resulted in a world increasingly homogenized lacking in biodiversity and with increased pollution Mankind has been slow to learn and even slower to apply the lessons that nature offers in spite of the urgency of our predicament This book contains papers presented at the fourth International Conference on Comparing Design in Nature with Science and Engineering The emphasis of this Volume is on engineering and architectural applications and on biomimetics reflecting in some measure current interest in finding environmentally friendly solutions which also optimize the use of natural resources The contributions have been arranged into the following topics Biomimetics Shape and Form in Engineering Nature Nature and Architectural Design Natural Materials and Surfaces Complexity and Education Lifelong Landscape Design Mary Palmer Dargan,2012-10-01 Lifelong landscape design means thinking about more than your garden It involves encouraging your community to be a well rooted environment consisting of friends who share home grown produce walk in the neighborhood recycle water harvest compost and are watchful of each other s well being Lifelong landscape designs create environments that connect with nature encompass a home and promote healthy living by providing mobility social interaction and places to sustain the body and soul Learn easy steps to design your own lifelong landscape through more than 200 landscape patterns and activities that illustrate components of healthy living Enhance the quality of your life at any stage with practical advice from this inspirational landscape architect with more than 30 years experience
