## Nature Of Authority:

**Nature and Functions of Authority** Yves R. Simon, 1940 Second printing Bibliographical references in Notes pages 47-75    The Nature and Limits of Authority Richard T. De George, 1985    **The Nature of Authority** Kenneth Einar Himma, 2024-12-31 The Nature of Authority provides a comprehensive theory of the nature of authoritative guidance It argues that the following claims exhaust the constitutive properties of authoritative tellings authoritative tellings 1 tell subjects what to do 2 give rise to reasons to comply 3 are issued by personal beings and govern the behavior of personal beings 4 are issued by rationally competent beings and govern the behavior of rationally competent beings 5 are issued under a claim of right that counts as plausible in virtue of being grounded in a system to which subjects acquiesce as governing their behavior 6 are issued by beings with the power to impose their will on subjects with respect to what they do 7 create obligations to comply and 8 are backed by a threat of detriment that is reasonably contrived to deter enough noncompliance to enable the system to minimally achieve its ends    The Moral Authority of Nature Lorraine Daston, Fernando Vidal, 2010-08-15 For thousands of years people have used nature to justify their political moral and social judgments Such appeals to the moral authority of nature are still very much with us today as heated debates over genetically modified organisms and human cloning testify The Moral Authority of Nature offers a wide ranging account of how people have used nature to think about what counts as good beautiful just or valuable The eighteen essays cover a diverse array of topics including the connection of cosmic and human orders in ancient Greece medieval notions of sexual disorder early modern contexts for categorizing individuals and judging acts as against nature race and the origin of humans ecological economics and radical feminism The essays also range widely in time and place from archaic Greece to early twentieth century China medieval Europe to contemporary America Scholars from a wide variety of fields will welcome The Moral Authority of Nature which provides the first sustained historical survey of its topic Contributors Danielle Allen Joan Cadden Lorraine Daston Fa ti Fan Eckhardt Fuchs Valentin Groebner Abigail J Lustig Gregg Mitman Michelle Murphy Katharine Park Matt Price Robert N Proctor Helmut Puff Robert J Richards Londa Schiebinger Laura Slatkin Julia Adeney Thomas Fernando Vidal    On the nature and government of the Church, and the authority of the Christian ministry ... New edition , 1836    **A Demonstration of the Divine Authority of the Law of Nature, and of the Christian Religion** Samuel PARKER (Bishop of Oxford.), 1681    Confirmation; or, laying on the hands; its authority and nature Samuel FULLER (D.D., of Andover [Mass.]), 1857    **An Attempt to ascertain and illustrate the Authority, Nature, and Design of the Institution of Christ commonly called the Communion and the Lord's Supper. Ms. note [by Samuel Parr].** William BELL (Prebendary of Westminster.), 1780    **The Purpose and Power of Authority** Myles Munroe, 2010-12-03 In Understanding the Purpose and Power of Authority best selling author Dr Myles Munroe turns the widely accepted but counterfeit concept of authority upside down Then he reveals God's original intent showing us how to live in the freedom of our own personal

authority in God's great design and to respond positively to the inherent authority of others. Many people view authority as something oppressive, stifling, and even fearful. All of us hate to be controlled or manipulated. Our negative concepts and experiences of authority produce life-draining emotions: fear, distrust, suspicion, friction, defensiveness, antagonism, stress, worry, and dread. Others have a limited perspective of what authority means, believing that only people who reach a certain level in life can exercise it. They don't believe they could ever be called to a place of authority. The truth is, we were all created for authority, and we are all answerable to the authority of others. Authority is what we're authorized to do by our inherent purposes. You have a God-given calling to develop your own personal authority to carry out your unique purpose in life.

MacLane, 1906. Nature Speaks Kellie Robertson, 2017-01-25. What does it mean to speak for nature? Contemporary environmental critics warn that giving a voice to nonhuman nature reduces it to a mere echo of our own needs and desires; they caution that it is a perverse form of anthropocentrism. And yet, nature's voice proved a powerful and durable ethical tool for premodern writers, many of whom used it to explore what it meant to be an embodied creature or to ask whether human experience is independent of the natural world in which it is forged. The history of the late medieval period can be retold as the story of how nature gained an authoritative voice only to lose it again at the onset of modernity. This distinctive voice, Kellie Robertson argues, emerged from a novel historical confluence of physics and fiction writing. Natural philosophers and poets shared a language for talking about physical inclination, the inherent desire to pursue the good that was found in all things living and nonliving. Moreover, both natural philosophers and poets believed that representing the visible world was a problem of morality rather than mere description. Based on readings of academic commentaries and scientific treatises as well as popular allegorical poetry, *Nature Speaks* contends that controversy over Aristotle's natural philosophy gave birth to a philosophical poetics that sought to understand the extent to which the human will was necessarily determined by the same forces that shaped the rest of the material world. Modern disciplinary divisions have largely discouraged shared imaginative responses to this problem among the contemporary sciences and humanities. Robertson demonstrates that this earlier worldview can offer an alternative model of human/nonhuman complementarity, one premised neither on compulsory human exceptionalism nor on the simple reduction of one category to the other. Most important, *Nature Speaks* assesses what is gained and what is lost when nature's voice goes silent. **Instituting Nature**

Andrew S. Mathews, 2011-11-04 A study of how encounters between forestry bureaucrats and indigenous forest managers in Mexico produced official knowledge about forests and the state Greater knowledge and transparency are often promoted as the keys to solving a wide array of governance problems In *Instituting Nature* Andrew Mathews describes Mexico's efforts over the past hundred years to manage its forests through forestry science and biodiversity conservation He shows that transparent knowledge was produced not by official declarations or scientists' expertise but by encounters between the relatively weak forestry bureaucracy and the indigenous people who manage and own the pine forests of Mexico Mathews charts the performances, collusions, complicities and evasions that characterize the forestry bureaucracy He shows that the authority of forestry officials is undermined by the tension between local realities and national policy officials must juggle sweeping knowledge claims and mundane concealments ambitious regulations and routine rule breaking Moving from government offices in Mexico City to forests in the state of Oaxaca Mathews describes how the science of forestry and bureaucratic practices came to Oaxaca in the 1930s and how local environmental and political contexts set the stage for local resistance He tells how the indigenous Zapotec people learned the theory and practice of industrial forestry as employees and then put these skills to use when they become the owners and managers of the area's pine forests eventually incorporating forestry into their successful claims for autonomy from the state Despite the apparently small scale and local contexts of this balancing act between the power of forestry regulations and the resistance of indigenous communities Mathews shows that it has large implications for how we understand the modern state scientific knowledge and power and for the global carbon markets for which Mexican forests might become valuable *Journal of the Transactions of the Victoria Institute, Or Philosophical Society of Great Britain* Victoria Institute (Great Britain), 1909 Each volume includes list of members and objects of the institute except v 31 which has no list of members Beginning with v 12 a list of the papers contained in preceding volumes is issued regularly with each volume
