Nature Of Moral Thinking:

The Nature of Moral Thinking Francis Snare, 2002-09-11 The Nature of Moral Thinking is an introductory text to the questions of ethics offering a solid philosophical and historical basis for understanding the central issues Francis Snare discusses in detail the classical philosophical arguments of Plato and Butler in relation to relativism and subjectivism and treats Marx and Nietzsche in regard to the origins and explanation of morality

Thinking in Moral Terms Sigrún Svavarsdóttir, 2001 This work examines the nature of moral judgements In the course of developing an account of moral judgements the author discusses issues such as moral motivation the nature of desire the justification of commitments the relation between morality and rationality the difference between moral and scientific inquiry and the nature of properties of concepts and of normativity The author argues non cognitivists who construe moral judgements as mere expressions of sentiments that moral thought employs concepts which figure into the content of both cognitive and conative states of mind She argues that this view is not a cause for any metaphysical worries about moral properties and rejects the idea that the difference in the distinctive action guiding role of moral judgements is to be understood in terms of the metaphysical nature of the facts which render them true She also rejects the widespread idea that the distinctive action guiding role of moral judgements amounts to their being intrinsically motivating and argues that moral judgements motivate in collaboration with a desire which employs moral concepts in representing the desired state of affairs Against some moral naturalists the author argues that it is not a condition on the acceptance of a moral theory that its concepts have some explanatory function and that this marks the crucial difference between the concepts unique to moral thought and those characteristic of scientific or proto scientific thought She suggests that this reflects a difference in the aims of moral and scientific inquiry Appreciation of the distinctive aim of moral practice is required for the mastery of moral concepts and this is why moral judgements are invariably understood as action guiding even if they are not in all cases motivating

Morality : Its Nature and Justification Bernard Gert Stone Professor of Intellectual and Moral Philosophy, 1998-07-31 Bernard Gert's classic work Morality in which he argues his distinctive and comprehensive moral theory is now in its sixth edition Gert argues that morality is an informal system that does not provide answers to every moral question but does always limit the range of morally acceptable options and so explains why some moral questions cannot be resolved Gert describes the two step procedure that is used in moral decisions and judgments and

he shows that moral rules cannot be understood independently of the system in which they are embedded Although his moral theory is sophisticated it is presented with a clarity that will appeal to undergraduate and graduate students alike as well as anyone with a general interest in applied ethics In this new edition Gert perfects the consistency of his views by presenting his argument in greater detail he also revises the text in light of a critical book and two symposia dedicated to his theory that have surfaced since the book's last publication This is the definitive edition to the work that has received so much attention and acclaim

Science, Art and Nature in Medieval and Modern Thought

A.C. Crombie, 1990-07-01 The author sees the history of Western Science as the history of a vision and an argument initiated by the ancient Greeks in their search for principles at once of nature and of argument itself This scientific vision explored and controlled by argument and the diversification of both vision and argument by scientific experience and by interaction with the wider contexts of intellectual culture constitute the long history of European scientific thought Underlying that development have been specific commitments to conceptions of nature and of science and its intellectual and moral assumptions accompanied by a recurrent critique their diversification has generated a series of different styles of scientific thinking and of making theoretical and practical decisions which the work describes

The Nature of Normativity

Ralph Wedgwood, 2007-07-19 The *Nature of Normativity* presents a complete theory about the nature of normative thought that is the sort of thought that is concerned with what ought to be the case or what we ought to do or think Ralph Wedgwood defends a kind of realism about the normative according to which normative truths or facts are genuinely part of reality Anti realists often complain that realism gives rise to demands for explanation that it cannot adequately meet What is the nature of these normative facts How we

could ever know them or even refer to them in language or thought Wedgwood accepts that any adequate version of realism must answer these explanatory demands However he seeks to show that these demands can be met in large part by relying on a version of the idea which has been much discussed in recent work in the philosophy of mind that the intentional is normative that is that there is no way of explaining the nature of the various sorts of mental states that have intentional or representational content such as beliefs judgments desires decisions and so on without stating normative facts On the basis of this idea Wedgwood provides a detailed systematic theory that deals with the following three areas the meaning of statements about what ought to be the nature of the facts stated by these statements and what justifies us in holding beliefs about what ought to be

The Nature of Principles Steven S. Coughlin (Ph. D.), 2008 **The Human Relationship to Nature** Matthew R.

Foster, 2016-11-02 Growing alarm over the harm done by humans to the natural world and even to the viability of our own industrial civilization compels us to ask the deeper moral question What should be the human relationship to nature Matthew R Foster starts by assessing three contrasting patterns of moral reasoning the Progress Ethic that created the world we live in the biblically inspired Stewardship Ethic and the Connection Ethic based on scientific understanding of the interdependence of all natural entities Critical analysis reveals that none of these ethics is able to sustain the values it advocates due to two unsupportable presumptions that the norms of human morality are commensurate with the natural world and that the value of an entity is an intrinsic property Foster argues that in order for a future environmental ethic to be both logically coherent and environmentally constructive it must start from unconventional notions First because nature will never be commensurate with human moral reasoning non rational resources must be employed despite the risks involved Second value resides in the relationship of one entity to another and does not belong intrinsically to either in short value is foremost a verb rather than a noun Foster proposes a new paradigm attentive to the realm of value relations among all natural entities one which offers mediating opportunities between nature and morality In this new ethic there are no shoulds Rather moral responsibilities to the natural entities around us are elective placing us in an unfamiliar yet potentially liberating network of relationships This book will be of interest to scholars both instructors and students of environmental ethics philosophy religion and intellectual history and all who are concerned about the environmental challenges of our time

On Human Nature Roger Scruton, 2018-10-16 A brief radical defense of human uniqueness from acclaimed philosopher Roger Scruton In this short book acclaimed writer and philosopher Roger Scruton presents an original and radical defense of human uniqueness Confronting the views of evolutionary psychologists utilitarian moralists and

philosophical materialists such as Richard Dawkins and Daniel Dennett Scruton argues that human beings cannot be understood simply as biological objects We are not only human animals we are also persons in essential relation with other persons and bound to them by obligations and rights Scruton develops and defends his account of human nature by ranging widely across intellectual history from Plato and Averro s to Darwin and Wittgenstein The book begins with Kant s suggestion that we are distinguished by our ability to say I by our sense of ourselves as the centers of self conscious reflection This fact is manifested in our emotions interests and relations It is the foundation of the moral sense as well as of the aesthetic and religious conceptions through which we shape the human world and endow it with meaning And it lies outside the scope of modern materialist philosophy even though it is a natural and not a supernatural fact Ultimately Scruton offers a new way of understanding how self consciousness affects the question of how we should live The result is a rich view of human nature that challenges some of today s most fashionable ideas about our species Gender, Nature, and Nurture Richard A. Lippa,2005-05-06 Text or supplement for courses on gender psych of women or men and or gender roles found in a variety of depts **Good Faith** Roger R. Adams,2023-03-09 Beliefs have consequences Our beliefs about life s big questions Who am I How should I act What s my purpose for living impact our lives and the lives of people around us Our answers should take into account scientific explanations of our world and our species but answers to existential questions are matters of values not empirical facts Our answers are the lenses through which we observe and make sense of ourselves and our experiences lenses developed from attitudes and assumptions absorbed from parents friends and cultures and also from religions and secular ideologies We have choices and the lenses we choose to wear shape our day to day decisions and interactions Good Faith examines the choices various answers with their embedded assumptions and values and assesses the likely results if people lived according to those answers Flourishing is the criterion Do our answers enhance or diminish well being for ourselves our communities and all humanity *Alchemists of Human Nature* Petteri Pietikainen,2015-10-06 A study of Modernist utopias of the mind This book examines the psychodynamic writings of Otto Gross C G Jung Wilhelm Reich and Erich Fromm It argues utopianism became increasingly important to the fundamental ambitions of all four thinkers and places the utopian impulse with the historical context of the early twentieth century
