## Nature Of Russia Os Nd:

Mapping Russia's Natural Focal Diseases Svetlana Malkhazova, Varvara Mironova, Natalia Shartova, Dmitry Orlov, 2018-10-24 This book is the first scientific publication on diseases caused by agents circulating in natural environments independently from humans covering the whole territory of the Russian Federation It contains diverse and multifaceted information both in textual and cartographic form The book focuses on the historical and current distribution of natural focal diseases in Russia epidemiological aspects natural and socio economic determinants conducting natural foci With a series of maps this book depicts population morbidity rates in particular regions and on a national level for the 21st century With numerous color illustrations this book appeals to a wide audience and is of particular interest to geographers environmental workers epidemiologists and other specialists interested in environmental and public health issues **Natural Language Processing and Information Systems** Helmut Horacek, Elisabeth Metais, Rafael Munoz, Magdalena Wolska, 2010-04-11 This volume contains the papers presented at NLDB 2009 the 14th International Conference on Applications of Natural Language to Information Systems held June 24-26 2009 at the University of the Saarland and the German research Center for Artificial Intelligence in Saarbrücken Germany In addition to reviewed submissions the program also included contributions to the doctoral symposium held during NLDB 2009 as well as two invited talks These talks covered some of the currently hot topics in the use of natural language for accessing information systems We received 51 submissions as regular papers for the main conference 2 extra submissions as posters and 3 short papers for the doctoral symposium Each paper for the main conference was assigned four reviewers taking into account preferences expressed by the Program Committee members as much as possible Within the review deadline we received at least three reviews for almost all submissions After the review deadline the Conference Organizing Committee members and the Program Committee Chair acted as meta reviewers This task included studying the reviews and the papers especially those whose assessment made them borderline cases and discussing conflicting opinions and their impact on the assessment of individual papers Finally the meta reviewers wrote additional reviews for the few papers which received less than three reviews as well as for papers which received reviews with considerably conflicting assessments *Russia and the North* Elana Wilson Rowe, 2010-07-01 Russia holds more Arctic territory than any other state yet unlike other Arctic states it does not have a unified strategy identifying economic and political aims for the North Russia's policies on the North are dispersed across a variety of fields from domestic migration politics to oil and gas development This volume engages the disparate elements of Russian northern policy and illustrates how the centralized relatively economically strong and politically assertive Russia of today defines and addresses northern spaces opportunities and challenges As energy markets continue looking northward and climate change renders the Arctic increasingly accessible the geopolitical interests of Arctic states will be brought more frequently to the forefront These circumstances will make the disputed borders and overlapping sovereignty claims of the North an important topic in international politics Given its

geographic size and political influence Russia is and will continue to be a key regional and global actor in the international politics of the North      *Religion and Rebellion in Iran* Nikki R. Keddie, 2012-10-12 An account of the events of the Iranian Tobacco protest of 1891 to 1892 This book examines the developments which led to this sudden outburst of opposition traces the course of events in each city and notes the importance of the protest for the creation of the Iranian opposition movement      *New Results and Advances in PGE Mineralogy in Various Ni-Cu-Cr-PGE Ore Systems* Andrei Y.

Barkov, Federica Zaccarini, 2019-11-14 The book Special Issue presents impressive new results related to a wide spectrum of occurrences of platinum group minerals PGM and natural compounds enriched in platinum group elements PGE which are associated with various complexes and deposits such as Uralian Alaskan type complexes layered intrusions and placers The geographical locations of the involved deposits and complexes include on a truly international scale different areas of the Urals Western and Eastern Sayans and Gornaya Shoria in Siberia Southern Central Asian Orogenic Belt in China Northern Michigan USA South Africa and Zimbabwe etc Of particular interest is the first description of a new species of PGM thalhammerite approved by the Commission on New Minerals Nomenclature and Classification of the International Mineralogical Association which is a new species of palladium silver sulfobismuthide discovered in the Noril'sk region of Russia Additionally comprehensive reviews on compositional variations in Pt-Fe alloy minerals and processes of transformations of PGM in exogenic environments are presented which will also attract attention from international readers

**Handbook of Environmental Isotope Geochemistry** Mark Baskaran, 2011-10-13 Applications of radioactive and stable isotopes have revolutionized our understanding of the Earth and near earth surface processes The utility of the isotopes are ever increasing and our sole focus is to bring out the applications of these isotopes as tracers and chronometers to a wider audience so that they can be used as powerful tools to solve environmental problems New developments in this field remain mostly in peer reviewed journal articles and hence our goal is to synthesize these findings for easy reference for students faculty regulators in governmental and non governmental agencies and environmental companies While this volume maintains its rigor in terms of its depth of knowledge and quantitative information it contains the breadth needed for wide variety problems and applications in the environmental sciences This volume presents all of the newer and older applications of isotopes pertaining to the environmental problems in one place that is readily accessible to readers This book not only has the depth and rigor that is needed for academia but it has the breadth and case studies to illustrate the utility of the isotopes in a wide variety of environments atmosphere oceans lakes rivers and streams terrestrial environments and sub surface environments and serves a large audience from students and researchers regulators in federal state and local governments and environmental companies      *Natural Resources and Sustainability* Daniel E. Vasey, Sarah E. Fredericks, Lei Shen, Shirley Thompson, 2011-12-08 Natural Resources and Sustainability explores how human needs and desires from sustenance and shelter to recreation and travel have spurred the consumption of Earth's material resources Scientists ecologists and other

expert authors present the historical impact of commercial activities in industries as varied as fisheries agriculture energy and mineral extraction discuss the global distribution and use of renewable and nonrenewable resources and focus on innovative approaches for the future Readers will learn why renewal doesn't necessarily put a resource beyond harm and why the no free lunch adage applies to all natural resources

**Earth's Natural Resources** John V. Walther, John Walther, 2014 Earth's Natural Resources provides a thorough overview of the subject and details how natural resources relate to individuals and our society It discusses how the Earth's natural resources form and change over time how they are extracted for human use and how we can continue to sustainably use them with our ever growing global population The text begins with the basics of energy giving resources such as oil natural gas and coal as well as alternative energy sources and nuclear power It goes on to cover the Earth's abundant and scarce metals followed by elements used in agriculture water and its distribution quality and usage The final section highlights soil composition minerals and degradation In each section the author discusses the science of the element under consideration as well as any environmental and sustainability concerns that have arisen as humans have harvested the resources with increasing effectiveness Preview Content Today Download chapters 1 and 4 under the Sample Materials tab Provides a thorough overview of our natural resources and how society affects these resources Includes discussion of where natural resources occur how they are concentrated how they are extracted and the extent of their supply and usage Contains content on the latest alternative energy resources Offers end of chapter material including chapter summaries key term listings problems and references Instructor resources include PowerPoint Image Bank PowerPoint Lecture Outlines and answers to the end of chapter problems Appropriate for use in the Earth Resources course taught within the departments of geology environmental science and natural resources 2014 434 pages

*Soviet Natural Resources in the World Economy* Robert G. Jensen, Theodore Shabad, Arthur W. Wright, 1983-08 Russia is a huge storehouse of natural resources including oil gas and other energy sources which she can trade with the rest of the world for advanced technology and wheat In this book leading experts evaluate the Soviet potential in major energy and industrial raw materials giving special attention to implications for the world economy to the end of the twentieth century The authors examine the mineral and forest resources that the Soviet Union has developed and may yet develop to provide exports during the 1980s They discuss the regional dimension of these resources especially in Siberia and the Soviet Far East individual mineral raw materials such as petroleum natural gas timber iron ore manganese and gold and finally the role of raw materials in Soviet foreign trade The authors representing the United States Canada and Great Britain are primarily geographers but they include economists political scientists and a geologist Their work is based on primary sources for most of these reports current information is no longer being released to researchers and on interviews with Soviet officials
