including the idea that human language as an interface system provides the basis for consciousness *The Nature and Structure of Content* Jeffrey C. Dictionary of the English and German, and the German and English Language Joseph Leonhard Hilpert, 1857

Bertrand Russell and the Nature of Propositions Samuel Lebens, 2017-05-25 *Bertrand Russell and the Nature of Propositions* offers the first book length defence of the Multiple Relation Theory of Judgement MRTJ Although the theory was much maligned by Wittgenstein and ultimately rejected by Russell himself Lebens shows that it provides a rich and insightful way to understand the nature of propositional content In Part I Lebens charts the trajectory of Russell's thought before he adopted the MRTJ Part II reviews the historical story of the theory What led Russell to deny the existence of propositions altogether Why did the theory keep evolving throughout its short life What role did G F Stout play in the evolution of the theory What was Wittgenstein's concern with the theory and if we can't know what his concern was exactly then what are the best contending hypotheses And why did Russell give the theory up In Part III Lebens makes the case that Russell's concerns with the theory weren't worth its rejection Moreover he argues that the MRTJ does most of what we could want from an account of propositions at little philosophical cost This book bridges the history of early analytic philosophy with work in contemporary philosophy of language It advances a bold reading of the theory of descriptions and offers a new understanding of the role of Stout and the representation concern in the evolution of the MRTJ It also makes a decisive contribution to philosophy of language by demonstrating the viability of a no proposition theory of propositions **A Dictionary of the English and German, and the German and English Language: German and English** Joseph Leonhard Hilpert, 1846

Language and Nature in the Classical Roman World Giuseppe Pezzini, Barnaby Taylor, 2019-06-20 A familiar theme in

Greek philosophy largely due to the influence of Plato's Cratylus linguistic naturalism the notion that linguistic facts structures or behaviour are in some significant sense determined by nature constitutes a major but under studied area of Roman linguistic thought Indeed it holds significance not only for the history of linguistics but also for philosophy stylistics rhetoric and more The chapters in this volume deal with a range of naturalist theories in a variety of authors including Cicero Varro Nigidius Figulus Posidonius and Dionysius of Halicarnassus The result is a complex and multi faceted picture of how language and nature were believed to interrelate in the classical Roman world

Pararealities: The Nature of Our Fictions and How We Know Them Floyd Merrell, 1983-01-01 The objective of this study is to inquire from a broad epistemological view into the underlying nature of fictions and above all to discover how it is possible to create and process them In Chapter One I put forth four postulates in the form of thought experiments In Chapter Two I turn attention to make believe imaginary and dream worlds and how they can be conceived and perceived only with respect to the a real world Chapter Three includes a discussion of the affinities and differences between one's tacit knowledge of certain aspects of the number system in arithmetic an ordered series and the range of all possible fictional entities an unordered network In Chapter Four I establish more precisely the relations between one's real world and one's fictional worlds in light of the conclusions from Chapter Three And in Chapter Five I attempt to construct a formal model with which to account for the construction of all possible fictional sentences
