference source to the key topics and debates in this exciting subject. Comprising twenty-three chapters by a team of international contributors, the Handbook is divided into six parts: Historical and sociological contexts focusing on the emergence of the term and early attempts to measure biodiversity; What is biodiversity? How should biodiversity be defined? How can biodiversity include entities at the edge of its boundaries, including microbial diversity and genetically engineered organisms? Why protect biodiversity? What can traditional environmental ethics contribute to biodiversity? Topics covered include anthropocentrism, intrinsic value, and ethical controversies surrounding the economics of biodiversity; Measurement and methodology, including decision theory and conservation, the use of indicators for biodiversity, and the changing use of genetics in biodiversity conservation; Social contexts and global justice, including conservation and community conflicts, and biodiversity and cultural values; Biodiversity and other environmental values. How does biodiversity relate to other values like ecological restoration or ecological sustainability? Essential reading for students and researchers in philosophy, environmental science, and environmental studies, and conservation management, it will also be extremely useful to those studying biodiversity in subjects such as biology and geography.

Grounding Urban Natures Henrik Ernstson, Sverker Sorlin, 2019-09-03. Case studies from cities on five continents demonstrate the advantages of thinking comparatively about urban environments. The global discourse around urban ecology tends to homogenize and universalize, relying on such terms as smart cities, eco cities, and resilience, and proposing a science of cities based largely on information from the Global North. *Grounding Urban Natures* makes the case for the importance of place and time in understanding urban environments. Rather than imposing a unified framework on the ecology of cities, the contributors use a variety of approaches across a range of locales and timespans to examine how urban natures are part of and are shaped by cities and urbanization. *Grounding Urban Natures* offers case studies from cities on five continents that demonstrate the advantages of thinking comparatively about urban environments. The contributors consider the diversity of urban natures, analyzing urban ecologies that range from the coastal delta of New Orleans to real estate practices of the urban poor in Lagos. They examine the effect of popular movements on the meanings of urban nature in cities including San Francisco, Delhi, and Berlin. Finally, they explore abstract urban planning models and their global mobility, examining real-world applications in such cities as Cape Town, Baltimore, and the Chinese eco city Yixing. Contributors: Mart n vila, Amita Baviskar, Jia Ching Chen, Henrik Ernstson, James Evans, Lisa M Hoffman, Jens Lachmund, Joshua Lewis, Lindsay Sawyer, Sverker S rlin, Anne Whiston Spirn, Lance van Sittert, Richard A Walker.

India's Forests, Real and Imagined Alan Johnson, 2022-12-29. As they seek to explore evolving and conflicting ideas of nationhood and modernity, India's writers have often chosen forests as the dramatic

setting for stories of national identity India's Forests Real and Imagined explores how these settings have been integral to India's sense of national consciousness Alan Johnson demonstrates that modern writers have drawn on older Indian literary traditions of the forest as a place of exile trial and danger to shape new ideas of India as a modern nation The book casts new light on a wide range of modern writers from Bankim Chandra Chattopadhyay widely regarded as the first Indian novelist to contemporary authors such as Amitav Ghosh Arundhati Roy and Salman Rushdie as well as local attitudes to nationhood and the environment across the country **Anthropologica** ,2005
